Detailed PDI Study Plan - New PDI Exam Question

We guarantee that you can pass the exam at one time even within one week based on practicing our PDI exam materials regularly. 98 to 100 percent of former exam candidates have achieved their success by the help of our PDI Practice Questions. And we have

been treated as the best friend as our PDI training guide can really help and change the condition which our loyal customers are in and give them a better future.

Salesforce Platform Developer I (PDI) Sample Questions (Q177-Q182):

NEW QUESTION # 177
While writing an Apex class, a developer wants to make sure that all functionality being developed is handled as specified by the requirements.
Which approach should the developer use to be sure that the Apex class is working according to specifications?

- A. Create a test class to execute the business logic and run the test in the Developer Console.
- B. Run the code in an Execute Anonymous block in the Developer Console.
- C. Include a try/catch block to the Apex class.
- D. Include a savepoint and pacabase.rollback().

Answer: A

Explanation:
Creating test classes ensures that the Apex class works according to specifications by validating the functionality under various scenarios and edge cases. Running tests in the Developer Console provides detailed feedback on whether the class meets requirements.

NEW QUESTION # 178
Which two statement can a developer use to throw a custom exception of type MissingFieldValueException?Choose 2 answers

- A. Throw Exception(new MissingFieldValueException());
- B. Throw (MissingFieldValueException,'Problem occurred');
- C. Throw new MissingFieldValueException('Problem occurred');
- D. Throw new MissingFieldValueException();

Answer: C,D

NEW QUESTION # 179
Which statement should be used to allow some of the records in a list of records to be inserted if others fail to be inserted?

- A. insert records
- B. Database.insert (records, true)
- C. insert (records, false)
- D. Database.insert (records, false)

Answer: D

NEW QUESTION # 180
Which governor limit applies to all the code in an apex transaction?

- A. Number of classes called
- B. Elapsed SOQL query time
- C. Elapsed CPU time
- D. Number of new records created

Answer: C

NEW QUESTION # 181
A developer created this Apex trigger that calls MyClass.mystaticMethod:

```
trigger myTrigger on Contact (before insert)
{     MyClass.myStaticMethod(trigger.new); }
```

The developer creates a test class with a test method that calls MyClass.myStaticMethod directly, resulting in 81% overall code coverage What happens when the developer tries to deploy the trigger and two classes to production, assuming no other code exists?

- A. The deployment passes because the Apex code has the required >75% code coverage.
- B. The deployment passes because both classes and the trigger were included in the deployment.
- C. The deployment fails because no assertions were made in the test method.
- D. The deployment fails because the Apex trigger has no code coverage.

Answer: D

Explanation:
Salesforce requires that every trigger must have at least 1% test coverage to be deployed. Since the trigger in question has 0% test coverage, the deployment will fail even if the helper method and related classes meet the coverage requirement.

NEW QUESTION # 182
