Valid Learning OGA-031 Materials & Pass Guaranteed OGA-031 Dumps Collection: ArchiMate 3 Part 1 Exam

You can directly refer our The Open Group OGA-031 study materials to prepare the exam. Once the newest test syllabus is issued by the official, our experts will quickly make a detailed summary about all knowledge points of the real The Open Group OGA-031 Exam in the shortest time. All in all, our OGA-031 exam quiz will help you grasp all knowledge points.

The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17
Which of the following is a composite element?

- A. Contract
- B. Aggregation
- C. Course of Action
- D. Grouping

Answer: D

Explanation:
This is because a grouping is a composite element that aggregates or groups other elements based on some common characteristic or purpose. A course of action is a motivation element that represents an approach or plan for achieving some goal. An aggregation is a structural relationship that models the whole-part hierarchy between elements. A contract is a passive structure element that represents a formal or informal specification of an agreement between a provider and a consumer that specifies the rights and obligations associated with a product or service.

ased on the ArchiMate 3 documents or objectives, a grouping is a composite element that consists of other concepts, from one or more aspects or layers of the ArchiMate language. A grouping can be used to model a logical or physical grouping of elements that belong together based on some criteria. A grouping can itself aggregate or compose other groupings, leading to a hierarchy of these elements.

References: ArchiMate 3.2 Specification, Chapter 4 Generic Metamodel, Section 4.1 Behavior and Structure Elements, Subsection 4.1.5 Composite Elements 1; Composite Elements | Enterprise Architect User Guide 2.

NEW QUESTION # 18
Which of the following is a Passive Structure Element?

- A. Data Object
- B. Application Component
- C. Actor
- D. Event

Answer: A

Explanation:
Based on the ArchiMate 3 documents or objectives, a data object is a passive structure element that represents a piece of data that can be manipulated by behavior elements such as application functions or services. A passive structure element is a structural element that cannot perform behavior. Active structure elements can perform behavior on passive structure elements.

NEW QUESTION # 19
Consider the diagram, whereXandZare servers located in theArchiSurance data center:

(A diagram showingX and Z (servers)connected toE (a shared technology element).) What correctly describes the diagram?

- A. The servers, represented by devices, are connected by a communication network.
- B. The servers share a common network area storage device E.
- C. The servers are shown in the technology interaction E, where they collectively process data.
- D. Technology collaboration E represents a point of access for services offered by the servers.

Answer: B

Explanation:
Comprehensive and Detailed In-Depth Explanation:
This diagram represents aTechnology Layer modelin ArchiMate, whereX and Z are servers, andE is a shared technology component.
* X and Z are likely hardware devices (Servers), which are typically represented as Technology Nodes or Devices in ArchiMate.
* E is a shared resource that both servers connect to, implying a common storage or network area storage device.
According to toArchiMate 3.2,Technology Objects like Storage Devices or Infrastructure Services can be shared across multiple devices.
Analysis of Answer Choices:
#A. The servers, represented by devices, are connected by a communication network.##Incorrect

* There isno explicit network symbol(e.g., a communication path or a network node).
* Therelationship between X, Z, and E indicates a shared resource rather than a network connection.
* ArchiMate 3.2 Specification, Section 6.6.4, definesCommunication Networksseparately, and none are present here.
#B. The servers are shown in the technology interaction E, where they collectively process data.
##Incorrect
* Technology Interaction represents behaviorin ArchiMate, meaning two or more active elements are collaborating on a process.
* E is a shared object, not an interaction process.
#C. The servers share a common network area storage device E.##Correct Answer
* E is a shared resource, meaningit is likely a storage device used by both servers.
* ArchiMate 3.2 Specification, Section 6.6.2, states thatTechnology Objects can represent storage elementsused by multiple devices.
* Thismatches the pattern of a shared Network Attached Storage (NAS) or Storage Area Network (SAN).
#D. Technology collaboration E represents a point of access for services offered by the servers.
##Incorrect
* Technology Collaboration elementsrepresentactive behavior, not astatic resourcelike a shared storage system.
* E does not behave as a collaboration element but as a shared infrastructure object.
#C. The servers share a common network area storage device E.
References:
* ArchiMate 3.2 Specification: Sections 6.6.2 (Technology Object), 6.6.4 (Communication Network), and 6.6.7 (Technology Collaboration).
* Archi User Guide: Understanding shared technology infrastructure and storage modeling.

NEW QUESTION # 20

Which of the following is the correct relationship between the bottom elements and the top element?

- A. Realization
- B. Aggregation
- C. Access
- D. Specialization

Answer: B

Explanation:
Based on the ArchiMate 3 documents or objectives, an aggregation relationship indicates that an element groups a number of other

concepts. The aggregation relationship has been inspired by the aggregation relationship in UML class diagrams. Unlike composition, aggregation does not imply an existence dependency between the aggregating and aggregated concepts. The notation for an aggregation relationship is a solid line with an empty diamond at the end that points to the whole element. The diagram uses an aggregation relationship from the bottom elements to the top element to indicate that the top element groups the bottom elements. References: ArchiMate 3.2 Specification, Chapter 5 Relationships, Section 5.1 Structural Relationships 1; Structural Relationship: Part 3 - ArchiMate Resources for FREE 2.

NEW QUESTION # 21

Complete the sentence. The "Course of Action" element is used to represent __.

- A. What an enterprise has decided to do
- B. An ability that an active structure element possesses
- C. Results produced by capabilities of an organization
- D. The relative worth, utility, or importance of a core element

Answer: A

Explanation:
Comprehensive and Detailed in Depth Explanation:TheCourse of Actionelement representswhat an enterprise has decided to doin order to achieve a strategic objective. Itdefines high-level actions and strategiesthat guidebusiness capabilities and activities. TheArchiMate 3.2 Specificationstates thatCourses of Action define the high-level choices and strategic actions taken by an organization.
