

LEED-Green-Associate Latest Exam & LEED-Green-Associate Reliable Test Practice

LEED Green Associate Sample Exam Questions&Answers

What rules should be used when selecting a LEED rating system when more than one system may apply? - ✓ **40/60**
Use the rating system that is most applicable

To verify the compliance of a credit or prerequisite, a qualified member of the project team submits this - ✓ **Credit Forms**

This source consumes the largest amount of energy in buildings - ✓ **Space Heating**

Legal protection of the ozone layer in the US is provided by this - ✓ **Montreal Protocol**

2009 LEED rating systems, except LEED for Homes and LEED for ND, have what 3 structures? - ✓ **Credits, Minimum Program Requirements, Prerequisites**

The Energy Policy Act establishes what flush rate as the baseline water consumption for water closets? - ✓ **1.6 gallons per flush**

The Triple Bottom Line evaluates the human and environmental effects associated with these - ✓ **Social, economics, and environment**

Construction and demolition debris cannot include 2 of these items - ✓ **Rock, Soil**

To qualify as a regional material, within what distance must a material be extracted, harvested, or recovered, and manufactured? - ✓ **500 miles**

For storage and collection of recyclables, a building recycling program must include these items: - ✓ **Plastic, Cardboard, Metal**

To two primary responsibilities of the Green Building Certification Institute (GBCI) are: - ✓ **Provides third party LEED professional credentialing, Provides third part LEED project certification**

Regional Priority credits are made available to the project for - ✓ **The zip code of the geographic location of the project**

The LEED project boundary is defined as - ✓ **The boundary description that is submitted for certification**

All the given practice questions in the desktop software are identical to the LEED Green Associate Exam (LEED-Green-Associate) actual test. Windows computers support the desktop practice test software. DumpsValid has a complete support team to fix issues of USGBC LEED-Green-Associate PDF QUESTIONS software users. DumpsValid practice tests (desktop and web-based) produce score report at the end of each attempt. So, that users get awareness of their LEED Green Associate Exam (LEED-Green-Associate) preparation status and remove their mistakes.

USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.

Topic 2	<ul style="list-style-type: none"> • Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.
Topic 3	<ul style="list-style-type: none"> • Project Surroundings and Public Outreach: This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.
Topic 4	<ul style="list-style-type: none"> • Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.

LEED-Green-Associate Reliable Test Practice - Examcollection LEED-Green-Associate Questions Answers

Our evaluation system for LEED-Green-Associate test material is smart and very powerful. First of all, our researchers have made great efforts to ensure that the data scoring system of our LEED-Green-Associate test questions can stand the test of practicality. Once you have completed your study tasks and submitted your training results, the evaluation system will begin to quickly and accurately perform statistical assessments of your marks on the LEED-Green-Associate Exam Torrent. You only need to spend 20 to 30 hours on practicing and consolidating of our LEED-Green-Associate learning material, you will have a good result. After years of development practice, our LEED-Green-Associate test torrent is absolutely the best. You will embrace a better future if you choose our LEED-Green-Associate exam materials.

USGBC LEED Green Associate Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24

As of 1996, the Montreal Protocol banned the production of what chemical compound known to have ozone-depleting potential?

- A. Hydrochlorofluorocarbons (HCFCs)
- B. Hydrofluorocarbons (HFCs)
- C. Chlorofluorocarbons (CFCs)
- D. Hydrofluorocarbons Phaseout Management Plan (HPMP)

Answer: C

Explanation:

As of 1996, the Montreal Protocol banned the production of chlorofluorocarbons (CFCs), a chemical compound known to have ozone-depleting potential. CFCs are synthetic substances that were widely used as refrigerants, propellants, solvents, and foam-blowing agents. CFCs have high ozone depletion potential (ODP), which means they can destroy the ozone layer that protects the Earth from harmful ultraviolet radiation. The Montreal Protocol is an international treaty that aims to protect the ozone layer by phasing out the production and consumption of ozone-depleting substances. The Montreal Protocol banned the production of CFCs in 1996 for developed countries and in 2010 for developing countries¹. Reference: LEED v4 Green Associate Candidate Handbook¹, UNEP's Montreal Protocol

NEW QUESTION # 25

Which of the following does LEED promote by encouraging compact development?

- A. Historic preservation
- B. Walkability
- C. Development of new infrastructure
- D. Urban sprawl

Answer: B

Explanation:

One of the things that LEED promotes by encouraging compact development is walkability. Compact development is a form of urban planning that aims to reduce sprawl and make more efficient use of land and resources by increasing density, diversity, and connectivity of land uses⁵. Compact development can enhance walkability by creating mixed-use neighborhoods that provide a variety of destinations within walking distance, such as shops, services, workplaces, schools, parks, and transit stops. Walkability can offer multiple benefits for the environment, health, economy, and social equity. For example, walkability can reduce greenhouse gas emissions and air pollution by replacing car trips with walking or transit; improve physical and mental health by increasing physical activity and reducing stress; support local businesses and generate tax revenues by increasing foot traffic and property values; and foster social cohesion and civic engagement by creating vibrant public spaces and enhancing accessibility for all⁶. References: Compact urban development⁶; LEED v4 BD+C Reference Guide, Location and Transportation, page 15

NEW QUESTION # 26

A building owner has set a goal of reducing water use by 20% for the upcoming year. Which of the following strategies will aid in reducing indoor water demand to achieve the water reduction goal set by the owner?

- A. Collecting rainwater in cisterns
- **B. Installing dual-flush toilets**
- C. Using potable water for flush functions
- D. Installing building-level water meters

Answer: B

Explanation:

Explanation

Installing dual-flush toilets can significantly reduce indoor water demand. Dual-flush toilets have two flush options: a half flush for liquid waste and a full flush for solid waste. By using less water for liquid waste, these toilets can reduce overall water consumption by up to 30%, helping to achieve the owner's water reduction goal. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 27

Which of the following is a cause of surface water degradation?

- A. Rainwater harvesting
- **B. Expansion of impervious surfaces**
- C. Expansion of outdoor filtration systems
- D. Expansion of pervious surfaces

Answer: B

Explanation:

One of the causes of surface water degradation is the expansion of impervious surfaces. Impervious surfaces are those that do not allow water to infiltrate into the soil, such as roads, parking lots, rooftops, and sidewalks. Impervious surfaces increase the amount and speed of stormwater runoff, which can carry pollutants, sediments, nutrients, and pathogens into surface water bodies such as streams, rivers, lakes, and oceans. Impervious surfaces also reduce groundwater recharge, lower base flow in streams, increase flooding and erosion, alter stream morphology and habitat, and affect water temperature and dissolved oxygen levels². Therefore, impervious surfaces can have significant negative impacts on the quality and quantity of surface water resources. Reference: Surface Water as a cause of land degradation from dryland salinity³; What is Water Pollution?⁴

NEW QUESTION # 28

Which of the following strategies is considered an approach to land management that mimics natural systems and manages rainwater as close to the source as possible?

- **A. Low-Impact Development**
- B. Evapotranspiration
- C. Xeriscaping
- D. Passive Design

Answer: A

NEW QUESTION # 29

.....

If we waste a little bit of time, we will miss a lot of opportunities. If we miss the opportunity, we will accomplish nothing. Then, life becomes meaningless. Our LEED-Green-Associate preparation exam have taken this into account, so in order to save our customer's precious time, the experts in our company did everything they could to prepare our LEED-Green-Associate Study Materials for those who need to improve themselves quickly in a short time to pass the exam to get the LEED-Green-Associate certification.
