

Marvelous LEED-AP-Homes Torrent & Guaranteed USGBC LEED-AP-Homes Exam Success with High Pass-Rate Exam LEED-AP-Homes Labs

P.S. Free & New LEED-AP-Homes dumps are available on Google Drive shared by DumpsMaterials:
https://drive.google.com/open?id=1q8VhkdxDgpwtgQmNU9drPkA4T9_VRVTO

Our experts are well-aware of the problems of exam candidates particularly of those who can't manage to spare time to study the LEED-AP-Homes exam questions due to their heavy work pressure. Hence, our LEED-AP-Homes study materials have been developed into a simple content and language for our worthy customers all over the world. What is more, you will find there are only the keypoints in our LEED-AP-Homes learning guide.

As long as you follow the steps of our LEED-AP-Homes quiz torrent, your mastery of knowledge will be very comprehensive and you will be very familiar with the knowledge points. This will help you pass the exam more smoothly. The LEED-AP-Homes learning materials are of high quality, mainly reflected in the adoption rate. As for our LEED-AP-Homes exam question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our LEED-AP-Homes Quiz torrent based on the progress of the letter and send it to you. 99% of people who use our LEED-AP-Homes quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our LEED-AP-Homes exam question is 99%. So our product is a good choice for you. Choose our LEED-AP-Homes learning materials, you will gain a lot and lay a solid foundation for success.

Hot LEED-AP-Homes Torrent Pass Certify | Latest Exam LEED-AP-Homes Labs: LEED AP Homes (Residential) Exam

DumpsMaterials exam dumps have two version-PDF and SOFT version which will give you convenient. It is very convenient for you to use PDF real questions and answers. And you can download these materials and print it out for study at any time. The SOFT version simulates the real exam which will give you more realistic feeling. When you are faced with the real exam, you can pass USGBC LEED-AP-Homes test easily.

USGBC LEED-AP-Homes Exam Syllabus Topics:

Topic	Details
Topic 1	• Energy and Atmosphere: This section of the exam measures the skills of a Green Building Engineer. It includes evaluating the principles of energy efficiency, performance optimization, and emissions reduction in residential design, all critical to minimizing environmental impact while meeting occupant needs.

Topic 2	Materials & Resources: This section of the exam measures the skills of a Sustainability Specialist. It emphasizes the selection and management of eco-friendly materials, efficient usage of resources, and implementation of waste reduction strategies to support green residential construction.
Topic 3	Innovation: This section of the exam measures the skills of a Design Innovation Lead. It invites professionals to explore creative and exemplary strategies that surpass standard credits—such as pilot projects or pioneering sustainability solutions—demonstrating forward-thinking in residential design.
Topic 4	Location & Transportation: This section of the exam measures the skills of an Environmental Planner. It focuses on how homes integrate with their surroundings and connect to transportation networks, emphasizing sustainable siting strategies aligned with urban planning practices.
Topic 5	LEED Process: This section of the exam measures the skills of a Green Building Consultant. It covers the comprehensive framework of the LEED Homes certification process, from understanding project eligibility and roles—such as green raters and quality assurance designees—to navigating certification requirements, the LEED verification process, and documentation submission to GBCI.
Topic 6	Regional Priority Credits: This section of the exam measures the skills of a Regional Performance Advisor. It covers specific environmental credits that reflect local priorities, enabling tailored certification strategies that align with regional ecosystems or regulatory contexts.

USGBC LEED AP Homes (Residential) Exam Sample Questions (Q59-Q64):

NEW QUESTION # 59

What is the purpose of Regional Priority Credits under the LEED for Homes v4 Rating System?

- A. To equalize credit requirements in all locations
- B. To identify difficult credit requirements, based on location
- **C. To enhance the ability of LEED project teams to address critical environmental issues for the project's location**
- D. To provide additional points to projects depending on the building type

Answer: C

Explanation:

The LEED for Homes Rating System (v4) includes Regional Priority (RP) Credits to incentivize projects to address environmental issues that are particularly critical in their specific geographic region.

According to the LEED Reference Guide for Homes Design and Construction (v4):

Regional Priority Credits (1-4 points)

The purpose of Regional Priority Credits is to enhance the ability of LEED project teams to address critical environmental issues specific to the project's location, such as water scarcity or habitat restoration, by providing bonus points for achieving designated credits that align with regional priorities.

Source: LEED Reference Guide for Homes Design and Construction, v4, Regional Priority Credits, p. 190.

The LEED v4.1 Residential BD+C rating system confirms:

Regional Priority Credits

RP Credits encourage projects to prioritize credits that address location-specific environmental challenges, offering up to four bonus points based on the project's ZIP code or region.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is to enhance the ability of LEED project teams to address critical environmental issues for the project's location (Option D), as this reflects the intent of RP credits to focus on regional environmental priorities.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, Regional Priority Credits, p. 190.

B). To equalize credit requirements in all locations: RP credits incentivize, not equalize, location-specific priorities. Reference: LEED Reference Guide for Homes Design and Construction, v4, Regional Priority Credits, p. 190.

C). To identify difficult credit requirements, based on location: RP credits focus on environmental importance, not difficulty. Reference: LEED Reference Guide for Homes Design and Construction, v4, Regional Priority Credits, p. 190.

The LEED AP Homes Candidate Handbook emphasizes RP credits and their regional focus, referencing the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of regional priorities.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Regional Priority Credits, p.

190.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming RP credit purpose.

NEW QUESTION # 60

Which of the following power needs requires special consideration at the design phase?

- A. ENERGY STAR appliances
- **B. Electric vehicle charging station**
- C. Continuously operating bathroom fans
- D. 220-volt supply to laundry room

Answer: B

Explanation:

The LEED for Homes Rating System (v4) encourages planning for energy-efficient and sustainable technologies during the design phase, particularly for significant electrical loads that impact infrastructure, as addressed in credits like Energy and Atmosphere (EA) Credit: Optimize Energy Performance.

According to the LEED Reference Guide for Homes Design and Construction (v4):

EA Credit: Optimize Energy Performance

Design the home to accommodate high-efficiency systems and emerging technologies, such as electric vehicle (EV) charging stations, which require dedicated electrical capacity (e.g., 240-volt circuits) and planning during the design phase to ensure adequate panel capacity and conduit placement.

Source: LEED Reference Guide for Homes Design and Construction, v4, Energy and Atmosphere Credit:

Optimize Energy Performance, p. 118.

The LEED v4.1 Residential BD+C Rating system confirms:

EA Credit: Optimize Energy Performance

Electric vehicle charging stations require special consideration in the design phase, including dedicated circuits and infrastructure to support high-voltage, high-amperage loads, ensuring future scalability and energy efficiency.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

An electric vehicle charging station (Option D) requires special consideration during the design phase due to its high power demand (typically 240 volts, 30-50 amps), necessitating dedicated circuits, panel capacity upgrades, and potential conduit or wiring planning to avoid costly retrofits.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, EQ Credit: Enhanced Ventilation, p. 146.

B). 220-volt supply to laundry room: While a 220-volt circuit is common for dryers, it is standard in residential design and does not require special consideration beyond typical electrical planning. Reference: No specific LEED requirement for laundry circuits.

C). ENERGY STAR appliances: These focus on efficiency and do not require unique electrical infrastructure beyond standard outlets. Reference: LEED Reference Guide for Homes Design and Construction, v4, EA Credit: High-Efficiency Appliances, p. 136.

The LEED AP Homes Candidate Handbook emphasizes EA credits, including energy-efficient design, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of EV charging considerations.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Energy and Atmosphere Credit: Optimize Energy Performance, p. 118.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming EV charging design needs.

NEW QUESTION # 61

One strategy to help achieve Location and Transportation Credit: Community Resources in a multi-family building is to provide:

- A. Shared parking with an adjacent single-family development
- **B. Retail on the street level of the development**
- C. Additional parking for adjacent retail developments
- D. Shuttle service for the residents to their places of employment

Answer: B

Explanation:

The LEED for Homes Rating System (v4) includes the Location and Transportation (LT) Credit:

Community Resources and Services, which awards points for locating a project near or integrating community services to reduce transportation needs, particularly in multi-family buildings.

According to the LEED Reference Guide for Homes Design and Construction (v4):

LT Credit: Community Resources and Services (1-2 points)

In multi-family buildings, provide access to community services (e.g., retail, grocery, pharmacy) within the development or within 1/4 mile (0.4 km) walking distance. Including retail on the street level of the development contributes to earning points by enhancing access to services for residents.

Source: LEED Reference Guide for Homes Design and Construction, v4, Location and Transportation Credit: Community Resources and Services, p. 56.

The LEED v4.1 Residential BD+C rating system confirms:

LT Credit: Community Resources and Services

Providing retail on the street level of a multi-family building qualifies as a strategy to meet the credit by integrating community resources directly within the project, reducing resident travel.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is retail on the street level of the development (Option B), as this directly enhances access to community services, contributing to the credit's requirements.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, LT Credit: Compact Development, p. 57.

C). Additional parking for adjacent retail developments: This does not enhance resident access to services within the project or nearby. Reference: LEED Reference Guide for Homes Design and Construction, v4, LT Credit: Community Resources and Services, p. 56.

D). Shuttle service for the residents to their places of employment: Shuttle services may support LT Credit: Access to Quality Transit, but not Community Resources and Services. Reference: LEED Reference Guide for Homes Design and Construction, v4, LT Credit: Access to Quality Transit, p. 58.

The LEED AP Homes Candidate Handbook emphasizes LT credits, including Community Resources and Services, and references the LEED Reference Guide for Homes Design and Construction as a key resource.

The exam is based on LEED v4, ensuring the relevance of retail integration.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Location and Transportation Credit: Community Resources and Services, p. 56.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming community resources strategies.

NEW QUESTION # 62

For a typical single-family home, plumbing fixtures may account for what fraction of the home's total indoor water use?

- **A. 2/3**
- B. 1/3
- C. 1/2
- D. 3/4

Answer: A

Explanation:

The LEED for Homes Rating System (v4) addresses indoor water use in the Water Efficiency (WE) Credit:

Indoor Water Use, which focuses on reducing water consumption through efficient plumbing fixtures (e.g., toilets, faucets, showerheads). Understanding the contribution of fixtures to total indoor water use is key to this credit.

According to the LEED Reference Guide for Homes Design and Construction (v4):

WE Credit: Indoor Water Use (1-6 points)

In a typical single-family home, plumbing fixtures (toilets, showerheads, and faucets) account for approximately two-thirds (2/3) of total indoor water use. Installing high-efficiency fixtures can significantly reduce water consumption.

Source: LEED Reference Guide for Homes Design and Construction, v4, Water Efficiency Credit: Indoor Water Use, p. 96.

The LEED v4.1 Residential BD+C rating system confirms:

WE Credit: Indoor Water Use

Plumbing fixtures typically represent about 2/3 of indoor water use in single-family homes, making their efficiency critical for achieving water savings.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is 2/3 (Option C), as plumbing fixtures account for approximately two-thirds of a typical single-family home's indoor water use.

Why not the other options?

* A. 1/3: This underestimates the contribution of plumbing fixtures, which are the primary indoor water users.

* B. 1/2: This is closer but still underestimates the typical proportion (2/3).

Reference: LEED Reference Guide for Homes Design and Construction, v4, WE Credit: Indoor Water Use, p. 96.

The LEED AP Homes Candidate Handbook emphasizes WE credits, including indoor water use, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of the 2/3 fraction.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Water Efficiency Credit:

Indoor Water Use, p. 96.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming indoor water use proportions.

NEW QUESTION # 63

For a project to earn one point for Materials and Resources Credit, Environmentally Preferable Products, what must occur?

- A. Meet more than two or more of the criteria under Option 2: Environmentally Preferable Products
- B. Achieve more than 95% of the component by weight or volume that meets Option 2: Environmentally Preferable Products
- C. Achieve more than 95% of the component by weight or volume that meets Option 1: Local Production
- D. Meet both Option 1: Local Production and Option 2: Environmentally Preferable Products

Answer: A

Explanation:

The LEED for Homes Rating System (v4) outlines the requirements for the Materials and Resources (MR) Credit: Environmentally Preferable Products, which encourages the use of sustainable materials. The credit has two options: Option 1: Local Production (materials sourced within 100 miles) and Option 2:

Environmentally Preferable Products (materials with attributes like recycled content, FSC-certified wood, or low emissions).

According to the LEED Reference Guide for Homes Design and Construction (v4):

MR Credit: Environmentally Preferable Products (1-4 points)

Earn points by meeting the following:

* Option 2: Environmentally Preferable Products: Use products that meet one or more of the following criteria for at least 25% (1 point), 50% (2 points), or 90% (3-4 points) by cost of the total materials:

* Recycled content

* FSC-certified wood

* Bio-based materials

* Low-emission products (e.g., low-VOC paints) To earn 1 point, at least 25% of the materials (by cost) must meet two or more of these criteria. Source: LEED Reference Guide for Homes Design and Construction, v4, Materials and Resources Credit:

Environmentally Preferable Products, p. 160-161.

The LEED v4.1 Residential BD+C rating system confirms:

MR Credit: Environmentally Preferable Products

For 1 point, use products that meet two or more environmentally preferable criteria (e.g., recycled content, FSC-certified) for at least 25% of the total material cost.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

To earn one point under Option 2, the project must use materials that collectively meet two or more of the environmentally preferable criteria (e.g., a product with both recycled content and low emissions) for at least 25% of the total material cost. This makes Option B the correct answer.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit: Environmentally Preferable Products, p. 161.

C). Achieve more than 95% of the component by weight or volume that meets Option 1: Local Production: Option 1 focuses on local production (within 100 miles), not environmentally preferable attributes, and uses cost, not weight or volume. It is a separate compliance path. Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit: Environmentally Preferable Products, p. 160.

D). Meet both Option 1: Local Production and Option 2: Environmentally Preferable Products: The credit allows projects to pursue either Option 1 or Option 2 independently. Meeting both is not required for one point. Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit:

Environmentally Preferable Products, p. 160.

The LEED AP Homes Candidate Handbook emphasizes MR credits, including Environmentally Preferable Products, and references the LEED Reference Guide for Homes Design and Construction as a key resource.

The exam is based on LEED v4, ensuring the relevance of Option 2's criteria.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Materials and Resources Credit: Environmentally Preferable Products, p. 160-161.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming criteria for one point.

NEW QUESTION # 64

.....

Our company was built in 2008 since all our education experts have more than ten years' experience in LEED-AP-Homes guide torrent. The most important characters we pay attention on are our quality and pass rate. We devote ourselves to improve passing rate constantly and service satisfaction degree of our LEED-AP-Homes training guide. And now you can find the data provided from our loyal customers that our pass rate of LEED-AP-Homes learning guide is more than 98%. You will successfully pass your LEED-AP-Homes exam for sure.
