SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q59-Q64):

NEW QUESTION # 59

What defines the organizational entities that are required in SAP Central Business Configuration? Note: There are 2 correct answers to this question.

- A. The selected scope
- B. System consistency checks
- C. The selected deployment target
- D. Added partner content

Answer: A,B

NEW QUESTION # 60

Which of the following are examples of indirect digital access? Note: There are 2 correct answers to this question.

- A. A Production Order created through a non-SAP front-end
- B. An unattended bot in SAP Build Process Automation
- C. A Defect document created through an industry application
- D. A Time Sheet Record from a 3rd party application

Answer: C,D

Explanation:

Indirect digital access occurs when humans, devices, or systems use the digital core indirectly through non- SAP intermediary software, such as a non-SAP front end, a custom-solution, or any other non-SAP application1. Indirect digital access is measured by the number of documents created, updated, or deleted in the SAP system as a result of the indirect use2. Examples of indirect digital access include:

* A Defect document created through an industry application: This is an example of indirect digital access because the industry application is a non-SAP software that triggers the creation of a document in the SAP system.

* A Time Sheet Record from a 3rd party application: This is also an example of indirect digital access because the 3rd party application is a non-SAP software that triggers the creation of a document in the SAP system.

* An unattended bot in SAP Build Process Automation: This is not an example of indirect digital access because the bot is using SAP software to access the SAP system directly, not through a non-SAP intermediary software.

* A Production Order created through a non-SAP front-end: This is not an example of indirect digital access because the production

order is not a document type that is counted for indirect digital access. The document types that are counted are: Sales Order, Invoice, Purchase Order, Service and Maintenance Document, Manufacturing Document, Quality Management Document, Time Sheet, Financial Document, and Material Document². Answer: C

NEW QUESTION # 63

How can you define the relationship between business roles and business catalogs?

- A. A business catalog restricts access to one or more business roles.
- B. A business catalog is a collection of one or more business roles.
- **C. A business role is a collection of one or more business catalogs.**
- D. A business role restricts access to one or more business catalogs.

Answer: C

Explanation:

A business role is assigned to a business user to provide access to business tasks. A business role can contain one or more business catalogs, which are predefined by SAP and contain the actual authorizations that allow users to access the apps contained in the catalog. Each business catalog bundles authorizations for a specific business area. You can tailor the access according to the needs of the business and for compliance purposes using restrictions.
