Our 712-50 exam material is full of useful knowledge, which can strengthen your capacity for work. As we all know, it is important to work efficiently. So once you have done your work excellently, you will soon get promotion. You need to be responsible for your career development. The assistance of our 712-50 Guide question dumps are beyond your imagination. You will regret if you throw away the good products.

The EC-Council Certified CISO (CCISO) is a professional certification program that is designed to recognize individuals who have demonstrated their proficiency and expertise in the field of information security. EC-Council Certified CISO (CCISO) certification program is offered by the EC-COUNCIL and is the first of its kind in the industry. The CCISO certification is globally recognized and is targeted at professionals who are responsible for overseeing the information security operations of an organization.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q414-Q419):

NEW QUESTION # 414

A business unit within your organization intends to deploy a new technology in a manner that places it in violation of existing information security standards. What immediate action should the information security manager take?

- A. Permit a 90-day window to see if an issue occurs and then amend the standard if there are no issues.
- B. Amend the standard to permit the deployment.
- C. If the risks associated with that technology are not already identified, perform a risk analysis to quantify the risk, and allow the business unit to proceed based on the identified risk level.
- D. Enforce the existing security standards and do not allow the deployment of the new technology.

Answer: C

NEW QUESTION # 415

What role should the CISO play in properly scoping a PCI environment?

- A. Work with a Qualified Security Assessor (QSA) to determine the scope of the PCI environment
- **B. Ensure internal scope validation is completed and that an assessment has been done to discover all credit card data**
- C. Complete the self-assessment questionnaire and work with an Approved Scanning Vendor (ASV) to determine scope
- D. Validate the business units' suggestions as to what should be included in the scoping process

Answer: B

Explanation:

Role of the CISO in PCI Scoping:

* The CISO is responsible for ensuring that all credit card data locations are identified and properly assessed during the scoping process. This includes internal validation to confirm scope accuracy.

Compliance Assurance:

* Thorough scope validation is crucial for meeting PCI DSS requirements and avoiding compliance gaps.

Supporting Reference:

* CCISO materials identify the CISO's role as pivotal in scoping PCI environments to ensure all relevant systems and processes are accounted for.

NEW QUESTION # 416

Scenario: As you begin to develop the program for your organization, you assess the corporate culture and determine that there is a pervasive opinion that the security program only slows things down and limits the performance of the "real workers."

Which group of people should be consulted when developing your security program?

- **A. All of the above**
- B. Executive Management
- C. Peers
- D. End Users

Answer: A

NEW QUESTION # 417

You are the CISO of a commercial social media organization. The leadership wants to rapidly create new methods of sharing customer data through creative linkages with mobile devices. You have voiced concern about privacy regulations but the velocity of the business is given priority. Which of the following BEST describes this organization?

- A. Risk averse
- **B. Risk tolerant**
- C. Risk minimal
- D. Risk conditional

Answer: B

Explanation:

* A risk-tolerant organization is willing to accept higher levels of risk to achieve strategic objectives, such as rapid innovation or aggressive market positioning.

* In this scenario, the organization prioritizes business velocity and innovation over concerns about compliance with privacy regulations, demonstrating a tolerance for potential risks.

Why Other Options Are Incorrect:

* A. Risk averse: A risk-averse organization would avoid actions that increase exposure to privacy regulations.

* C. Risk conditional: This would apply if the organization only accepted risks under specific conditions or constraints, which is not evident here.

* D. Risk minimal: A risk-minimal organization would take steps to limit risks significantly, contrary to prioritizing business velocity over privacy.

EC-Council CISO Reference: The program emphasizes understanding an organization's risk tolerance as part of effective risk
