Testking HPE6-A85 Exam Questions & Best HPE6-A85 Practice

Free4Dump can satisfy the fundamental demands of candidates with concise layout and illegible outline of our HPE6-A85 exam questions. We have three versions of HPE6-A85 study materials: the PDF, the Software and APP online and they are made for different habits and preference of you, Our PDF version of HPE6-A85 Practice Engine is suitable for reading and printing requests. And i love this version most also because that it is easy to take with and convenient to make notes on it.

HP Aruba Campus Access Associate Exam Sample Questions (Q60-Q65):

NEW QUESTION # 60

Which Protocol Data Unit (PDU) represents the data link layer PDU?

- A. PDU2 - Frame
- B. PDU3 - Packet
- C. PDU1 - Signal
- D. PDU4 - Segment

Answer: A

Explanation:

A frame is the data link layer PDU that encapsulates the network layer PDU (packet) with a header and a trailer that contain information such as source and destination MAC addresses, frame type, error detection, etc. A frame is transmitted over a physical medium such as Ethernet, Wi-Fi, etc. References: https://www.arubanetworks.com/techdocs/ArubaOS_86_Web_Help/Content/arubaos-solutions/1-overview/networking-basics.htm

NEW QUESTION # 61

When using Aruba Central what can identify recommended steps to resolve network health issues and allows you to share detailed information with support personnel?

- A. Audit Trail
- B. OAIOps
- C. Overview Dashboard
- D. Alerts and Events

Answer: B

Explanation:

Explanation

OAIOps is a feature of Aruba Central that uses artificial intelligence and machine learning to identify recommended steps to resolve network health issues and allows you to share detailed information with support personnel. OAIOps provides insights into network performance, root cause analysis, anomaly detection, proactive alerts, and automated remediation actions. OAIOps also integrates with Aruba User Experience Insight (UXI) sensors to measure and improve user experience across wired and wireless networks.

NEW QUESTION # 62

Match the most cost-effective option for cabling each requirement. (All lengths indicate total cable length including patch cable(s), service loops, etc. where used.)

OPTION	REQUIREMENT
Cat 5e cable	100 Gb connection with a length of 10' (3M) between two switches in the data center
Cat 6a cable	1 Gb connection with a length of 100' (30M) between an edge switch and a user desktop
Direct Attach Copper (DAC) cable	10 Gb connection with a length of 200' (60M) between the distribution switch in the main wiring closet and the edge switch in a remote wiring closet
multimode fiber	1 Gb connection with a length of 2km between two switches in different buildings
single mode fiber	

Answer:

Explanation:

OPTION		REQUIREMENT
Cat 5e cable	single mode fiber	100 Gb connection with a length of 10' (3M) between two switches in the data center
Cat 6a cable	Cat 6a cable	1 Gb connection with a length of 100' (30M) between an edge switch and a user desktop
Direct Attach Copper (DAC) cable	Direct Attach Copper (DAC) cable	10 Gb connection with a length of 200' (60M) between the distribution switch in the main wiring closet and the edge switch in a remote wiring closet
multimode fiber	multimode fiber	1 Gb connection with a length of 2km between two switches in different buildings
single mode fiber		

NEW QUESTION # 63

What is a weakness introduced into the WLAN environment when WPA2-Personal is used for security?

- A. The Pairwise Temporal Key (PTK) is specific to each session
- B. It uses X 509 certificates generated by a Certification Authority
- **C. The Pairwise Master Key (PMK) is shared by all users**
- D. It does not use the WPA 4-Way Handshake

Answer: C

Explanation:

The weakness introduced into WLAN environment when WPA2-Personal is used for security is that PMK Pairwise Master Key (PMK) is a key that is derived from PSK Pre-shared Key (PSK) is a key that is shared between two parties before communication begins, which are both fixed. This means that all users who know PSK can generate PMK without any authentication process. This also means that if PSK or PMK are compromised by an attacker, they can be used to decrypt all traffic encrypted with PTK. Pairwise Temporal Key (PTK) is a key that is derived from PMK, ANonce Authenticator Nonce (ANonce) is a random number generated by an authenticator (a device that controls access to network resources, such as an AP), SNonce Supplicant Nonce (SNonce) is a random number generated by supplicant (a device that wants to access network resources, such as an STA), AA Authenticator Address (AA) is MAC address of authenticator, SA Supplicant Address (SA) is MAC address of supplicant using Pseudo-Random Function (PRF). PTK consists of four subkeys: KCK Key Confirmation Key (KCK) is used for message integrity check, KEK Key Encryption Key (KEK) is used for encryption key distribution, TK Temporal Key (TK) is used for data encryption, MIC Message Integrity Code (MIC) key. .

The other options are not weaknesses because:

It uses X 509 certificates generated by a Certification Authority: This option is false because WPA2-Personal does not use X 509 certificates or Certification Authority for authentication. X 509 certificates and Certification Authority are used in WPA2-Enterprise mode, which uses 802.1X and EAP Extensible Authentication Protocol (EAP) is an authentication framework that provides support for multiple authentication methods, such as passwords, certificates, tokens, or biometrics. EAP is used in wireless networks and point-to-point connections to provide secure authentication between a supplicant (a device that wants to access the network) and an authentication server (a device that verifies the credentials of the supplicant). for user authentication with a RADIUS server Remote Authentication Dial-In User Service (RADIUS) is a network protocol that provides centralized authentication, authorization, and accounting (AAA) management for users who connect and use a network service .

The Pairwise Temporal Key (PTK) is specific to each session: This option is false because PTK being specific to each session is not a weakness but a strength of WPA2-Personal. PTK being specific to each session means that it changes periodically during communication based on time or number of packets transmitted. This prevents replay attacks and increases security of data encryption.

It does not use the WPA 4-Way Handshake: This option is false because WPA2-Personal does use the WPA 4-Way Handshake for key negotiation. The WPA 4-Way Handshake is a process that allows the station and the access point to exchange ANonce and SNonce and derive PTK from PMK. The WPA 4-Way Handshake also allows the station and the access point to verify each other's PMK and confirm the installation of PTK.

NEW QUESTION # 64

What can be done to dynamically set the PoE Priority on a switch port when deploying IP cameras APs. and other PoE devices?

- A. Configure PoE power management to Class-based Mode
- B. Enable Quick PoE on the switch modules
- **C. Enable profiling for device provisioning**
- D. Configure PoE power management to Dynamic Mode

Answer: C

Explanation:

Profiling is a feature that allows Aruba switches to automatically identify and classify devices connected to them based on various attributes such as MAC address, DHCP options, LLDP information, etc. Profiling can be used to dynamically set the PoE priority on a switch port based on the device type and power requirements. For example, an IP camera may have a higher PoE priority than a printer or a PC. Profiling can also be used to apply other configuration settings such as VLANs, ACLs, QoS, etc. based on the device profile. Reference: https://www.arubanetworks.com/techdocs/ArubaOS_86_Web_Help/Content/arubaos-solutions/1-overview/profiling.htm

NEW QUESTION # 65

.....

You will have a sense of achievements when you finish learning our HPE6-A85 study materials. During your practice of the HPE6-A85 preparation guide, you will gradually change your passive outlook and become hopeful for life. We strongly advise you to have a brave attempt. You will never enjoy life if you always stay in your comfort zone. And our HPE6-A85 Exam Questions will help you realize your dream and make it come true.

Testking HPE6-A85 Exam Questions: <https://www.free4dump.com/HPE6-A85-braindumps-torrent.html>

HP HPE6-A85 Lab Questions Every day thousands of people browser our websites to select study materials, HP HPE6-A85 Lab Questions And have you found any useful study materials for the IT exam, According to the new trend, experts said certificate obsession has been developed during the past ten years and continue to be an indispensable part to the workers, so experts have observed the changes and updates happened in this area frequently and add the new contents into the HPE6-A85 : Aruba Campus Access Associate Exam test training pdf every year, In the meantime, all your legal rights will be guaranteed after buying our HPE6-A85 study materials.

He's since moved to London and earned his MA in creative writing, The transaction HPE6-A85 coordinator sends a commit request command to all databases, Every day thousands of people browser our websites to select study materials.

2025 The Best HPE6-A85 – 100% Free Lab Questions | Testking Aruba Campus Access Associate Exam Exam Questions

And have you found any useful study materials for the IT exam, According Reliable Study HPE6-A85 Questions to the new trend, experts said certificate obsession has been developed during the past ten years and continue to be an indispensable part to the workers, so experts have observed the changes and updates happened in this area frequently and add the new contents into the HPE6-A85 : Aruba Campus Access Associate Exam test training pdf every year.

In the meantime, all your legal rights will be guaranteed after buying our HPE6-A85 study materials, Plus, with our wide range of HP HPE6-A85 exam questions types and difficulty levels, you can tailor your HPE6-A85 exam practice to your needs.
