SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q44-Q49):

NEW QUESTION # 44

You create a report page and want to change the grid column width and grid row height of the Page Designer.

Where can you do this?

- A. Validate page
- B. Edit Query
- **C. Edit designer properties**
- D. Edit page properties

Answer: C

Explanation:

* Page Designer Configuration

* In SAP SuccessFactors, grid column widths and row heights are part of the designer's layout properties. These settings are configured in the designer properties of the page.

* Why Other Options are Incorrect

* A (Edit Page Properties): This is used for general page settings, not specific grid layout adjustments.

* B (Edit Query): Query settings pertain to data retrieval, not layout.

* D (Validate Page): Validation checks for errors but does not allow layout adjustments.

NEW QUESTION # 45

When you share a canvas report, from where can the user access that report? Note: There are 2 correct answers to this question.

- A. Home Page
- B. Metrics Panel
- **C. Report Center**
- **D. Reporting Menu**

Answer: C,D

Explanation:

* Reporting Menu (A):

* Users can access shared canvas reports directly from the Reporting Menu in SAP SuccessFactors.

* Report Center (D):

* The primary location for managing and accessing all types of reports, including shared canvas reports, is the Report Center.

NEW QUESTION # 46

Which tool can you use to upload a report from the test instance to the production instance? Note: There are 2 correct answers to this question.

- A. Report Distributor
- **B. Report Transfer**
- **C. Report Center**
- D. SFTP Configuration

Answer: B,C

Explanation:

* Report Transfer (A):

* The Report Transfer tool is specifically designed to move reports from one instance (test) to another (production).

* Report Center (D):

* Reports can also be exported and imported manually using the Report Center if the report type supports it.

NEW QUESTION # 47

A table report is shared with a user. That user CANNOT see the table report in the Report Center list. Which role-based permission has NOT been set correctly for this user?

- **A. Run Report access to the domain**

- B. Access to Insights
- C. Create Report access to the domain
- D. Ability to manage Tiles and Dashboards

Answer: A

Explanation:

When a user cannot see a table report in the Report Center list, the issue typically stems from insufficient role- based permissions (RBP) granted to the user for accessing reports in that domain. Specifically:

* Understand Role-Based Permissions (RBP):

* In SAP SuccessFactors, reports and analytics visibility is governed by RBP settings. These settings ensure that users only see the reports and data they are authorized to access.

* Permissions are categorized into domains such as "Employee Central," "Performance Management," etc.

* Key Permissions for Reports in the Report Center: To view or run reports in Report Center, users need:

* Run Report Access: This allows users to execute reports for domains they are permitted to access.

* Create Report Access: This enables users to create or modify reports.

* Manage Tiles and Dashboards Access: This is necessary for interacting with dashboards and tiles, not table reports specifically.

* Access to Insights: This refers to viewing analytic insights and does not directly impact table report visibility.

* Diagnosing the Issue:

* The given scenario describes a user being unable to view a shared table report.

* The most likely cause is the absence of Run Report access to the domain associated with the table report.

* Without this permission, the system restricts the user from running or even viewing the report, even if it has been shared with them.

* Steps to Resolve:

* Navigate to Admin Center # Manage Permission Roles.

* Select the permission role assigned to the user in question.

* Click Permissions # Reports Permissions.

* Verify that the Run Report Permission is granted for the specific domain associated with the shared report.

* If not, enable this permission and save the changes.

* Test Access:

* After updating the permissions, the user should be able to view the table report in the Report Center.

* SAP SuccessFactors Help Portal: Role-Based Permissions

* SAP SuccessFactors People Analytics Reporting Guide (Latest Release): Check for details on report permissions and their implications.

* SAP KBA 2461114: Troubleshooting Report Center permissions.

* Learning Path: SAP Open Learning on SuccessFactors RBP and Analytics (openSAP).

Step-by-Step Analysis: References and Documentation: This explanation ensures that the resolution is precise, supported by standard SAP practices, and verifiable through official SAP documentation.

NEW QUESTION # 48

You are using a pivot table in your canvas report but the report does NOT display the most recent data. What could be the reason?

- A. You are using a wrong People Scope.
- **B. You are using a query with a static date filter.**
- C. You are NOT using a template.
- D. You are using the percent of total option.

Answer: B

Explanation:

* Issue with Static Date Filters:

* If the query uses a static date filter (e.g., a specific range like "January 1, 2023, to March 31,

2023"), the report will not reflect the most recent data as the filter restricts results to the defined date range.

* Resolution:

* Update the query to use dynamic date filters (e.g., "Last 30 Days" or "Current Year") to ensure the pivot table includes the latest data.
