Packing dimension					
Storage dimension					
Tracking dimension					
Product dimension					

Explanation:

Box 1: Product dimension

There are five product dimensions: color, configuration, size, style, and version.

Box 2: Product variant

Product variants are also referred to as items. An item is a tangible product, which isn't the same as a service.

A product variant can be generated based on the product dimension values.

Example

A company sells denim jeans. The item, Jeans, uses the color and size product dimensions. The jeans are sold in three different colors and six different sizes. The colors are blue, black, and brown. The sizes are XS, S, M, L, XL, and XXL. Not all sizes are available in all three colors. If all combinations were available, there would be 18 different types of jeans. However, in this example, only the following nine product variant combinations are produced.

Table Description automatically generated

Color	Size
Blue	XS
Blue	S
Blue	M
Black	M
Black	L
Black	XL
Brown	L
Brown	XL
Brown	XXL

Box 3: Tracking dimension

Scenario: If products in the warehouse must be blocked from transactions for a specific reason, such as a health and safety review, warehouse users should be able to block the products quickly from the ERP system.

NEW QUESTION # 323

A company plans to make changes to change management processes for purchase orders.

Currently, the system requires an approval for any change. The company wants to implement re-approval only when there is a change to the quantity or the unit price in a purchase order.

You need to configure the change management process to require re-approval only on changes to quantity and unit price.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Select re-evaluation fields (quantity and price) and add to the policy rule	
Create a new purchasing policy or edit an existing one	
Select re-approval rule for purchase orders policy and create a new policy rule	

Answer:

Explanation:

Actions	Answer Area
Select re-evaluation fields (quantity and price) and add to the policy rule	Create a new purchasing policy or edit an existing one
Create a new purchasing policy or edit an existing one	Select re-approval rule for purchase orders policy and create a new policy rule
Select re-approval rule for purchase orders policy and create a new policy rule	Select re-evaluation fields (quantity and price) and add to the policy rule
