## First-grade Microsoft MB-335 Actual Exam Dumps - MB-335 Free Download

Candidates who don't find actual MB-335 Questions remain unsuccessful in the Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) test and lose their resources. That's why TrainingDump is offering real Microsoft MB-335 Questions that are real and can save you from wasting time and money. Hundreds of applicants have studied successfully from our MB-335 latest questions in one go.

## Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q18-Q23):

### NEW QUESTION # 18

You need to meet the requirements for User2.  
What should you configure?

- A. Create a movement journal.

- B. Process over/under transactions.
- C. Create a transfer journal.
- D. Correct the product receipt.
- E. Cancel the product receipt.

**Answer: B**

Explanation:

Topic 5, A Datum Corporation Background

A Datum Corporation is a golf cart manufacturing and rental company. The company produces golf carts, converts them to assets, and then rents them out over a period of time. The engineering team continuously seeks to create innovative, sustainable golf carts to stay current in the industry.

Although the company no longer creates gas-powered vehicles, some of its models are still in use as rentals.

A Datum Corporation plans to move from multiple, disconnected systems for each team of employees to a connected platform that uses Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

Current Environment

Employee teams

\* A Datum Corporation has four key teams of employees:

- o Procurement: A team of buyers who source raw materials for the production of the golf carts.
- o Engineering: A team of engineering designers who continuously modify and improve the bill of materials (BOM) for the golf carts.
- o Production: A team of production employees, including quality assurance (QA), who manages the BOM costs and work on the shop floor to produce the golf carts
- o Asset Management: A team that manages the golf cart assets, including maintenance and repairs.

\* The company has strict controls and uses engineering change management within its end-to-end operations.

Golf cart models

\* All new golf carts are rechargeable electric models.

\* The company has three primary golf cart models:

o ModelA is manufactured for commercial customers, such as golf courses. Those golf courses rent ModelA for a fixed period of time.

o ModelA contains subassemblies that are produced by A. Datum Corporation and stored in the warehouse until required for production.

o ModelB is manufactured for consumers and can be rented by vacationers, typically for a weekend.

o ModelB must include turn signals and brake lights to ensure that it is legal to drive on city streets.

o ModelB golf carts are typically stored in a rented parking lot during peak vacation season.

o During the off-season, ModelB is stored in A. Datum Corporation's headquarters warehouse

o ModelT units are gas-powered units that have been discontinued for production, however, existing assets are available for rent.

\* All models are considered low-speed vehicles and must not exceed 25 mph.

\* All golf cart models are owned by A. Datum Corporation. None are owned by commercial customers.

Requirements

Engineering

\* The engineering manager plans to phase out production of the current steel frames and replace them with aluminum frames.

\* Innovation engineers observe an increase in consumer requests for lifted-style golf carts. ModelB will be used to create a prototype of a newer version.

Production

\* Golf cart frames for all models must be configured as subassemblies.

\* The engineering team plans for the lift kit shocks and struts to be assembled for the prototype as a single production order for the lift kit finished good. The lift kit will remain at the end of the assembly line for the prototype.

\* The QA team must conduct a rigorous set of mandatory tests for the ModelB prototype. Only certified QA team members can complete the checklists. The item will not be available for production until the prototype passes testing.

\* The lithium batteries must be installed by a certified technician during production.

\* The raw materials used in the prototype model are also sold directly as spare parts.

\* The controller requires raw material consumption to be posted in the ledger separately for the prototype production orders.

\* The warehouse manager requires that ModelA subassemblies must have putaway work created for the warehouse workers. All other subassemblies and finished goods will not require warehouse work. The lift kit subassembly must have a new standard cost created

o Cost Requirement 1: The costs for existing materials are frozen for a period. The incremental costs must be calculated without impacting current frozen costs,

o Cost Requirement 2: The incremental cost for the subassembly must be determined based on the raw material purchased parts before it is available as a price.

Asset management

\* All electric models can be serviced on a quarterly schedule, which is less frequent than the bimonthly gas-powered models.

\* The controller requires ModelB to be repossessed separately from other models, and the location of the assets updated at each peak travel season.

\* Maintenance technicians run a lean schedule and are fully booked out in advance.

Issues Procurement.

\* Buyer 1 reports that the master planning process generated planned purchase orders for steel frame subassemblies. Return orders were created for the steel frames, which should not have been ordered.

Production

\* The production manager reports that the lithium battery installation step is creating a production backup because of two issues:

o Issue 1: Technicians who are not certified are assigned to the battery installation step.

o Issue 2: One certified technician is always on site at the production facility; the other certified technician is on call for repairs to rentals and is only substitutes for other technicians occasionally for production.

Asset management

\* A golf course manager reports that multiple ModelT units are frequently slow to start. The golf course manager requests monthly inspections for ModelT units, but the ModelA units can keep their current schedule.

\* After the ModelT unit issue was addressed, the golf course manager reports that one of the ModelA units stopped charging. The golf course manager requests a priority repair to be scheduled for the next morning.

### NEW QUESTION # 19

You need to meet the needs for the large teakwood furniture order.

What must you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement: Create production orders for User6

Production input location

Feature

- Wave template
- Release to warehouse
- Wave template
- Work template
- Fixed location
- Resource group
- Work template
- Fixed location

Answer:

Explanation:

Answer Area

Requirement: Create production orders for User6

Production input location

Feature

- Wave template
- Release to warehouse
- Wave template
- Work template
- Fixed location
- Resource group
- Work template
- Fixed location

### NEW QUESTION # 20

A company uses Dynamics 365 Supply Chain Management. Technicians travel to several facilities to complete routine maintenance on equipment.

The company recently invested in new equipment. The technicians have no experience maintaining the new equipment. The technicians must be able to perform the following activities:

\* Use apps on their mobile device to complete the maintenance.

\* Find links to any visual step-by-step instructions related to the new equipment.

You need to configure features to assist the technicians.

Which features must you configure? To answer, select the appropriate options in the answer area.

**Answer Area**

**Requirement**  
Use on a mobile device to complete maintenance.

Link visual step-by-step instructions.

**Feature**

- Asset management mobile workspace
- Asset management mobile workspace
- Dynamics 365 Remote Assist
- Warehouse management mobile app

**Functional location**

- Maintenance checklist
- Service order
- Functional location
- Maintenance plan

**Answer:**

**Explanation:**  
Answer Area

**Requirement**  
Use on a mobile device to complete maintenance.

Link visual step-by-step instructions.

**Feature**

- Asset management mobile workspace
- Asset management mobile workspace
- Dynamics 365 Remote Assist
- Warehouse management mobile app

**Functional location**

- Maintenance checklist
- Service order
- Functional location
- Maintenance plan

**Explanation:**  
Answer Area

**Requirement**  
Use on a mobile device to complete maintenance.

Link visual step-by-step instructions.

**Feature**

- Asset management mobile workspace
- Functional location

## NEW QUESTION # 21

An automobile manufacturer leases cars to companies for use as company cars.

A car leased to a company breaks down and requires repairs.

You must open a maintenance request and replace the car with an equivalent model until the original car is repaired and returned to the company. When the manufacture' receives and inspects the car, the replacement car can be released to the company.

You need to select the maintenance request components to use.

Which components should you use? To answer, drag the appropriate components to the correct assets. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

**Components**

- Asset loan
- Inbound asset
- Fixed asset lease
- Outbound asset

**Answer Area**

**Asset**

- The leased car that must be repaired
- The replacement car for the leased car

**Component**

- Inbound asset
- Outbound asset

**Answer:**

**Explanation:**

**Components**

- Asset loan
- Inbound asset
- Fixed asset lease
- Outbound asset

**Answer Area**

**Asset**

- The leased car that must be repaired
- The replacement car for the leased car

**Component**

- Inbound asset
- Outbound asset

**Explanation:**

To select the maintenance request components to use, you should use the following:

\* The leased car that must be repaired: You should use the Inbound asset component. An inbound asset is an asset that is received

from a customer or vendor for maintenance or repair<sup>1</sup>. You can use the Inbound assets page to create and manage inbound assets in Asset Management<sup>2</sup>. You can also create a maintenance request for an inbound asset and link it to a work order<sup>3</sup>.

\* The replacement car for the leased car: You should use the Outbound asset component. An outbound asset is an asset that is sent to a customer or vendor as a temporary replacement for an asset that is being maintained or repaired<sup>1</sup>. You can use the Outbound assets page to create and manage outbound assets in Asset Management. You can also link an outbound asset to an inbound asset or a work order.

1: Inbound and outbound assets 2: Inbound assets 3: Create a maintenance request for an inbound asset :  
[Outbound assets]

#### NEW QUESTION # 22

You need to create the new summer limited edition bicycle in Dynamics 365 in preparation for taking orders.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

##### Actions

|                                                             |
|-------------------------------------------------------------|
| Create a product for all the bicycles                       |
| Release the product to the three legal entities             |
| Release the product to the two legal entities               |
| Release the product variants to the selected legal entities |
| Create a product for each bicycle combination               |
| Create the BOM                                              |
| Define the configuration routes and rules                   |

##### Answer Area

**Answer:**

Explanation:

##### Answer Area

|                                               |
|-----------------------------------------------|
| Create a product for all the bicycles         |
| Release the product to the two legal entities |
| Create the BOM                                |
| Define the configuration routes and rules     |

- 1 - Create a product for all the bicycles
- 2 - Release the product to the two legal entities
- 3 - Create the BOM
- 4 - Define the configuration routes and rules
