Microsoft Dynamics 365: Finance and Operations Apps Developer free valid pdf & Microsoft MB-500 sure pass exam dumps

Applying the international recognition third party for payment for MB-500 exam cram, and if you choose us, your money and account safety can be guaranteed. And the third party will protect the interests of you. In addition, MB-500 learning materials are edited and verified by professional experts who possess the professional knowledge for the exam, and the quality can be guaranteed. We are pass guarantee and money back guarantee and if you fail to pass the exam, we will give you full refund. We provide free update for 365 days for MB-500 Exam Materials for you, so that you can know the latest information for the exam, and the update version will be sent to your email automatically.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q297-Q302):

NEW QUESTION # 297

You are a Dynamics 365 Finance developer.

You launch the Performance Timer tool to troubleshoot performance issues with a business process.

You need to view the results from the tool.

What does the tool present? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Performance Timer tool link	Data
Forms	The number of open forms and the rate at which they are opened and closed (per second). The total number of forms and the rate at which they are opened and closed (per second). The number of open forms and the rate at which they are opened and closed (per minute). The total number of forms and the rate at which they are opened and closed (per minute).
Services Session Provider	The number of open forms and the rate at which they are opened and closed (per second). The total number of forms and the rate at which they are opened and closed (per second). The number of open forms and the rate at which they are opened and closed (per minute). The total number of forms and the rate at which they are opened and closed (per minute).

Answer:

Explanation:

Performance Timer tool link	Data
Forms	The number of open forms and the rate at which they are opened and closed (per second). The total number of forms and the rate at which they are opened and closed (per second). The number of open forms and the rate at which they are opened and closed (per minute). The total number of forms and the rate at which they are opened and closed (per minute).
Services Session Provider	The number of open forms and the rate at which they are opened and closed (per second). The total number of forms and the rate at which they are opened and closed (per second). The number of open forms and the rate at which they are opened and closed (per minute). The total number of forms and the rate at which they are opened and closed (per minute).

NEW QUESTION # 298

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an enumeration named truckStatus that has the following statuses:

Empty
Loaded
Completed

You have the following code:

```
switch (trunkTable.TruckStatus)
{
    case TruckStatus::Empty:
        Info("1");
        break;
    case TruckStatus::Loaded:
        Info("2");
        break;
    case TruckStatus::Completed:
        Info("3");
        break;
}
```

You need to extend this enumeration and add the following statuses to the enumeration: Quarantine, InTransit. You must then modify code that validates the switch statement.

Solution: Add a post handler to the method that checks the enumeration and logic for your new enumeration values using a range comparison for your new values.

```
if ( truckTable.TruckStatus > TruckStatus::Completed)
{
    Info("Extended");
}
```

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 299

A company requires a change to one of the base Microsoft SQL Server Reporting Services (SSRS) reports. The report must include a new field that automatically filters the report based on the user who opens the report. You need to add the new field as specified.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Add the new field to the report.	Duplicate the existing report in an extension model. Extend the existing report in an extension model. Customize the existing report.
Automatically filter based on the user.	Use the Controller class. Use the ReportDataProvider class.

Answer:

Explanation:

Requirement
Add the new field to the report.

Action

Duplicate the existing report in an extension model.
Extend the existing report in an extension model.
Customize the existing report.

Automatically filter based on the user.

Use the Controller class.
Use the ReportDataProvider class.

Explanation

Requirement	Action
Add the new field to the report.	Duplicate the existing report in an extension model. Extend the existing report in an extension model. Customize the existing report.
Automatically filter based on the user.	Use the Controller class. Use the ReportDataProvider class.

NEW QUESTION # 300

A company is creating custom functionality to manage rentals by using Dynamics 365 Supply Chain Management. You need to create menu items for the following business processes:

- * Create new rental in a form grid.
- * View a list of all rental assets in an interactive form.
- * Create late fee charges once a week based on unreturned items.

You need to create the menu items.

Which menu item types should you use? To answer, drag the appropriate menu item types to the correct business process. Each menu item type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Menu item types	Business process	Menu item type
⋮ Action ⋮ Display ⋮ Output	Create new rentals. View all rental assets. Create late fees.	

Answer:

Explanation:

Menu item types	Business process	Menu item type
⋮ Action ⋮ Display ⋮ Output	Create new rentals. View all rental assets. Create late fees.	⋮ Display ⋮ Output ⋮ Action

Explanation:

Menu item types

☐ Action☐ Display☐ Output

Answer Area

Business process

Create new rentals.

View all rental assets.

Create late fees.

Menu item type

NEW QUESTION # 301

You have the following code:

```

[System.EntryPointAttributeRole]
class CashDiscountDP extends SRSReportDataProviderBase
{
    CashDiscountTmp cashDiscountTmp;
    [SRSReportDataSetAttribute(tableStr(CashDiscountTmp))]
    public CashDiscountTmp getCashDiscountTmp()
    {
        select cashDiscountTmp;
        return cashDiscountTmp;
    }
    public boolean processReport()
    {
        ...
    }
}

```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes

No

You can use the class as an entry point for a security privilege.

☐☐

The class allows SQL Server Reporting Services to retrieve data for the report.

☐☐

processReport() has the correct method signature.

☐☐**Answer:**

Explanation:

Statement	Yes	No
You can use the class as an entry point for a security privilege.	☒	☐
The class allows SQL Server Reporting Services to retrieve data for the report.	☒	☐
processReport() has the correct method signature.	☐	☒

Explanation:

Statement	Yes	No
You can use the class as an entry point for a security privilege.	☐	☐
The class allows SQL Server Reporting Services to retrieve data for the report.	☐	☐
processReport() has the correct method signature.	☐	☒

Box 1: Yes

Here CashDiscountDP is the name of the secure server method that is tagged with the SysEntryPointAttribute attribute.

Box 2: Yes

To define a report data provider class

An RDP class extends the SRSReportDataProviderBase class. You set the SRSReportParameterAttribute attribute to the data contract you created for the RDP class.

Box 3: No

Instead:

```
public void processReport()
```
