## MB-500 Study Test - Microsoft Dynamics 365: Finance and Operations Apps Developer Realistic Test Question Free PDF

You don't need to wait days or weeks to get your performance report. The software displays the result of the Microsoft MB-500 practice test immediately, which is an excellent way to understand which area needs more attention. Exams4sures Microsoft MB-500 exam dumps save your study and preparation time. Our experts have added hundreds of Microsoft Dynamics 365: Finance and Operations Apps Developer (MB-500) questions similar to the real exam. You can prepare for the Microsoft Dynamics 365: Finance and Operations Apps Developer (MB-500) exam dumps during your job. You don't need to visit the market or any store because Exams4sures Microsoft Dynamics 365: Finance and Operations Apps Developer (MB-500) exam questions are easily accessible from the website. You can try the Microsoft MB-500 exam dumps demo before purchasing.

## Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q19-Q24):

### NEW QUESTION # 19

A company uses Dynamics 365 Finance.

You create a new extension for a standard table.

You need to add a new method in the extension.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

Set the class as **internal**.  
 Create a new **project** in Visual Studio.  
 Add a new class to the Visual Studio project with the **\_Extension** suffix.  
 Set the class as **final**.  
 Decorate the class with the **[ExtensionOf(tableStr(TableName))]** attribute.  
 Add a new method to the class and implement it.

**Answer area**

**Answer:**

Explanation:

**Actions**

Set the class as **internal**.  
 Create a new **project** in Visual Studio.  
 Add a new class to the Visual Studio project with the **\_Extension** suffix.  
 Set the class as **final**.  
 Decorate the class with the **[ExtensionOf(tableStr(TableName))]** attribute.  
 Add a new method to the class and implement it.

**Answer area**

1 Create a new project in Visual Studio.  
 2 Add a new class to the Visual Studio project with the **\_Extension** suffix.  
 3 Set the class as **final**.  
 4 Decorate the class with the **[ExtensionOf(tableStr(TableName))]** attribute.  
 5 Add a new method to the class and implement it.

Explanation

**Actions**

Set the class as **internal**.

**Answer area**

- 1 Create a new project in Visual Studio.
- 2 Add a new class to the Visual Studio project with the **\_Extension** suffix.
- 3 Set the class as **final**.
- 4 Decorate the class with the **[ExtensionOf(tableStr(TableName))]** attribute.
- 5 Add a new method to the class and implement it.

**NEW QUESTION # 20**

A company uses Dynamics 365 Finance. You are customizing elements for the extended data types (EDTs) shown in the following table.

EDT name	Comment
CalendarID	root EDT
CalendarName	root EDT
BasicCalendarID	derives from CalendarID

You have a Table named WorkCalendar. The table has a column named BasicCalendarID that uses the BasicCalendarID EDT. You need to increase the length of the column by using an extension.

Solution: Create a derived EDT for BasicCalendarID.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION # 21**

A company uses Dynamics 365 Supply Chain Management.

You are developing multiple integrations.

You need to select the appropriate integration models for the integrations.

Which integration model should you select? To answer, drag the appropriate data integration models to the correct requirements.

Each data integration model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Data integration models		Answer Area	Requirement	Data integration model
Custom service	Azure Data Lake integration		Users must be able to view changes in near real time in Dynamics 365 when they create or make changes to a product in an external system.	<input type="text"/>
Dual-write	OData		Update and synchronize customer information in Dynamics 365 Supply Chain Management that is created or updated in Dynamics 365 Sales.	<input type="text"/>
			Share information about the on-hand quantity of products in near real time with an external web-based e-commerce application that supports the SOAP protocol.	<input type="text"/>

**Answer:**

**Explanation:**

Data integration models		Answer Area	Requirement	Data integration model
Custom service	Azure Data Lake integration		Users must be able to view changes in near real time in Dynamics 365 when they create or make changes to a product in an external system.	<input type="text"/>
Dual-write	OData		Update and synchronize customer information in Dynamics 365 Supply Chain Management that is created or updated in Dynamics 365 Sales.	<input type="text"/>
			Share information about the on-hand quantity of products in near real time with an external web-based e-commerce application that supports the SOAP protocol.	<input type="text"/>

## NEW QUESTION # 22

You have a Dynamics 365 Finance and Operations environment.

You have the following code: (Line numbers are included for reference only.)

```
01 class SalesPriceDiscount
02 {
03     ...
04     public void calculatePrice
05     {
06         ...
07     }
08     public static AmountCur getDiscount(Percent markup)
09     {
10         ...
11     }
12 }
13 [ExtensionOf(classStr(SalesPriceDiscount))]
14 final class SalesPriceDiscountMy_Extension
15 {
16     public void calculatePrice()
17     {
18         ...
19         next calculatePrice()
20     }
21 }
22 }
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Microsoft	Yes	No
The calculatePrice() method in the extension class can access and manage public and protected methods and variables of the base class.	<input type="radio"/>	<input type="radio"/>	
You can modify the calculatePrice() method in the extension class by adding conditional logic at line 20.	<input type="radio"/>	<input type="radio"/>	
The static method getDiscount() in Line 10 of the base class can be wrapped and extended by adding business logic to the extension class.	<input type="radio"/>	<input type="radio"/>	
The extension class can be instantiated by running the following code:	<input type="radio"/>	<input type="radio"/>	
<pre>SalesPriceDiscountMy_Extension myInstance = new SalesPriceDiscountMy_Extension();</pre>			

Answer:

Explanation:

Statement	Microsoft	Yes	No
The calculatePrice() method in the extension class can access and manage public and protected methods and variables of the base class.	<input checked="" type="radio"/>	<input type="radio"/>	
You can modify the calculatePrice() method in the extension class by adding conditional logic at line 20.	<input checked="" type="radio"/>	<input type="radio"/>	
The static method getDiscount() in Line 10 of the base class can be wrapped and extended by adding business logic to the extension class.	<input checked="" type="radio"/>	<input type="radio"/>	
The extension class can be instantiated by running the following code:	<input type="radio"/>	<input checked="" type="radio"/>	
<pre>SalesPriceDiscountMy_Extension myInstance = new SalesPriceDiscountMy_Extension();</pre>

### NEW QUESTION # 23

A company uses Dynamics 365 Finance.

The company requires extended data types (EDTs) that meet the following requirements:

- \* The new EDTs must use primitive base types without extending other EDTs.
- \* One type must track the day that the user receives goods in the warehouse.
- \* One type must track the quantity of items that the user receives.

You need to create the EDTs.

Which EDT types should you use? To answer, drag the appropriate types to the correct requirements. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Types

- Date
- Int
- TransDate
- Integer

Answer Area

Requirement

- Track the day
- Track the quantity

Type

- Date
- Integer

**Answer:**

Explanation:

Types

- Date
- Int
- TransDate
- Integer

Answer Area

Requirement

- Track the day
- Track the quantity

Type

- Date
- Integer

Explanation:

Types

- Date
- Int
- TransDate
- Integer

Answer Area

Requirement

- Track the day
- Track the quantity

Type

- Date
- Integer

## NEW QUESTION # 24

.....

Candidates who become Microsoft MB-500 certified demonstrate their worth in the Microsoft field. MB-500 certification is proof of their competence and skills. This is a highly sought after credential and it makes career advancement easier for the candidate. To become Microsoft MB-500 Certified, you must pass the Microsoft Dynamics 365: Finance and Operations Apps Developer (MB-500) Exam. For this task, you need actual and updated MB-500 Questions.
