| Identify affected sales orders     | Configurable business documents (CBD) |
| Weather data real-time integration | Power BI                              |

Answer:

Explanation:

| Requirement                        | Tool                                  |
|------------------------------------|---------------------------------------|
| Identify affected sales orders     | Configurable business documents (CBD) |
| Weather data real-time integration | Power BI                              |

Explanation:

| Requirement                        | Tool                                  |
|------------------------------------|---------------------------------------|
| Identify affected sales orders     | Configurable business documents (CBD) |
| Weather data real-time integration | Power BI                              |

Explanation:

Box 1: Configurable business documents (CBD)

One of the top pain points reported by customers is the absence of a business user experience to customize printable business documents. By using Microsoft Office-based templates, we provide customers with predefined documents in the most familiar tools available in the market to customize business documents.

This also opens the door to create a marketplace around standard and regulatory business documents that are tailored for specific industries or regions not covered by Finance and Operations apps.

#### Box 2: Microsoft Power BI

A report must show seasonality and weather patterns so that Margie's Travel does not offer excursions during timeframes where severe weather is predicted.

Microsoft Power BI is a suite of business analytics tools that let you analyze data and share insights. By using Power BI tools, you can explore data and quickly create rich reports and dashboards. You and your colleagues can then use the reports interactively on many devices.

You can create high-volume, near-real-time "operational Power BI reports" by using Entity store.

Microsoft Power BI content that partners and independent software vendors (ISVs) developed can be embedded directly into the Microsoft Dynamics 365 Finance Reference: <https://docs.microsoft.com/en-us/dynamics365-release-plan/2019wave2/finance-operations-crossapp-capabilities/configurable-business-documents-reporting-word-excel>
