NEW QUESTION # 144

You need to recommend a solution to meet the requirements for the globalization features. Which feature should you recommend?

- A. Product Roadmap
- B. First release program
- C. Release validation program
- D. FastTrack program
- E. Preview early access program

Answer: B

Explanation:

Note:

* The CTO has learned that there are updates to globalization features in Dynamics 365 Finance. The IT staff has been tasked with ensuring that they are the first group to receive these updates.

* The IT department has decided not to code for globalization issues because they are in an upcoming service update. They are closing in on go-live and need to make sure that the updates are applied in time.

Service updates are continuous, touchless updates that provide new features and functionality. You are in control and manage how your organization receives these updates. For example, you can sign up for the First Release program so that your organization receives updates first. You can apply the updates to any of your environments manually (self-update) or remain on the default release schedule and receive the auto-updates when you schedule them using LCS.
