It is a popular belief that only professional experts can be the leading one to do some adept job. And similarly, only high quality and high accuracy MB-820 Exam Questions like ours can give you confidence and reliable backup to get the certificate smoothly because our experts have extracted the most frequent-tested points for your reference. Good practice materials like our Microsoft Dynamics 365 Business Central Developer study question can educate exam candidates with the most knowledge. Do not make your decisions now will be a pity for good.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q65-Q70):

NEW QUESTION # 65

You are cleaning up sandbox environments for a company.

The company requires data to be cleared from the environments each time an extension is published.

You need to configure the launch.json file.

Which schemaUpdateMode property should you set?

- A. ForceUpgrade
- B. Synchronize
- C. ForceSync
- D. Recreate

Answer: D

Explanation:

In the context of cleaning up sandbox environments for a company where data needs to be cleared each time an extension is published, the schemaUpdateMode property in the launch.json file should be set to Recreate (D). Setting this property to Recreate ensures that every time the extension is published, the existing tables and data are dropped, and then the tables are recreated based on the current extension's schema. This mode is particularly useful in development and testing environments where you need a clean slate for testing each version of the extension without the remnants of previous data affecting the outcomes. It's important to use this setting cautiously, as it results in the loss of all existing data in the tables defined by the extension, which is suitable for a sandbox environment but not for production environments.

NEW QUESTION # 66

You need to handle the removal of the Description field and the Clone procedure without breaking other extensions.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

Set the Description field as ObsoleteState = Removed; in version 2.0.0.1.

Remove the Description field in version 2.0.0.0.

Set the Clone procedure as ObsoleteState = Removed; in version 2.0.0.1.

Remove the Clone procedure in version 2.0.0.0.

Set the Clone procedure as ObsoleteState = Pending and ObsoleteReason = 'Not in use' in version 2.0.0.0.

Set the Description field as ObsoleteState = Pending and ObsoleteReason = 'Not in use' in version 2.0.0.0.

Remove the Description field from the Issue table in version 2.0.0.1.

Add the [Obsolete('xxx')] attribute to the Clone procedure in version 2.0.0.0.

Actions to handle the field and procedure removal

testbraindump.com

Microsoft

Answer:

Explanation:

Answer Area

Set the Description field as ObsoleteState = Pending and ObsoleteReason = 'Not in use' in version 2.0.0.0.

Set the Clone procedure as ObsoleteState = Pending and ObsoleteReason = 'Not in use' in version 2.0.0.0.

Remove the Description field from the Issue table in version 2.0.0.1.

- 1 - Set the Description field as ObsoleteState = Pending and ObsoleteReason = 'Not in use' in version 2.0.0.0.
- 2 - Set the Clone procedure as ObsoleteState = Pending and ObsoleteReason = 'Not in use' in version 2.0.0.0.
- 3 - Remove the Description field from the Issue table in version 2.0.0.1.

NEW QUESTION # 67

You develop a test application.

You must meet the following requirements:

- * Roll back changes to a test method after run time.
- * Run an approve action on a test page named TestPageA.

You need to implement the given requirements on the test codeunit

Which actions should you perform? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Test applications

Requirement

Roll back changes to a test method after run time.

Run an approve action on TestPageA.

Action

Set the CommitBehavior attribute to Ignore.
Set the ErrorBehavior attribute to Collect.
Set the TestIsolation property to Function.
Set the TransactionModel attribute to AutoRollBack.

Configure TestPageA.Approve.Enabled().
Configure TestPageA.Approve.Invoke().
Configure TestPageA.Approve.Visible().
Configure TestPageA.Trap().

Answer:

Explanation:

Test applications

Requirement

Roll back changes to a test method after run time.

Run an approve action on TestPageA.

Action

Set the CommitBehavior attribute to Ignore.
Set the ErrorBehavior attribute to Collect.
Set the TestIsolation property to Function.
Set the TransactionModel attribute to AutoRollBack.

Configure TestPageA.Approve.Enabled().
Configure TestPageA.Approve.Invoke().
Configure TestPageA.Approve.Visible().
Configure TestPageA.Trap().

Explanation:

To roll back changes to a test method after run time, you should:

- * Set the TransactionModel attribute to AutoRollback.

To run an approve action on a test page named TestPageA, you should:

- * Configure TestPageA.Approve.Invoke().

In Business Central's testing framework, the TransactionModel attribute can be set to AutoRollback. This ensures that any changes made during the test are rolled back after the test is complete, leaving the database in its original state.

For running an action on a test page, you would use the 'Invoke' method on the action you wish to perform. In this case, to run an approve action on TestPageA, you would use TestPageA.Approve.Invoke() within your test codeunit. This simulates the user action of approving something on the page.

These actions ensure that the testing environment is properly set up to test specific functionalities without persisting test data and to

invoke actions as part of the test scenarios.

NEW QUESTION # 68

You have a custom app.

A warning for the rule code named AAOXYZ appears in multiple app objects.

You need to change the severity of the rule from Warning to Info for only the current app.

Which three actions should you perform? Each correct answer presents part of the solution. Choose three.

NOTE: Each correct selection is worth one point.

- A. Change the "al.enableCodeAnalysis" property value to "false".
- B. Add the "al.ruleSetPath" property with a path to the ruleset.json file.
- C. Open the Visual Studio Code user settings.json file.
- D. Add the following ruleset object to the ruleset.json file:

```
{  
  "id": "AAOXYZ",  
  "action": "Hidden"  
}
```

To the "rules" array.

- E. Open the Visual Studio Code project settings.json file.
- F. Add the following ruleset object to the ruleset.json file:

```
{  
  "id": "AAOXYZ",  
  "action": "Info"  
}
```

To the "rules" array.

Answer: B,C

NEW QUESTION # 69

A developer creates a profile for part-time shop supervisors and adds customizations.

You plan to add new requirements to the profile.

You need to analyze the code to understand the profile and make sure there are no errors.

```
01 profile "Part Time Shop Supervisor"  
02 {  
03   Description = 'This profile is for Part time Shop Supervisors';  
04   Caption = 'Part Time Shop Supervisor';  
05   RoleCenter = "Shop Supervisor Role Center";  
06   Enabled = true;  
07   Promoted = true;  
08   Customizations = Customization1;  
09 }  
10 pagecustomization Customization1 customizes "Item List"  
11 {  
12   layout  
13   {  
14     modify("Profit %")  
15     {  
16       visible = false;  
17     }  
18     moveafter("Unit Cost"; "Costing Method")  
19   }  
20 }
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Profile and customization		
Statement	Yes	No
The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup.	<input type="radio"/>	<input type="radio"/>
Variables, procedures, and triggers cannot be added on page customization objects.	<input type="radio"/>	<input type="radio"/>
Line 10 should use extends instead of customizes .	<input type="radio"/>	<input type="radio"/>
In line 18, "Unit Cost" will be moved after "Costing Method".	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Profile and customization		
Statement	Yes	No
The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup.	<input type="radio"/>	<input checked="" type="radio"/>
Variables, procedures, and triggers cannot be added on page customization objects.	<input checked="" type="radio"/>	<input type="radio"/>
Line 10 should use extends instead of customizes .	<input type="radio"/>	<input checked="" type="radio"/>
In line 18, "Unit Cost" will be moved after "Costing Method".	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup: No Variables, procedures, and triggers cannot be added on page customization objects: Yes Line 10 should use extends instead of customizes: No In line 18, "Unit Cost" will be moved after "Costing Method": Yes The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup.

* No

* The code doesn't contain any reference to the User Setup table or the Register Time field, so this is not correct. Profiles are not applied conditionally based on fields like this.

Variables, procedures, and triggers cannot be added on page customization objects.

* Yes

* Page customization objects are meant for UI modifications, such as moving or hiding fields. You cannot add variables, procedures, or triggers in a page customization object.

Line 10 should use extends instead of customizes.

* No

* In AL, when customizing a page within a profile, you use customizes rather than extends. Extends is used when modifying base application objects, but customizes is used to customize pages within a profile.

In line 18, "Unit Cost" will be moved after "Costing Method".

* Yes

* The code in line 18 is correct. The moveafter directive will move the "Unit Cost" field after the "Costing Method" field on the page layout.

NEW QUESTION # 70

.....

Our product boosts many advantages and varied functions to make your learning relaxing and efficient. The client can have a free download and tryout of our MB-820 exam torrent before they purchase our product and can download our study materials immediately after the client pay successfully. MB-820 exam question provides the free update and the discounts for the old client and our experts check whether our test bank has been updated on the whole day and if there is the update the system will send the update automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed that our MB-820 latest question is absolutely good choices for you
