Tech firms award high-paying job contracts to Microsoft Dynamics 365 Business Central Developer (MB-820) certification holders. Every year many aspirants appear in the MB-820 test of the certification, but few of them cannot crack it because of not finding reliable Microsoft Dynamics 365 Business Central Developer prep materials. So, you must prepare with real exam questions to pass the certification exam. If you don't rely on actual exam questions, you will fail and loss time and money.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q24-Q29):

NEW QUESTION # 24

A company has a page named New Job Status connected to a source table named Job. The page has an action named Item Ledger Entries. The company requires the following changes to the page:

- * Filter the page to display only jobs with open or quote status.
- * Add the following comment for internal use: This page does not include completed jobs.
- * Item Ledger Entries action must open the selected job on the page and display it in the UI for users to modify.

You need to select the property selections to use for each requirement.

Which property selections should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Page modifications

Requirement

Display status of open or quote.

Add a comment for internal use.

Action must open selected job on the page.

Property selection

SourceTableView = sorting(Status) order(ascending)
SourceTableView = where(Status = filter(Open | Quote | Planning));
SourceTableView = where(Status = filter(Open | Quote));

Description = 'This page does not include completed jobs';
ToolTip = 'This page does not include completed jobs';

RunPageLink = "Job No." = FIELD("No.");
RunPageView = "Job No." = FIELD("No.");

Answer:

Explanation:

Page modifications

Requirement

Display status of open or quote.

Add a comment for internal use.

Action must open selected job on the page.

Property selection

SourceTableView = sorting(Status) order(ascending)
SourceTableView = where(Status = filter(Open | Quote | Planning));
SourceTableView = where(Status = filter(Open | Quote));

Description = 'This page does not include completed jobs';
ToolTip = 'This page does not include completed jobs';

RunPageLink = "Job No." = FIELD("No.");
RunPageView = "Job No." = FIELD("No.");

NEW QUESTION # 25

You are developing a test application to test the posting process of a sales order. You must provide the following implementation:

- * Specify the value of post options (dialog: Ship, Invoice, Ship & Invoice) as Invoice.
- * Perform calculations and values checking.

You need to complete the development of the test codeunit.

Which methods should you use? To answer, move the appropriate methods to the correct implementation. You may use each method once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods

Handler	Normal
Test	

Test codeunit implementations

Implementation

Specify the value of the post options as Invoice.
Perform calculations and values checking.

Method

Test
Handler

Answer:

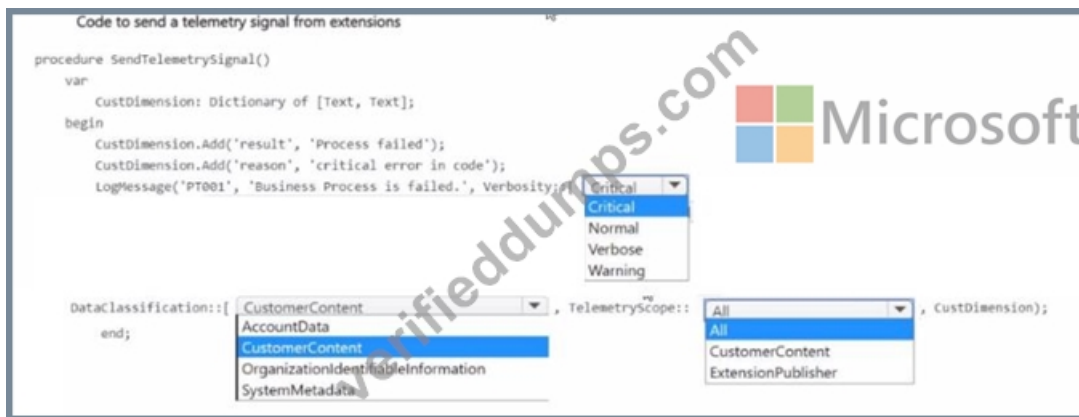

Explanation:

Methods	Test codeunit implementations	Implementation	Method
Handler	Normal	Specify the value of the post options as Invoice.	Test
Test		Perform calculations and values checking.	Handler

NEW QUESTION # 26

You need to log an error in telemetry when the business process defined in the custom application developed for Contoso, Ltd fails. How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 27

You need to create the Install codeunit that is required in the extension used for installing or updating the Housekeeping app. Which data type or declaration should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Data types or declarations for an Install codeunit

Requirement	Data type or declaration
Data type for information	<div>ModuleDependencyInfo</div> <div>ModuleInfo</div> <div>SessionInformation</div>
Start of the declaration of the method or procedure to perform the tasks	<div>global procedure</div> <div>local procedure</div> <div>procedure</div>

Answer:

Explanation:

Explanation:

For the Install codeunit required for the extension used for installing or updating the Housekeeping app, you should use the following data type and declaration:

- * Data type for information: ModuleInfo

- * Start of the declaration of the method or procedure to perform the tasks: local procedure In AL language, which is used for developing extensions in Business Central, an Install codeunit is a special type of codeunit that is used to handle installation or upgrade logic for an extension.

- * ModuleInfo is a data type that contains information about the current extension, such as its version. It is typically used within the OnInstallAppPerCompany or OnUpgradePerCompany triggers of an Install codeunit to determine if the app is being installed for the first time or upgraded.

- * A local procedure within an Install codeunit is a method that is only accessible within the codeunit itself. It is not visible to other objects or extensions. This is suitable for tasks that are internal to the installation process and should not be exposed globally. These selections align with the requirements of handling installation and update procedures in a controlled and encapsulated manner within Business Central extensions.

NEW QUESTION # 28

A company plans to customize its per tenant extension reports. The company has the following requirements for the customization:

- * Child data items must not be displayed on the request page for some master detail reports.

- * Selecting key filter fields takes users too much time. The customization must decrease the amount of time to select the fields.

You need to optimize the report request page.

Which actions should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Report request page

Observation

Child data items of some master detail reports must not be displayed on the request page.

Decrease the amount of time to select filter fields.

Action

Set the PrintOnlyIfDetail property to true.
Set the UseRequestPage property to true.
Set the DataItemTableView sorting property.
Set the DataItemLinkReference property to the parent data item.

Set the SaveValues Property to true.
Specify the request page options.
Specify the RequestFilterFields property.
Specify the RequestFilterHeading property.

Answer:

Explanation:

Report request page

Observation

Child data items of some master detail reports must not be displayed on the request page.

Decrease the amount of time to select filter fields.

Action

Set the PrintOnlyIfDetail property to true.
Set the UseRequestPage property to true.
Set the DataItemTableView sorting property.
Set the DataItemLinkReference property to the parent data item.

Set the SaveValues Property to true.
Specify the request page options.
Specify the RequestFilterFields property.
Specify the RequestFilterHeading property.

NEW QUESTION # 29
