Topic 4	• Manage and maintain devices: This section deals with managing, troubleshooting, and safeguarding various devices. It also covers methods to ensure that they meet organizational policies and security standards.

Three Main Formats of Microsoft MD-102 Practice Test Material

The Microsoft MD-102 practice tests have customizable time and MD-102 exam questions feature so that the students can set the time and MD-102 exam questions according to their needs. The Microsoft MD-102 practice test questions are getting updated on the daily basis and there are also up to 1 year of free updates. Earning the Microsoft MD-102 Certification Exam is the way to grow in the modern era with high-paying jobs. The 24/7 support system is available for the customers so that they can get the solution to every problem they face and pass Endpoint Administrator (MD-102) exam. You can also evaluate the MD-102 prep material with a free demo.

Microsoft Endpoint Administrator Sample Questions (Q51-Q56):

NEW QUESTION # 51
You use Microsoft Intune and Intune Data Warehouse.
You need to create a device inventory report that includes the data stored in the data warehouse.
What should you use to create the report?

- A. the Azure portal app
- B. Microsoft Power Bl
- C. Endpoint analytics
- D. the Company Portal app

Answer: B

Explanation:
You can use the Power BI Compliance app to load interactive, dynamically generated reports for your Intune tenant. Additionally, you can load your tenant data in Power BI using the OData link. Intune provides connection settings to your tenant so that you can view the following sample reports and charts related to:
Devices
Enrollment
App protection policy
Compliance policy
Device configuration profiles
Software updates
Device inventory logs
Note: Load the data in Power BI using the OData link
With a client authenticated to Azure AD, the OData URL connects to the RESTful endpoint in the Data Warehouse API that exposes the data model to your reporting client. Follow these instructions to use Power BI Desktop to connect and create your own reports.
Sign in to the Microsoft Endpoint Manager admin center.
Select Reports > Intune Data warehouse > Data warehouse.
Retrieve the custom feed URL from the reporting blade, for example:
https://fef.{yourtenant}.manage.microsoft.com/ReportingService/DataWarehouseFEService/dates?api- version=v1.0 Open Power BI Desktop.
Choose File > Get Data. Select OData feed.
Choose Basic.
Type or paste the OData URL into the URL box.
Select OK.
If you have not authenticated to Azure AD for your tenant from the Power BI desktop client, type your credentials. To gain access to your data, you must authorize with Azure Active Directory (Azure AD) using OAuth 2.0.
Select Organizational account.
Type your username and password.
Select Sign In.
Select Connect.
Select Load.

NEW QUESTION # 52

You have a Microsoft 365 subscription.

You plan to enable Microsoft Intune enrollment for the following types of devices:

* Existing Windows 11 devices managed by using Configuration Manager

* Personal iOS devices

The solution must minimize user disruption.

Which enrollment method should you use for each device type? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Windows 11 devices managed by using Configuration Manager: Windows Autopilot ▼
- Co-management
- User enrollment
- **Windows Autopilot**

Personal iOS devices: Automated Device Enrollment (ADE) ▼
- Apple Configurator
- **Automated Device Enrollment (ADE)**
- User enrollment

Answer:

Explanation:

Answer Area

Windows 11 devices managed by using Configuration Manager: Windows Autopilot ▼
- Co-management
- User enrollment
- **Windows Autopilot**

Personal iOS devices: Automated Device Enrollment (ADE) ▼
- Apple Configurator
- **Automated Device Enrollment (ADE)**
- User enrollment

Explanation

Answer Area

Windows 11 devices managed by using Configuration Manager: Windows Autopilot ▼

Personal iOS devices: Automated Device Enrollment (ADE) ▼

NEW QUESTION # 53

You have an Azure AD tenant that contains the users shown in the following table.

Name	Multi-factor authentication (MFA) status
User1	Disabled
User2	Enabled

You have the devices shown in the following table.

Name	Platform
Device1	Android
Device2	iOS

You have a Conditional Access policy named CAPolicy1 that has the following settings:
* Assignments
o Users or workload identities: User 1. User1
o Cloud apps or actions: Office 365 Exchange Online
o Conditions: Device platforms: Windows, iOS
* Access controls
o Grant Require multi-factor authentication
You have a Conditional Access policy named CAPolicy2 that has the following settings:
Assignments
o Users or workload identities: Used, User2
o Cloud apps or actions: Office 365 Exch
o Conditions
Device platforms: Android, iOS
Filter for devices
Device matching the rule: Exclude filtered devices from policy
Rule syntax: device. displayName- contains "1"
Access controls
Grant Block access
For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer:

Explanation:

Explanation
A screen shot of a computer Description automatically generated with low confidence

NEW QUESTION # 54
You have a Microsoft 365 E5 subscription and 25 Apple iPads.
You need to enroll the iPads in Microsoft Intune by using the Apple Configurator enrollment method.
What should you do first?

- A. Modify the enrollment restrictions.
- B. Configure an Apple MDM push certificate.
- C. Upload a file that has the device identifiers for each iPad.
- D. Add your user account as a device enrollment manager (DEM).

Answer: B

Explanation:
Reference:
https://www.manageengine.com/mobile-device-management/help/enrollment/mdm_creating_apns_certificate.html Prerequisites for iOS enrollment Before you can enable iOS devices, complete the following steps: Make sure your device is eligible for Apple device enrollment. Set up Intune - These steps set up your Intune infrastructure. In particular, device enrollment requires that you set your MDM authority. Get an Apple MDM Push certificate - Apple requires a certificate to enable management of iOS and macOS devices.
https://docs.microsoft.com/en-gb/intune/enrollment/apple-mdm-push-certificate-get
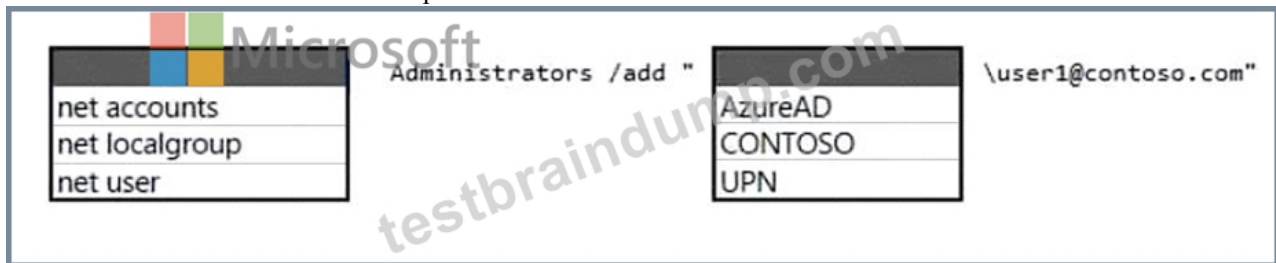

NEW QUESTION # 55
You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1 @contoso.com.
You join a Windows 10 device named Client1 to contoso.com.
You need to add User1 to the local Administrators group of Client1.
How should you complete the command? To answer, select the appropriate options in the answer area.
NOTE:Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 56
......
