**NEW QUESTION # 319**

You have a Microsoft 365 subscription that contains 1,000 iOS devices. The devices are enrolled in Microsoft Intune as follows:

* Two hundred devices are enrolled by using the Intune Company Portal.
* Eight hundred devices are enrolled by using Apple Automated Device Enrollment (ADE).

You create an iOS/iPadOS software updates policy named Policy 1 that is configured to install iOS/iPadOS 15.5.

How many iOS devices will Policy1 update, and what should you configure to ensure that only iOS/iPadOS 15.5 is installed? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Number of devices: 800
- 200
- 800
- 1000

Configure a: Device restriction policy
- Compliance policy
- Conditional Access policy
- Device restriction policy

**Answer:**

**Explanation:**

Explanation:

Policy 1 will update 800 iOS devices that are enrolled by using Apple Automated Device Enrollment (ADE). This is because ADE devices are supervised devices that support software update policies in Intune1. Devices that are enrolled by using the Intune Company Portal are not supervised devices and do not support software update policies2.

To ensure that only iOS/iPadOS 15.5 is installed, you should configure a device restriction policy that restricts visibility of software updates. This will prevent users from manually updating the OS to a newer version than the one you specified in Policy 11. You can use the Deployment Workbench to create and assign a device restriction profile to your ADE devices3.

**NEW QUESTION # 320**

You are creating a device configuration profile in Microsoft Intune.
You need to implement an ADMX-backed policy.
Which profile type should you use?

- A. Custom
- B. Device restrictions (Windows 10 Team)
- C. Identity protection
- D. Device restrictions

**Answer: A**
