NEW QUESTION #73

For a facility to apply the NFPA 101 (2012 edition) standards correctly, which of the following must first be defined?

- A. building deficiencies
- B. type of construction
- C. location
- D. occupancy

Answer: D

Explanation:

NFPA 101 (Life Safety Code) is structured around occupancy classifications (healthcare, business, assembly, residential, etc.). Determining the correct occupancy type is the first step because all subsequent requirements-such as egress, fire protection features, and construction criteria-are based on occupancy classification. Construction type, deficiencies, and location are important, but they are addressed only after occupancy is defined.

- C. Federal Regulations 40 CFR Part 112 Oil Pollution Act.
- D. The Joint Commission Utility Management standards.

Answer: C
