Match the machine learning models to the appropriate descriptions.

To answer, drag the appropriate model from the column on the left to its description on the right. Each model may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Models	Answer Area
Classification	A supervised machine learning model used to predict numeric values.
Clustering	A supervised machine learning model used to predict categories.
Regression	An unsupervised machine learning model used to group similar entities based on features.

Answer:

Explanation:

Models

Classification

Clustering

Regression

Answer Area

Regression

A supervised machine learning model used to predict numeric values.

Classification

A supervised machine learning model used to predict categories.

Clustering

An unsupervised machine learning model used to group similar entities based on features.

Explanation:

Models

Classification

Clustering

Regression

Answer Area

Regression

A supervised machine learning model used to predict numeric values.

Classification

A supervised machine learning model used to predict categories.

Clustering

An unsupervised machine learning model used to group similar entities based on features.

NEW QUESTION # 222

You need to identify street names based on street signs in photographs. Which type of computer vision should you use?

- A. facial recognition
- B. image classification
- C. optical character recognition (OCR)
- D. object detection

Answer: B

NEW QUESTION # 223

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can use Language Service's question answering to query an Azure SQL database.	☐	☐
You should use Language Service's question answering when you want a knowledge base to provide the same answer to different users who submit similar questions.	☐	☐
Language Service's question answering can determine the intent of a user utterance.	☐	☐

Answer:

Explanation:

Answer Area

Statements	Yes	No
You can use Language Service's question answering to query an Azure SQL database.	☐	☒
You should use Language Service's question answering when you want a knowledge base to provide the same answer to different users who submit similar questions.	☒	☐
Language Service's question answering can determine the intent of a user utterance.	☐	☒

Explanation:

Statements	Yes	No
You can use Language Service's question answering to query an Azure SQL database.	☐	☒
You should use Language Service's question answering when you want a knowledge base to provide the same answer to different users who submit similar questions.	☒	☐
Language Service's question answering can determine the intent of a user utterance.	☐	☒

NEW QUESTION # 224

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Automated machine learning provides you with the ability to include custom Python scripts in a training pipeline.	☒	☐
Automated machine learning implements machine learning solutions without the need for programming experience.	☐	☐
Automated machine learning provides you with the ability to visually connect datasets and modules on an interactive canvas.	☐	☐

Answer:

Explanation:

Explanation

Answer Area

Statements	Yes	No
Automated machine learning provides you with the ability to include custom Python scripts in a training pipeline.	☒	☐
Automated machine learning implements machine learning solutions without the need for programming experience.	☒	☐
Automated machine learning provides you with the ability to visually connect datasets and modules on an interactive canvas.	☒	☐
