And if you have any probelm on our AZ-140 learning guide, you can contact with us via email or online.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q35-Q40):

NEW QUESTION # 35
You have an Azure Virtual Desktop deployment that contains a host pool named Pool1. Pool1 contains two session hosts. Pool1 is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Answer Area

Service updates will be applied to Pool1 [answer choice].

as soon as the updates are released
once every 30 days
once the updates are generally available

New user connections will be [answer choice].

connected to the session host that has the highest number of existing connections and has not reached the maximum session limit
evenly distributed across all available hosts
rejected once five sessions are established

NEW QUESTION # 36

You have the Azure Virtual Desktop deployment shown in the following table.

Configuration	Value
Azure region	West US
Number of currently deployed virtual machines	5
Virtual machine size	D8s_v3
Number of total regional vCPUs	80% (40 of 50)

You plan to deploy a new host pool as shown in the following table.

Configuration	Value
Azure region	West US
Number of session hosts	4
Virtual machine size	D8s_v3

You need to ensure that you can deploy the host pool.
What should you do?

- A. Stop and deallocate one of the currently deployed virtual machines.
- B. Change the proposed virtual machine size for the session hosts to D4s_v3.
- C. Submit a support request for service and subscription limits.
- D. Add a lock to the existing host pool.

Answer: C

NEW QUESTION # 37

HOTSPOT -

You have an Azure Virtual Desktop host pool named HostPool1 that contains 20 session hosts.
You create a new scaling plan that has the Ramp-up settings shown in the following exhibit.
Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Starting at 08:00, [answer choice] session hosts will start for ramp-up.

2
4
16
20

New user sessions will be distributed [answer choice].

evenly across all available session hosts
to the session host that has the lowest CPU usage
to the session host with the most connections that has not reached the limit

Answer:

Explanation:

starting at 08:00, [answer choice] session hosts will start for ramp-up.

2
4
16
20

New user sessions will be distributed [answer choice]

evenly across all available session hosts
to the session host that has the lowest CPU usage
to the session host with the most connections that has not reached the limit

NEW QUESTION # 38
-
You have an Azure subscription that contains a user named User1.
The subscription uses the Azure Virtual Desktop host pools shown in the following table.

Name	Type	Session host operating system	Number of hosts
Pool1	Pooled	Windows Server 2019 Datacenter	2
Pool2	Pooled	Windows 10 Enterprise multi-session	10
Pool3	Personal	Windows 11 Enterprise	10

You need to ensure that User1 can create RemoteApp app groups that will be used to stream a suite of custom apps from the host pools. The solution must meet the following requirements:
* The apps must be available to the users in all the pools.
* The principle of least privilege must be followed.
* Administrative effort must be minimized.
Which role should you assign to User1, and what is the minimum number of app groups that User1 should create? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Role:

Desktop Virtualization Application Group Contributor
Desktop Virtualization Contributor
Desktop Virtualization Host Pool Contributor
Desktop Virtualization Workplace Contributor

Number of app groups:

1
2
3
22

Answer:

Explanation:
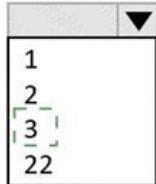

Explanation
Desktop Virtualization Group
3

NEW QUESTION # 39
You have a hybrid Azure Active Directory (Azure AD) tenant.
You plan to deploy an Azure Virtual Desktop personal host pool. The host pool will contain 15 virtual machines that run Windows 10 Enterprise. The virtual machines will be joined to the on- premises Active Directory domain and used by the members of a domain group named Department1.
You need to ensure that each user is added automatically to the local Administrators group on the virtual machine to which the user signs in.
What should you configure?

- A. a device setting in Azure AD
- B. a policy preference in a Group Policy Object (GPO)
- C. a role assignment for each virtual machine
- D. a role assignment for the host pool

Answer: B

Explanation:
To automatically add a user to the local administrator a GPO is needed.\
