Dear, you may think what you get is enough to face the AZ-900 actual test. While, the AZ-900 real test may be difficult than what you thought. So many people choose AZ-900 training pdf to make their weak points more strong. The AZ-900 study pdf can help you to figure out the actual area where you are confused. AZ-900 PDF VCE will turn your study into the right direction. I believe after several times of practice, you will be confident to face your actual test and get your Microsoft AZ-900 certification successfully.

Cloud computing is everywhere these days and it seems to gain even more popularity in the next couple of years. International companies understood that they need to implement these modern technologies to access their most critical operations from anywhere in the world. And one of the platforms that are most widely used for this purpose is Microsoft Azure. It is safe and easy to install but still, there is a need for qualified professionals to manage it day by day efficiently.

Considering this situation, gaining the Microsoft Certified: Azure Fundamentals badge is the best investment an IT specialist can make for their future. But, before you enjoy the benefits that this certification can bring to you, it is essential to Pass AZ-900 Exam. Below, you will find more about the basic skills you need to develop to get a passing score on this test with less effort.

The AZ-900 exam covers a range of topics, including cloud concepts, core Azure services, Azure pricing and support, and Azure security and compliance. It is a multiple-choice exam that consists of 40-60 questions that need to be completed in 85 minutes. AZ-900 exam can be taken in-person at a testing center or online through a remote proctoring service.

Avail Perfect AZ-900 Reliable Test Book to Pass AZ-900 on the First Attempt

Free Microsoft AZ-900 Dumps to prepare for the Microsoft Azure Fundamentals AZ-900 exam is a great way to gauge your progress in preparation. You can also check your progress with the help of evaluation reports. These reports will help you know where you stand in your preparation and boost your confidence.

Microsoft AZ-900 (Microsoft Azure Fundamentals) Certification Exam is an entry-level exam that is designed to test a candidate's

knowledge of cloud computing and Microsoft Azure services. AZ-900 exam is intended for individuals who are interested in pursuing a career in cloud computing or for those who want to demonstrate their knowledge and expertise in Microsoft Azure services.

Microsoft Azure Fundamentals Sample Questions (Q311-Q316):

NEW QUESTION # 311

Match the Azure service to the correct description.

Instructions: To answer, drag the appropriate Azure service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all NOTE: Each correct match is worth one point.

Services

Azure Functions
Azure App Service
Azure virtual machines
Azure Container Instances

Answer Area

Service	Provide operating system virtualization
Service	Provide portable environment for virtualized applications
Service	Used to build, deploy, and scale web apps
Service	Provide a platform for serverless code

Answer:

Explanation:

The screenshot displays the exam interface for question 311. On the left, under 'Services', there are four draggable boxes: 'Azure Functions', 'Azure App Service', 'Azure virtual machines', and 'Azure Container Instances'. On the right, under 'Answer Area', there are four descriptions: 'Provide operating system virtualization', 'Provide portable environment for virtualized applications', 'Used to build, deploy, and scale web apps', and 'Provide a platform for serverless code'. The interface shows the correct matches: Azure Functions to the first description, Azure App Service to the second, Azure virtual machines to the third, and Azure Container Instances to the fourth. The Microsoft logo is visible at the bottom of the interface.

NEW QUESTION # 312

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area	Statements	Yes	No
	Azure Active Directory (Azure AD) requires the implementation of domain controllers on Azure virtual machines.	☐	☐
	Azure Active Directory (Azure AD) provides authentication services for resources hosted in Azure and Microsoft 365.	☐	☐
	Each user account in Azure Active Directory (Azure AD) can be assigned only one license.	☐	☐

Answer:

Explanation:

Answer Area

Statements	Yes	No
Azure Active Directory (Azure AD) requires the implementation of domain controllers on Azure virtual machines.	☐	☒
Azure Active Directory (Azure AD) provides authentication services for resources hosted in Azure and Microsoft 365.	☐	☒
Each user account in Azure Active Directory (Azure AD) can be assigned only one license.	☒	☐

NEW QUESTION # 313

Match the Azure Cloud Services benefit to the correct description.

Instructions: To answer, drag the appropriate benefit from the column on the left to its description on the right. Each benefit may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Answer Options	Answer Area
Disaster recovery	A cloud service that remains available after an occurs.
Fault tolerance	A cloud service that can be recovered after an occurs.
Low latency	A cloud service that performs quickly when increases.
Dynamic scalability	A cloud service that can be accessed from the Internet.

Answer:

Explanation:

Answer Options	Answer Area
Disaster recovery	A cloud service that remains available after an occurs.
Fault tolerance	A cloud service that can be recovered after an occurs.
Low latency	A cloud service that performs quickly when increases.
Dynamic scalability	A cloud service that can be accessed from the Internet.

NEW QUESTION # 314

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
By creating additional resource groups in an Azure subscription, additional costs are incurred.	☐	☐
By copying several gigabits of data to Azure from an on-premises network over a VPN, additional data transfer costs are incurred.	☐	☐
By copying several GB of data from Azure to an on-premises network over a VPN, additional data transfer costs are incurred.	☐	☐

Answer:

Explanation:

Statements	Yes	No
By creating additional resource groups in an Azure subscription, additional costs are incurred.	☐	☒
By copying several gigabits of data to Azure from an on-premises network over a VPN, additional data transfer costs are incurred.	☒	☐
By copying several GB of data from Azure to an on-premises network over a VPN, additional data transfer costs are incurred.	☐	☒

Explanation:

Box 1: No

Resource groups are logical containers for Azure resources. You do not pay for resource groups.

Box 2: Yes

Data ingress over a VPN is data 'coming in' to Azure over the VPN. You are charged data transfer costs for data ingress.

Box 3: No

Data egress over a VPN is data 'going out' of Azure over the VPN. You are not charged for data egress.

NEW QUESTION # 315

Your company has an on-premises network that contains multiple servers.

The company plans to reduce the following administrative responsibilities of network administrators:

- Backing up application data
- Replacing failed server hardware
- Managing physical server security
- Updating server operating systems
- Managing permissions to shared documents

The company plans to migrate several servers to Azure virtual machines.

You need to identify which administrative responsibilities will be reduced after the planned migration.

Which two responsibilities should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Replacing failed server hardware
- B. Updating server operating systems
- C. Backing up application data
- D. Managing physical server security
- E. Managing permissions to shared documents

Answer: A,D

Explanation:

Azure virtual machines run on Hyper-V physical servers. The physical servers are owned and managed by Microsoft. As an Azure customer, you have no access to the physical servers.

Microsoft manage the replacement of failed server hardware and the security of the physical servers so you don't need to.

Incorrect Answers:

B: Microsoft have no control over the applications you run on the virtual machines. Therefore, it is your responsibility to ensure that application data is backed up.

D: Microsoft do not manage the operating systems you run on the virtual machines. Therefore, it is your responsibility to ensure that the operating systems are updated.

E: Microsoft have no control over the shared folders you host on the virtual machines. Therefore, it is your responsibility to ensure that folder permissions are configured appropriately.
