Reliable AZ-900 Test Dumps Free & Pass-Sure AZ-900 Reliable Exam Guide & Accurate AZ-900 Test Passing Score

If you are still struggling to prepare for passing AZ-900 certification exam, at this moment Itbraindumps can help you solve problem. Itbraindumps can provide you training materials with good quality to help you pass the exam, then you will become a good Microsoft AZ-900 certification member. If you have decided to upgrade yourself by passing Microsoft Certification AZ-900 Exam, then choosing Itbraindumps is not wrong. Our Itbraindumps promise you that you can pass your first time to participate in the Microsoft certification AZ-900 exam and get Microsoft AZ-900 certification to enhance and change yourself.

Microsoft Azure Fundamentals Sample Questions (Q246-Q251):

NEW QUESTION # 246
Note: The question is included in a number of questions that depicts the identical set-up.
However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You are tasked with deploying Azure virtual machines for your company.
You need to make use of the appropriate cloud deployment solution.
Solution: You should make use of Platform as a Service (PaaS).
Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

This is the most basic category of cloud computing services. With IaaS, you rent IT infrastructure
- servers and virtual machines (VMs), storage, networks, and operating systems - from a cloud provider on a pay-as-you-go basis.

NEW QUESTION # 247

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Yes
YES
YES

Answer:

Explanation:

NEW QUESTION # 248

HOTSPOT
To complete the sentence, select the appropriate option in the answer area.
Hot Area:

Answer:

Explanation:

You have an application that is comprised of an Azure web app that has a Service Level Agreement (SLA) of 99.95 percent and an Azure SQL database that has an SLA of 99.99 percent.

The composite SLA for the application is ▼

the product of both SLAs, which equals 99.94 percent
the lowest SLA associated to the application, which is 99.95 percent
the highest SLA associated to the application, which is 99.99 percent
the difference between the two SLAs, which is 0.05 percent

Section: Describe Azure cost management and Service Level Agreements
Explanation:
Composite SLAs involve multiple services supporting an application, each with differing levels of availability. For example, consider an App Service web app that writes to Azure SQL Database. At the time of this writing, these Azure services have the following SLAs:
* App Service web apps = 99.95%
* SQL Database = 99.99%
What is the maximum downtime you would expect for this application? If either service fails, the whole application fails. The probability of each service failing is independent, so the composite SLA for this application is 99.95% x 99.99% = 99.94%. That's lower than the individual SLAs, which isn't surprising because an application that relies on multiple services has more potential failure points.

NEW QUESTION # 249
Hotspot Question
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A company has complete control of the resources and security for its private cloud.	O	O
A hybrid cloud solution enables a company to control whether its applications run on-premises or in the cloud.	O	O
Companies are responsible for capital expenditure when they scale up a virtual machine hosted in a public cloud.	O	O

Answer:

Explanation:

Answer Area

Statements	Yes	No
A company has complete control of the resources and security for its private cloud.	O	O
A hybrid cloud solution enables a company to control whether its applications run on-premises or in the cloud.	O	O
Companies are responsible for capital expenditure when they scale up a virtual machine hosted in a public cloud.	O	O

NEW QUESTION # 250

A company wants to try out some services which are being offered by Azure in Public Preview.
Should the company deploy resources which are part of Public Preview in their production environment?

- A. No
- B. Yes

Answer: A

Explanation:
As mentioned below in the Microsoft documentation, there is no SLA or guarantee for any service in Public Preview. So, you should not look at deploying such services in production.

Supplemental Terms of Use for Microsoft Azure Previews
Last updated: December 2018

Azure may include preview, beta, or other pre-release features, services, software, or regions offered by Microsoft to obtain customer feedback ("Previews"). Previews are made available to you on the condition that you agree to these terms of use, which supplement your agreement governing use of Azure.

PREVIEWS ARE PROVIDED "AS-IS," "WITH ALL FAULTS," AND "AS AVAILABLE," AND ARE EXCLUDED FROM THE SERVICE LEVEL AGREEMENTS AND LIMITED WARRANTY. Previews may not be covered by customer support. Previews may be subject to reduced or different security, compliance and privacy commitments, as further explained in the Microsoft Online Services Privacy Statement, Microsoft Azure Trust Center, the Online Services Terms, and any additional notices provided with the Preview. Customers should not use Previews to process Personal Data or other data that is subject to heightened compliance requirements. Certain named Previews may also be subject to additional terms set forth below, if any. We may change or discontinue Previews at any time without notice. We also may choose not to release a Preview into "General Availability."
