

Microsoft DP-100 training and testing

BONUS!!! Download part of Actual4test DP-100 dumps for free: https://drive.google.com/open?id=1Cn5K_5GswWPxwoNXChfZCd3gIbDg-E0

The thousands of Channel Partner Program DP-100 certification exam candidates have passed their dream Designing and Implementing a Data Science Solution on Azure DP-100 certification and they all used the valid and real Channel Partner Program Designing and Implementing a Data Science Solution on Azure DP-100 Exam Questions. You can also trust Designing and Implementing a Data Science Solution on Azure DP-100 pdf questions and practice tests.

The DP-100 Exam covers a range of topics related to data science, including data preparation, feature engineering, model training, and deployment. Candidates will be tested on their ability to use Azure services to build end-to-end machine learning solutions that can be deployed at scale.

>> DP-100 Online Exam <<

Best DP-100 Preparation Materials, DP-100 Valid Vce

So for this reason, our Microsoft DP-100 are very similar to the actual exam. With a vast knowledge in this field, Actual4test always tries to provide candidates with the actual questions so that when they appear in their real Microsoft DP-100 Exam they do not feel any difference. The Desktop Microsoft DP-100 Practice Exam Software of Actual4test arranges a mock exam for the one who wants to evaluate and improve preparation.

Microsoft Designing and Implementing a Data Science Solution on Azure Sample Questions (Q183-Q188):

NEW QUESTION # 183

You need to implement a new cost factor scenario for the ad response models as illustrated in the performance curve exhibit. Which technique should you use?

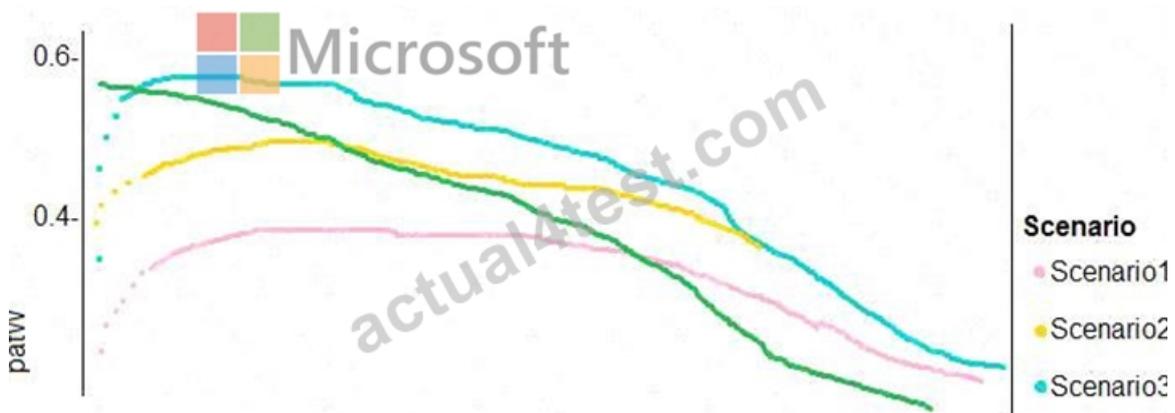

- A. Set the threshold to 0.5 and retrain if weighted Kappa deviates +/- 5% from 0.45.
- B. Set the threshold to 0.2 and retrain if weighted Kappa deviates +/- 5% from 0.6.
- C. Set the threshold to 0.05 and retrain if weighted Kappa deviates +/- 5% from 0.5.
- D. Set the threshold to 0.75 and retrain if weighted Kappa deviates +/- 5% from 0.15.

Answer: A

Explanation:

Scenario:

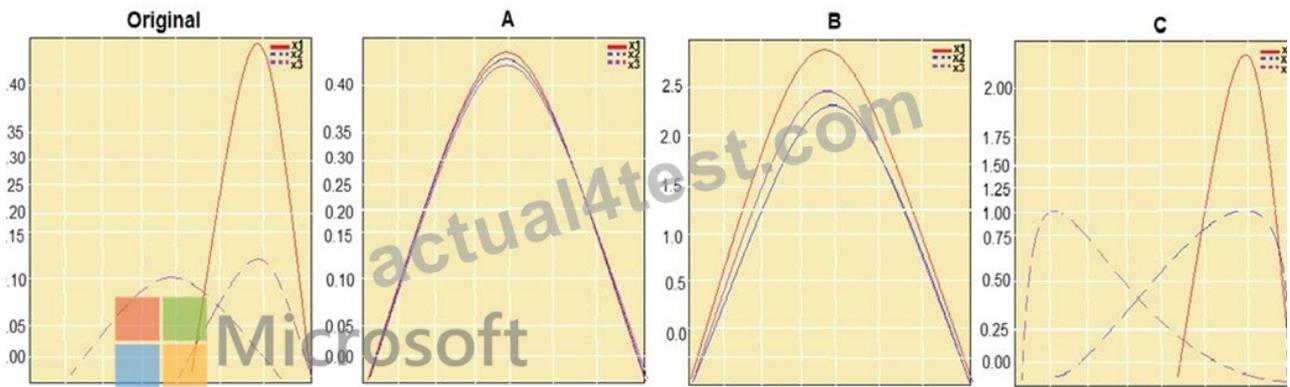

Performance curves of current and proposed cost factor scenarios are shown in the following diagram:

The ad propensity model uses a cut threshold is 0.45 and retrain occur if weighted Kappa deviated from 0.1 +/- 5%.

NEW QUESTION # 184

You are performing feature scaling by using the scikit-learn Python library for x1, x2, and x3 features. Original and scaled data is shown in the following image.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Question

Answer choice

Which scaler is used in graph A?

	▼
Standard Scaler	
Min Max Scale	
Normalizer	

Which scaler is used in graph B?

	▼
Standard Scaler	
Min Max Scale	
Normalizer	

Which scaler is used in graph C?

	▼
Standard Scaler	
Min Max Scale	
Normalizer	

Answer:

Explanation:

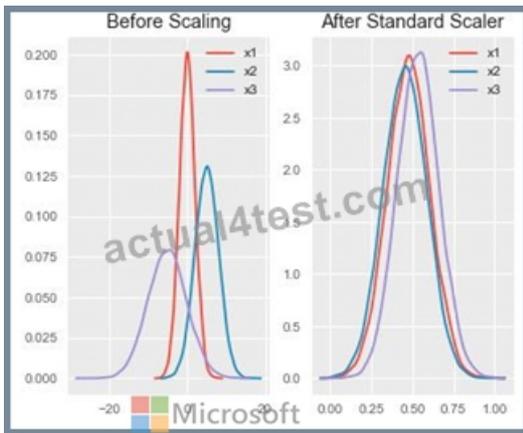

Question	Answer choice			
Which scaler is used in graph A?	<table border="1"><tr><td>Standard Scaler</td></tr><tr><td>Min Max Scale</td></tr><tr><td>Normalizer</td></tr></table>	Standard Scaler	Min Max Scale	Normalizer
Standard Scaler				
Min Max Scale				
Normalizer				
Which scaler is used in graph B?	<table border="1"><tr><td>Standard Scaler</td></tr><tr><td>Min Max Scale</td></tr><tr><td>Normalizer</td></tr></table>	Standard Scaler	Min Max Scale	Normalizer
Standard Scaler				
Min Max Scale				
Normalizer				
Which scaler is used in graph C?	<table border="1"><tr><td>Standard Scaler</td></tr><tr><td>Min Max Scale</td></tr><tr><td>Normalizer</td></tr></table>	Standard Scaler	Min Max Scale	Normalizer
Standard Scaler				
Min Max Scale				
Normalizer				

Explanation:

Box 1: StandardScaler

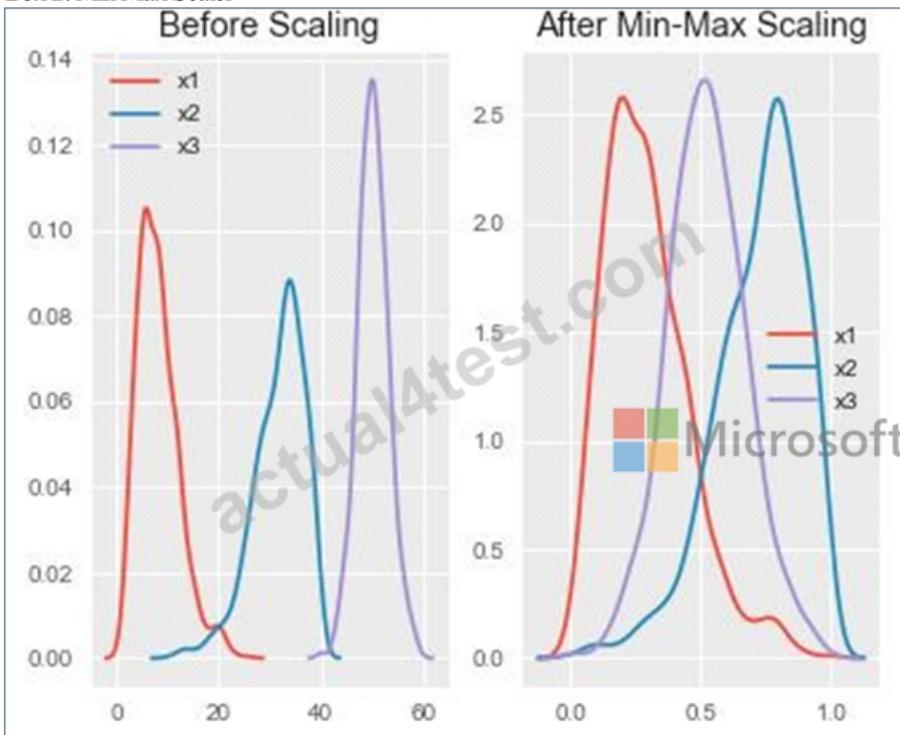

The StandardScaler assumes your data is normally distributed within each feature and will scale them such that the distribution is now centred around 0, with a standard deviation of 1.

Example:

All features are now on the same scale relative to one another.

Box 2: Min Max Scaler

Notice that the skewness of the distribution is maintained but the 3 distributions are brought into the same scale so that they overlap.

Box 3: Normalizer

NEW QUESTION # 185

You have an Azure Machine Learning workspace.

You run the following code in a Python environment in which the configuration file for your workspace has been downloaded.

```

from azureml.core import Workspace
from azureml.core import Experiment
import pandas as pd
import datetime as dt

ws = Workspace.from_config()
experiment = Experiment(workspace=ws, name='my_experiment')
run = experiment.start_logging()
print('run_time', dt.datetime.now())

row_count = (len(data))
run.log('observations', row_count)
run.complete()

```

instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
An error will occur if an experiment named my_experiment does not already exist in the workspace.	<input type="radio"/>	<input type="radio"/>
If the experiment does not exist, it will be created. If the experiment does exist, the code will create a new run of the existing experiment.	<input type="radio"/>	<input type="radio"/>
After the code completes, a metric named run_time is recorded in the experiment run. The metric will contain the date and time for the run.	<input type="radio"/>	<input type="radio"/>
After the code completes, the data.csv file will be available in the run's output.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
An error will occur if an experiment named my_experiment does not already exist in the workspace.	<input type="radio"/>	<input checked="" type="radio"/>
If the experiment does not exist, it will be created. If the experiment does exist, the code will create a new run of the existing experiment.	<input checked="" type="radio"/>	<input type="radio"/>
After the code completes, a metric named run_time is recorded in the experiment run. The metric will contain the date and time for the run.	<input type="radio"/>	<input checked="" type="radio"/>
After the code completes, the data.csv file will be available in the run's output.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Answer Area

NEW QUESTION # 186

You have an Azure Machine Learning workspace.

You plan to use the terminal to configure a compute instance to run a notebook.

You need to add a new R kernel to the compute instance.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange

them in the correct order.

Answer:

Explanation:

NEW QUESTION # 187

You are a lead data scientist for a project that tracks the health and migration of birds. You create a multi-image classification deep learning model that uses a set of labeled bird photos collected by experts. You plan to use the model to develop a cross-platform mobile app that predicts the species of bird captured by app users.

You must test and deploy the trained model as a web service. The deployed model must meet the following requirements:

An authenticated connection must not be required for testing.

The deployed model must perform with low latency during inferencing.

The REST endpoints must be scalable and should have a capacity to handle large number of requests when multiple end users are using the mobile application.

You need to verify that the web service returns predictions in the expected JSON format when a valid REST request is submitted.

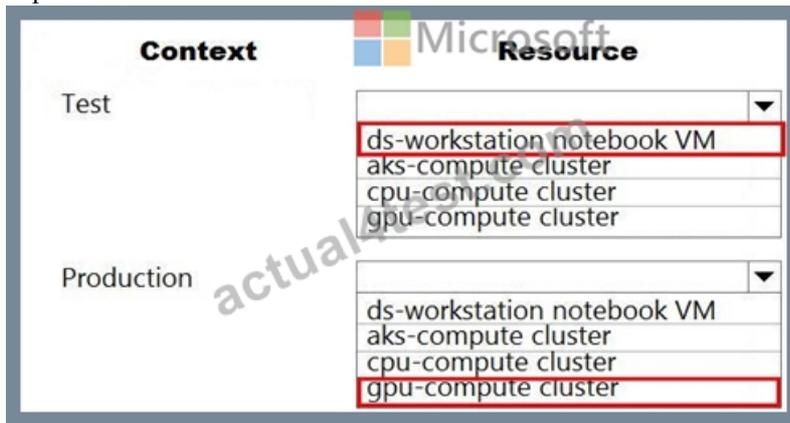

Which compute resources should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Context	Resource
Test	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px 5px;">ds-workstation notebook VM</div> <div style="padding: 2px 5px;">aks-compute cluster</div> <div style="padding: 2px 5px;">cpu-compute cluster</div> <div style="padding: 2px 5px;">gpu-compute cluster</div> </div>
Production	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px 5px;">ds-workstation notebook VM</div> <div style="padding: 2px 5px;">aks-compute cluster</div> <div style="padding: 2px 5px;">cpu-compute cluster</div> <div style="padding: 2px 5px;">gpu-compute cluster</div> </div>

Answer:

Explanation:

Explanation:

Box 1: ds-workstation notebook VM

An authenticated connection must not be required for testing.

On a Microsoft Azure virtual machine (VM), including a Data Science Virtual Machine (DSVM), you create local user accounts while provisioning the VM. Users then authenticate to the VM by using these credentials.

Box 2: gpu-compute cluster

Image classification is well suited for GPU compute clusters

NEW QUESTION # 188

.....

As is known to us, the high pass rate is a reflection of the high quality of DP-100 study torrent. There are more than 98 percent that passed their exam, and these people both used our DP-100 test torrent. There is no doubt that our DP-100 guide torrent has a higher pass rate than other study materials. We deeply know that the high pass rate is so important for all people, so we have been trying our best to improve our pass rate all the time. Now our pass rate has reached 99 percent. If you choose our DP-100 study torrent as your study tool and learn it carefully,
