2025 Microsoft The Best GH-900: GitHub Foundations Latest Guide Files

Discount is being provided to the customer for the entire Microsoft GH-900 preparation suite. These GH-900 learning materials include the GH-900 preparation software & PDF files containing sample Interconnecting Microsoft GH-900 and answers along with the free 90 days updates and support services. We are facilitating the customers for the Microsoft GH-900 preparation with the advanced preparatory tools.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details

Topic 1	• Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.
Topic 2	• Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.
Topic 3	• Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.
Topic 4	• Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.

Microsoft GitHub Foundations Sample Questions (Q24-Q29):

NEW QUESTION # 24

What are three valid states for a file in a git repository?

(Each correct answer presents part of the solution. Choose three.)

- A. Uncommitted
- B. Committed
- C. Staged
- D. Tracked
- E. Modified

Answer: B,C,E

Explanation:

In a Git repository, a file can be in one of the following three valid states:

Committed: The file is saved in the local repository. It is part of the permanent history of the project.

Modified: The file has been changed but not yet staged or committed. It is in the working directory.

Staged: The file has been marked to be included in the next commit. It is in the staging area, ready to be committed.

These states represent the typical lifecycle of a file as it moves through the process of being edited, reviewed, and saved in Git.

NEW QUESTION # 25

Which of the following statements most accurately describes who can access a private repository Wiki?

- A. Wikis are public regardless of whether you have access to the repository.
- B. Wikis will not be visible until shared with a specific user.
- C. Wikis are only viewable by repository admins.
- D. Wikis can be viewed by the same people who have Read access to the repository.

Answer: D

Explanation:

For private repositories on GitHub, the Wiki is accessible to anyone who has Read access to the repository. This means that if you can view the code and files in the repository, you can also view its Wiki. This makes Wikis a useful tool for documenting projects in

a way that is available to all collaborators without requiring special permissions beyond those needed to access the repository itself.

NEW QUESTION # 26

How can a user create a repository template, and what permissions are required?

- A. With Admin permissions, navigate to Organization settings, select the repository, and choose Template Repository.
- B. With Maintain permissions, navigate to Repository settings and select Template Repository.
- **C. With Admin permissions, navigate to Repository settings and select Template Repository.**
- D. With Maintain permissions, navigate to Organization settings, select the repository, and choose Template Repository.

Answer: C

Explanation:

Creating a repository template in GitHub requires specific steps and permissions:

Creating a Repository Template:

Option A is correct because a user with Admin permissions can navigate to the repository's settings and enable the "Template Repository" option. This allows other users to generate new repositories from this template, which includes all branches, tags, and file history.

Other Options:

Option B is incorrect because "Maintain" permissions do not allow the creation of repository templates, and the option is not found in Organization settings but in the repository settings.

Option C is incorrect because the "Template Repository" option is in the repository settings, not in Organization settings.

Option D is incorrect because "Maintain" permissions do not grant the ability to create a repository template.

NEW QUESTION # 27

What features are offered by Copilot for Business that are not offered by Copilot for individuals?
(Each answer presents a complete solution. Choose three.)

- A. VPN proxy support via self-signed certificates
- B. Plugs directly into the editor
- **C. Support for organization or enterprise GitHub accounts**
- D. Offers multi-line function suggestions
- **E. Organization-wide policy management**
- **F. Blocks suggestions matching public code**

Answer: C,E,F

Explanation:

GitHub Copilot for Business offers several features that are tailored to the needs of organizations, providing more control, security, and support compared to the individual version.

Organization-wide Policy Management:

Option B is correct because Copilot for Business allows organizations to manage policies across their entire user base, providing control over how Copilot is used within the organization.

Blocking Suggestions Matching Public Code:

Option C is correct because Copilot for Business includes enhanced security features, such as blocking code suggestions that match public code to prevent inadvertent use of unlicensed code.

Support for Organization or Enterprise GitHub Accounts:

Option E is correct because Copilot for Business supports integration with GitHub Enterprise accounts, offering additional administrative controls and integration capabilities.

Incorrect Options:

Option A (multi-line function suggestions) is a feature available in both individual and business versions, so it does not differentiate the business offering.

Option D (VPN proxy support via self-signed certificates) is not a primary differentiator of Copilot for Business.

Option F (plugs directly into the editor) is true for both individual and business versions, so it is not unique to Copilot for Business.

NEW QUESTION # 28

What qualifier finds issues that mention a certain user?

- A. mentions:
- B. threads:
- C. mentioned:
- D. Smentioned:

Answer: A

Explanation:

The qualifier mentions: is used in GitHub's search functionality to find issues that mention a certain user. For example, if you want to find all issues where a specific user is mentioned, you would use mentions:username. This helps in tracking where a user has been involved in discussions across issues or pull requests.

NEW QUESTION # 29

• • • • •

To attain this you just need to enroll in the GH-900 certification exam and put all your efforts to pass this challenging GH-900 exam with good scores. However, to get success in Microsoft GH-900 dumps PDF is not an easy task, it is quite difficult to pass it. But with proper planning, firm commitment, and Microsoft GH-900 Exam Questions, you can pass this milestone easily. The ITexamReview is a leading platform that offers real, valid, and updated Microsoft GH-900 Dumps.
