Um jeder Microsoft MB-335 Prüfungsunterlagen Benutzer einen bequemen Prozess zu haben, bieten wir Ihnen 3 Versionen von Microsoft MB-335 Prüfungsunterlagen, nämlich PDF-, Online-, und Software-Version. Eine der Versionen kann für Sie taugen und Ihnen helfen, innerhalb der kürzesten Zeit Microsoft MB-335 zu bestehen und die autoritativste internationale Zertifizierung zu erwerben!

Die Microsoft MB-335-Zertifizierungsprüfung ist ideal für Fachkräfte, die ihre Fähigkeiten und ihr Wissen im Lieferkettenmanagement verbessern möchten. Es ist eine hervorragende Gelegenheit für funktionale Berater, ihr Fachwissen in der Dynamics 365 Supply Chain Management zu demonstrieren und ihre Fähigkeit zu demonstrieren, End-to-End-Lieferkettenlösungen zu implementieren. Die Zertifizierungsprüfung deckt ein breites Spektrum von Themen ab, darunter Bestandsverwaltung, Beschaffung und Beschaffung, Produktionskontrolle, Lagermanagement, Transportmanagement und Qualitätsmanagement. Das Bestehen der Microsoft MB-335-Zertifizierungsprüfung kann Fachleuten helfen, sich auf dem wettbewerbsintensiven Arbeitsmarkt abzuheben und neue Karrieremöglichkeiten zu eröffnen.

Das Erreichen der Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Certification ist eine großartige Möglichkeit, Ihre Fähigkeiten zu beweisen und sich auf dem Arbeitsmarkt zu unterscheiden. Diese Zertifizierung verbessert Ihre Glaubwürdigkeit und demonstriert Ihre Fähigkeit, Dynamics 365 -Lösungen zu konfigurieren, anzupassen und zu implementieren, die die Produktivität und Effizienz der Supply -Chain -Managementprozesse der Kunden stärken könnten.

Die Microsoft MB-335-Zertifizierungsprüfung wurde entwickelt, um die Fähigkeiten und Kenntnisse von Personen zu testen, die daran interessiert sind, zertifizierte Dynamics 365 Supply Chain Management Functional Consultants zu werden. Diese Prüfung

richtet sich an diejenigen, die ein starkes Verständnis der Dynamics 365 Supply Chain Management -Anwendung haben und die in der Lage sind, Lösungen zu entwickeln und umzusetzen, die den Anforderungen von Unternehmen entsprechen.

MB-335 Fragen Beantworten, MB-335 Exam

Das Expertenteam von DeutschPrüfung nutzt ihre Erfahrungen und Kenntnisse aus, um die Schulungsunterlagen zur Microsoft MB-335 Zertifizierungsprüfung zu bearbeiten. Unsere Schulungsunterlagen zur Microsoft MB-335 Zertifizierungsprüfung sind bei den Kunden sehr beliebt. Das sind die Ergebnisse der fleißigen Experten-Teams. Diese Simulationsfragen und Antworten sind von guter Qualität. Und die Ähnlichkeit beträgt über 95%. Sie sind eher zuverlässig. Wenn Sie die Trainingsinstrumente von DeutschPrüfung benutzen, können Sie 100% die Microsoft MB-335 (Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert) Zertifizierungsprüfung bestehen.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert MB-335 Prüfungsfragen mit Lösungen (Q87-Q92):

87. Frage

A company overstates on-hand raw materials due to the time it takes to post raw materials as consumed when production orders are processed.

All items used to manufacture finished goods must be consumed when a finished good is reported as finished.

You must not change all bill of materials lines to use the option of flushing principal.

You need to ensure that all production orders consume raw materials at Report as finished.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

actions

In the Production order status section of Production control, select Report as finished .
In the Production order status section of Production control, select Start .
On the Bill of materials section of Inventory management, select Report as finished .
Select Make default for all users .
In the Picking list journal, select Always in the Automatic BOM consumption.
Select default values in the ribbon.

Antwort:

Begründung:

88. Frage

A candy manufacturer uses Dynamics 365 Supply Chain Management.

A master planning run needs to prioritize the production jobs for fruit snacks by flavor and color every 16 days.

You need to configure the appropriate parameters in the coverage group.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Field	Configuration
Time fence	Capacity Sequencing Capacity Forecast plan
Period type	Day Day Week Month Quarter

Antwort:

Begründung:

Field	Configuration
Time fence	Capacity Sequencing Capacity Forecast plan
Period type	Day Day Week Month Quarter

Explanation:

Field	Configuration
Time fence	Capacity
Period type	Day

89. Frage

You need to resolve the issue for UserF.

What should you configure? To answer, select the appropriate options in the answer area.

Requirement	Configuration
Machinery	Setup time, Route group, Resource Run time category, Route group, Resource Setup time, Route group, Resource Resource, Scheduling direction
Scheduling	Operations scheduling with Finite material only Operations scheduling with Finite capacity only Job scheduling only Operations scheduling with Finite material only Job scheduling with Operations scheduling

Antwort:

Begründung:

Requirement	Configuration
Machinery	Setup time, Route group, Resource Run time category, Route group, Resource Setup time, Route group, Resource Resource, Scheduling direction
Scheduling	Operations scheduling with Finite material only Operations scheduling with Finite capacity only Job scheduling only Operations scheduling with Finite material only Job scheduling with Operations scheduling

NOTE: Each correct selection is worth one point.

90. Frage

You are developing a new car audio system kit. The kit configuration has restrictions based on car model, speaker size, and other expression constraints.

You need to set up a new item for the car audio system.

How should you create the new product? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

New released product field	Selection
Product subtype	item service product product master
Product dimension group (active dimensions)	configuration style style and configuration size and style
Configuration technology	predefined variant dimension-based configuration constraint-based configuration

Antwort:

Begründung:

New released product field	Selection
Product subtype	item service product product master
Product dimension group (active dimensions)	configuration style style and configuration size and style
Configuration technology	predefined variant dimension-based configuration constraint-based configuration

91. Frage

You need to create the production orders for standard model bicycles.
Which method should you use?

- A. All production orders form
- **B. Supply schedule form**
- C. Released item
- D. Master planning execution
- E. Sales order line

Antwort: B

Begründung:

Topic 4, Case Study 4, Fabrikam inc.

Fabrikam, Inc. is a discrete manufacturer of outdoor patio furniture. The company originated as a sole owner working from a home garage, then moved into a commercial storage space, and later into a full manufacturing facility. The company operates as two operating legal entities, one in the United States and the other in Mexico.

As the company grew, the existing software systems failed to grow with it. This meant that financial reporting was managed in an outdated accounting system; raw materials planning, production, and inventory control were managed in another system; and cost calculations were tracked in multiple spreadsheets managed by analysts.

Current environment

The Fabrikam, inc. engineering team uses a third-party computer-aided design (CAD) system for drawings.

These drawings are later introduced into one or more companies for sale. A customer service center handles complaint calls and places orders for distributors.

The current system landscape creates a lack of controls and visibility across the systems, leading to overages of some raw materials, shortages on others, and large quantities of scrap. Heavy production volume provides little to no room for system downtime. The staff manually creates production orders, which leads to double work for system entry later. This delay has a ripple effect into the materials planning.

The company currently sources teakwood from India, making it a more expensive and high-end material.

Cedar and redwood are both sourced from the Western US. Truck driver shortages across the nation have caused shipping costs to rise sharply.

Fabrikam, Inc. recently decided to expand into the gas firepit market. All products are currently being prototyped. The company decides that the firepit prototype should be initially available only in the United States. The firepits will be manufactured only in Nevada and Arizona. The firepits are produced as prototyping; this production line operates only on Mondays.

Fabrikam, Inc. has purchased new manufacturing equipment for the firepit metal fabrication. This purchase includes a warranty, which requires that the company perform routine maintenance. Fabrikam, inc. elects to complete the maintenance in house on a quarterly schedule and maintain appropriate records for warranty purposes. The metal fabrication equipment consists of three separate machines used in a single production process.

Fabrikam, Inc. made the decision to move to Dynamics 365 Supply Chain Management.

Application and environment

- * Fabrikam, inc. must move systems and processing to software as a service (SaaS) whenever possible because the company does not have enough IT staff to support hardware.

Inventory and costing

- * Finished goods fall into three categories:

- * Wood furniture (teak, cedar, redwood) o Outdoor heating (firepits, gas heaters)

- * Each outdoor heating item with slight variations, such as a chrome or steel finish, must have a unique item number, o Repair parts (nuts and bolts, ignitors, and other parts)

- * The system must account for the fact that Fabrikam, inc. must take legal ownership of teakwood at the time of shipment, not at the time of receipt into the warehouse.

- * The company must accrue for the costs of the teakwood materials as soon as the company takes ownership.

The company takes ownership at the time of shipment, which is posted prior to physical receipt at the warehouse.

Engineering

- * Engineers who specialize in gas consumer goods will design the firepits and are the only users with authority to release the products for sale.

- * Engineering must notify customer service of any open orders that may contain a released product version that may be discontinued or delayed.

- * The change request workflow must route to the engineer.

Production

- * The raw material and subcomponent goods for the firepit must be managed by the engineer. This means the engineer must oversee any new items, material changes, address problems, and so on.

- * The metal fabrication equipment must be tracked at the locations where the firepits are produced.

- * The production team must operate on an all-day/everyday model, with each team operating in a 12-hour shift. This is a recent change to keep up with high demand for products, as well as for planning a new product line.

- * Raw material and subcomponent items for the firepit prototype must not be available for use until engineering is ready for the prototype product release.

- * Due to the production staff schedule, all equipment must be planned according to the staffing.

- * Maintenance for each of the three pieces of machinery must be scheduled at the same time so that only the local maintenance technician works on the equipment.

- * When the firepits are ready for the test market they must made be available for sale.

- * The United States operating company must review any engineering products before they are available for sales or production orders,

- * The engineering team must release the engineering product into the United States operating company,

- * The engineering BOM lines must not be removed by the United States operating company.

Application and environment

- * The operations manager is concerned that system downtime is so frequent that it is impacting efficiency due to the all-day/everyday production operation model.

Inventory and costing

- * Fabrikam, inc. marketing campaigns in the desert states of Arizona- Nevada, and New Mexico have led to an increased demand for teakwood furniture to endure weather elements. Supply and demand for this wood lowered expected margins with increased shipping costs and price increases from the vendors.

- * User1 reports that the inventory value of the teakwood is not on the financial reports, even though ownership of the product begins at the port of shipment,

- * Upon receipt into the physical warehouse, User2 reports that the warehouse workers received less teakwood than the ordered amount on the purchase order.

Engineering and production

- * As the firepits are produced and feedback received from the test market, records must be maintained of each revision to the firepit design.

- * Firepits must have attributes associated with them to specify the type of gas line that is available for the firepit such as natural gas or propane.

- * Customer service is receiving calls that the firepit ignition switch does not always work as expected. This issue was reported through an engineering change request.

- * User3 reports resource issues on the production shop floor due to system maintenance issues and other delays. The company does not want User3 or the other workers to stop production.

- * User4 reports that a bolt needed for cedar wood furniture is out of stock. A temporary substitution bolt was identified prior to starting the production order.

- * User5 reports that a hinge for redwood furniture will be discontinued at the end of the year. Production must reflect an updated part.

- * A large order was placed for 1,500 pieces of teakwood furniture and production orders must start as soon as possible.

- * Users reports the following:

* Only 100 pieces of furniture can be produced on the night shift due to resourcing. Enough raw materials are on hand to complete 100 pieces, but not enough to produce all 1.500 pieces.

92. Frage

Ob Sie glauben oder nicht, bieten wir die autoritativen und wirkungsvollen Prüfungsunterlagen der Microsoft MB-335. Wir sind sehr bereit, die beste Hilfe der Microsoft MB-335 Prüfungsvorbereitung Ihnen anzubieten. Vielleicht brauchen Sie nur die Zertifizierung der Microsoft MB-335, um Ihren Wunsch des Aufstiegs zu erfüllen. Wir wissen, dass man leicht den Impulskauf bereuen, deshalb empfehlen wir Ihnen, zuerst zu probieren und dann zu kaufen. Die Demo der Prüfungsunterlagen der Microsoft MB-335 können Sie auf unserer Website einfach herunterladen. Probieren Sie mal!
