MB-500 Study Reference & Dumps MB-500 Collection

At the time when people are hesitating about that which kind of MB-500 study material should be chosen in order to prepare for the important exam I would like to recommend the MB-500 training materials compiled by our company for you to complete the task. We have put substantial amount of money and effort into upgrading the quality of our MB-500 Preparation material. There are so many advantages of our MB-500 actual exam, such as free demo available, multiple choices, and practice test available to name but

a few.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q97-Q102):

NEW QUESTION # 97
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have an enumeration named truckStatus that has the following statuses:
* Empty
* Loaded
* Completed
You have the following code:

```
switch (truckTable.TruckStatus

  case TruckStatus::Empty:
    Info("1");
    break;
  case TruckStatus::Loaded:
    Info("2");
    break;
  case TruckStatus::Completed:
    Info("3");
    break;
```
You need to extend this enumeration and add the following statuses to the enumeration: Quarantine, InTransit.
You must then modify code that validates the switch statement.
Solution: Add a post handler to the method that checks the enumeration and logic for your new enumeration values using the integer value of the enumeration.

```
if ( truckTable.TruckStatus == 4 || truckTable.TruckStatus == 5)
{
  Info("Extended");
}
```

Does the solution meet the goal?

- A. Yes.
- B. No

Answer: A

NEW QUESTION # 98
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You must create a new attribute class in which to mark other classes in the ISV solution and their respective methods with the error levels Warning and Error. You have the following class: the numbers are included for reference only.)

```
01
02 public class Vehicle
03 {
04
05    public int bike()
06    {
07    }
08    public int automobile()
09    {
10    }
11    public int bicycle()
12    {
13    }
```

You need 10 ensure that the compiler will report an error if code calls the bike method.

Solution:

Create the following attribute class:

```
public class ISVObsolete extends SysAttribute
{
    ErrorWarning errorWarningEnum;
    str explanation;
    public void new(ErrorWarning _errorWarningEnum, str _explanation)
    {
        super();
        errorWarningEnum = _errorWarningEnum;
        explanation = _explanation;
    }
}
```

Insert the following code at line 04:

```
[SysObsoleteAttribute("Deprecated. Please use the Bicycle class instead.", false)]
```

Does The solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 99

You need to configure models for the project.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Extend the existing FinanceExt model and populate the project model definition.
- B. Overlay the existing FinanceExt model and populate the solution definition.
- C. Create a new model that extends the existing FinanceExt model.
- D. Modify the DefaultModelForNewProject setting in the DefaultConfig.xml file and name the model FinanceExt.

Answer: A,D

Explanation:

NEW QUESTION # 100

A company has a cloud-based Dynamics 365 Finance environment and uses an e-commerce website for retail operations. The website has business to business (B2B) capabilities. The company uses a middleware integration tool to process data.

You must create a batch job to automate some operations. The batch job must be able to process several thousand transactions in each run.

You need to configure the environment.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Requirement	Tool
Schedule a nightly batch in the middleware tool to import orders into Dynamics 365.	▼
	OData REST API
	Data management framework's package API
	Business events
Schedule a nightly batch in Dynamics 365 to export supplier data to a Microsoft Excel file. Configure the middleware tool to consume and process the data.	▼
	Recurring integration API
	Bring your own database (BYOD)
	OData REST API

Answer:

Explanation:

Requirement	Tool
Schedule a nightly batch in the middleware tool to import orders into Dynamics 365.	▼
	OData REST API
	Data management framework's package API
	Business events
Schedule a nightly batch in Dynamics 365 to export supplier data to a Microsoft Excel file. Configure the middleware tool to consume and process the data.	▼
	Recurring integration API
	Bring your own database (BYOD)
	OData REST API
