100% Pass Perfect Microsoft - MB-700 VCE Exam Simulator

With limited time for your preparation, many exam candidates can speed up your pace of making progress. Our MB-700 practice materials will remedy your faults of knowledge understanding for our MB-700 exam questions contain everything you need in the real MB-700 exam. You won't regret your decision of choosing our MB-700 training guide. In contrast, they will inspire your potential without obscure content to feel. After getting our MB-700 exam prep, you will not live under great stress during the exam period.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q183-Q188):

NEW QUESTION # 183

A company is planning a Dynamics 365 deployment.

The company needs to determine whether to implement an on-premises or a cloud deployment based on system performance.

You need to work with a developer to determine the proper tool from the Performance SDK to complete performance testing.

Which tool should you use? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools

XML recording
Microsoft Azure DevOps
Task Recorder

Scenario

Single-User C# test
Multi-user automated test
End-to-end business scenario

Tool

Answer:

Explanation:

Tools

XML recording
Microsoft Azure DevOps
Task Recorder

Scenario

Single-User C# test
Multi-user automated test
End-to-end business scenario

Tool

XML recording
Microsoft Azure DevOps
Task Recorder

Explanation:

Graphical user interface, text, application Description automatically generated

Scenario	Tool
Single-User C# test	XML recording
Multi-user automated test	Microsoft Azure DevOps
End-to-end business scenario	Task Recorder

NEW QUESTION # 184

You need to determine which system functionality meets the business requirement.

What should you recommend? To answer, drag the appropriate functionalities to the correct requirements. Each functionality may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Functionalities

Workflow
Purchasing policy
Audit policy

Requirement

Approve purchase requisitions over \$50.
Review offsite travel expenses.
Enforce vendor invoice compliance.

Functionality

Functionality
Functionality
Functionality

Answer:

Explanation:

Functionalities	Requirement	Functionality
Workflow	Approve purchase requisitions over \$50.	Workflow
Purchasing policy	Review offsite travel expenses.	Purchasing policy
Audit policy	Enforce vendor invoice compliance.	Audit policy

NEW QUESTION # 185

A distribution company is evaluating license requirements for a Dynamics 365 Supply Chain Management cloud-based implementation. The warehouse must maximize uptime for running sales order waves to reduce latency and service interruptions. You need to determine a licensing strategy for the company. Which license type should you recommend?

- A. Dynamics 365 Supply Chain Management base
- **B. Cloud Scale Unit**
- C. Loss Prevention
- D. Account Protection
- E. Dynamics 365 Supply Chain Management attach

Answer: B

Explanation:

Explanation

Dynamics 365 Supply Chain Management, Warehouse execution with scale units in the cloud Business value Companies can execute mission-critical manufacturing processes at scale and build resilience into key warehouse processes.

Feature details

With the Cloud Scale Unit Add-in for Dynamics 365 Supply Chain Management, warehouse resilience is accomplished by placing scale units at, or near, each warehouse. The scale units operate independently and allow the warehouses to remain operational during a connectivity failure, maintenance outage, and other events that might disrupt operations.

NEW QUESTION # 186

A company implements Dynamics 365 Finance.

A sales order confirmation report does not meet the company's branding standards. The report must include header notes and a colorful logo.

You must enable modern design for additional reports created by users in the future.

You need to meet the branding standards and enable additional forms and reports to be created by users.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Add colorful logo and header notes.

Enable forms by users.

Solution

Microsoft

Modern reports branding details
Print management configuration
Business document management

Modern reports branding details
SQL Server Reporting Services (SSRS) report design
Print management configuration
Business document management

Answer:

Explanation:

Requirement	Solution
Add colorful logo and header notes.	Modern reports branding details Print management configuration Business document management
Enable forms by users.	Modern reports branding details SQL Server Reporting Services (SSRS) report design Print management configuration Business document management

Explanation:

Box 1: Modern reports branding details

Modern report designs in Microsoft Dynamics 365 for Finance and Operations. ' The logos, color schemes, and notes are setup in "Organization administration"->"Setup"->"Document branding"->"Branding details".

Box 2: Business document management

Business document management is built on top of the ER framework and enables business users to edit business document templates by using Microsoft 365 service or appropriate Microsoft Office desktop application. Edits to the documents might include changing business document designs and adding placeholders for additional data without source code changes and new deployments. No knowledge of the ER framework is required to update templates of business documents.

Note:

Business users use the Electronic reporting (ER) framework to configure formats for outbound documents in accordance with the legal requirements of various countries/regions. Users can also define the dataflow to specify what application data is placed in generated documents. The ER framework generates outbound documents in Microsoft Office formats (Excel workbooks or Word documents) by using predefined templates.
