Mark Show Answer Font Size View

A company use Dynamics 365 Business Central.

The company identifies the following issues:

- Users report they cannot perform planning and dispatching of service orders or track bills of material in the system.
- The finance department says that licensing costs are higher than budgeted.

You need to recommend a solution to address the issues.

What should you recommend?

☐ A. Use the Lifecycle Services business process modeler to create service order management and manufacturing tasks in the BPM Library.

☐ B. Perform a fit-gap analysis, implement service order management and manufacturing business processes and license changes.

☐ C. Configure all users as Business Central Premium users.

☐ D. Ensure that the service order management and manufacturing processes steps are documented in a flow chart.

☐ E. Configure all users as Business Central Essentials users.

Latest MB-700 Exam Vce, Test MB-700 Testking

ActualTestsQuiz regularly updates Microsoft Dynamics 365: Finance and Operations Apps Solution Architect (MB-700) practice exam material to ensure that it keeps in line with the test. In the same way, ActualTestsQuiz provides a free demo before you purchase so that you may know the quality of the MB-700 dumps. Similarly, the Microsoft MB-700 practice test creates an actual exam scenario on each and every step so that you may be well prepared before your actual MB-700 examination time. Hence, it saves you time and money. ActualTestsQuiz provides three months of free updates if you purchase the Microsoft MB-700 questions and the content of the examination changes after that.

To be eligible for the Microsoft MB-700 Certification Exam, candidates must have a solid understanding of the Microsoft Dynamics 365 Finance and Operations Apps. They should also have experience in designing and implementing solutions that are based on this platform. Candidates should have experience in working with business stakeholders and should be able to translate business requirements into technical solutions. Additionally, candidates should have knowledge of Microsoft Power Platform and should be able to integrate it with Microsoft Dynamics 365 Finance and Operations Apps.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect

Sample Questions (Q294-Q299):

NEW QUESTION # 294

You need to recommend how to resolve audit compliance findings. What should you recommend?

- A. Run the segregation of duties process.
- B. Run the usage profiler.
- C. Run the user license estimator report.
- **D. Run the verify compliance of user-role assignments process.**

Answer: D

Explanation:

Topic 6, A Datum Corporation Overview

A Datum Corporation is an energy company that has office across North America and 3,000 employees.

Physical Locations

A Datum has the offices shown in the following table.

Location	Type
Calgary	Main office
San Diego	Branch office
New York	Branch office
Edmonton	Field site

Network infrastructure

The office in Calgary has a 1-Gbps internet circuit. The offices in San Diego and New York have 100-Mbps internet circuits. The field site in Edmonton has a 3-Mbps internet circuit.

Departments

A Datum has the following departments:

- * Information technology (IT)
- * Project management
- * Marketing

Microsoft 365 and Teams Environment

A Datum recently purchased a Microsoft 365 E5 subscription that has the Microsoft Teams Domestic Calling plan add-on. All users are assigned Microsoft 365 E5 Microsoft Teams Domestic Calling Plans is deployed.

Microsoft Entra ID has the default tenant access setting configured.

The Teams policies settings are configured as shown in the following exhibit.

Teams policies

Teams policies are used to control what settings or features are available to users when they are using Teams. You can use the Global (Org-wide default) policy and customize it or create one or more custom policies for those policies for members of a team or a channel within your organization. Learn more

Teams policies summary

1	1
Default policy	Custom policy

Manage policies Group policy assignment

+ Add + Edit + Duplicate + Export + Import + Manage users - 2 items

Search by name

Name	Description	Custom policy	Assigned to users	Create private channels	Create shared channels	Invite external users	Join external channels
Global (Org-wide default)	Default policy for users...	No		On	On	On	On
Marketing	Marketing users policy	Yes	View users	On	On	Off	Off

The Teams client is deployed to a non-persistent Virtual Desktop infrastructure (VDI) used by the project management department.

Allow guest access in Teams is set to off.

The Microsoft Viva Connections app is deployed to all users.

Problem statements

A Datum identifies the following issues:

An executive at the San Diego office report that video drop during Teams meetings.

The Edmonton field site has limited bandwidth, and user report poor audio during Teams calls and meetings.

Users in the project management department report that they cannot give or take during teams calls and meeting while sharing their VDI desktop.

NEW QUESTION # 295

A company is determining which reporting tools to use as part of a Dynamics 365 Finance implementation.

* Scenario A: Power users must use a free form tool to allow other power users to leverage transactional data to be consumed externally.

* Scenario B: Developers must use a modeling tool to allow all users to leverage aggregated data to be consumed internally.

* Scenario C: Developers must use a free form tool to allow all users to leverage transactional and aggregated data to be consumed internally and externally.

* Scenario D: Power users must use a free form tool to allow all users to leverage aggregated data to be consumed internally and externally.

* Scenario E: Power users must use a modeling tool to allow other power users to leverage transactional data to be consumed externally.

You need to recommend which tool should be used for each scenario.

Which tool should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Scenario

Reporting Tool

A

	▼
Microsoft Excel	
Embedded BI	
SSRS report	
Power BI	
Management reporter	

B

	▼
Microsoft Excel

NEW QUESTION # 296

A research institute is implementing Dynamics 365 Finance and plans to use Lifecycle Services (LCS) to standardize the implementation process.

You need to define a strategy for implementing LCS tools to meet the requirements.

What should you recommend? To answer, drag the appropriate tools to the correct tasks. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools

Usage profiler
Performance metrics
Business process modeler
Upgrade analysis

Answer Area

Task

View a detailed summary of consumed characteristics modeled for an organization.

View the most expensive queries for selected period.

Create, view, and modify repeatable implementations.

Plan full-version, minor-version, and in-place upgrades.

Topic 2, City Power and Light Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

City Power and Light is a publicly traded electric utility company. The company has a corporate office, four regional field offices, two subsidiary companies that produce solar energy, and one wind power subsidiary.

City Power and Light has 50 percent ownership in the solar energy company. The company fully owns the wind power company but operates it separately from other businesses.

City Power and Light currently operates with varying integrated legacy systems and has difficulty assembling company financials.

Migrating these systems and workloads to a common platform would improve visibility into the business and inform decision making. The company plans to implement Dynamics 365.

Legacy systems

- * The legacy system does not have audit capability of configurable workflow based on business logic

- * The legacy paper-based purchasing system does not allow parent-child relationships for vendors. Two signatures are required for purchase requisitions.

- * Purchase orders are entered into the system manually based on signed purchase requisitions printed to PDF and then emailed to the vendor.

- * The legacy procurement system does not have a parent-child relationship for master data management.

Financials

- * All financial consolidate up to City Power and Light Holding, LLC.

- * The finance department employees are currently able to create as well as pay invoices.

Customers

Sales orders from the website are uploaded into the system manually once a day .

International and domestic customers currently post to the same receivable account. At the end of the month, these have to be separated into domestic and international receivable accounts.

Other information

- * There are multiple active acquisitions expected during the implementation timeline.

- * The item master data for solar panel configurations has multiple variables and variants. As a complex.

General

- * Flexible implementation approach to support frequently changing business needs and requirements.

- * A phased roll-out is needed due to the complexity of the business.

- * Any offsite Travel meals submitted on an expense report without corresponding flight and hotel expenses need to be reviewed.

- * Ten percent of vendor invoices should be reviewed to ensure they meet company policy.

- * Testing of business processes needs to be automated.

- * Customer surveys must be sent out after email customer service interactions. Surveys must contain a rating system and a way for customers to add comments.

- * Employees require one central tool for internal communication, phone calls, and file sharing.

- * Sales representatives need an enterprise quoting tool for solar panel customers.

Technical

- * A cloud-based financial and operational system, accessible on mobile devices.

- * The ability to keep a legacy meter reading application with the ability to use the data in aggregated operating reports.

- * Business processes should be tested with different variables for the same process as part of the testing plan.

Functional

- * Establish and document business processes to assist with on-boarding new employees more efficiently.

- * Parent-child relationships need to be established for vendors with regional offices. Purchasing locations vary from invoicing locations.

- * The ability to create automated wire payments.

Requisitions

- * All purchase requisitions over \$50 need to be approved by a manager.

- * All purchase requisitions over \$1,000 require senior manager approval.

- * Multiple purchase requisitions to the same vendor should be combined.

Sales

The item master data for solar panel configurations have multiple variables and variants. This leads to complex quoting and sales orders.

Sales representatives must be able to create automated wire payments.

Issues

- * A limited number of users are available for testing.

- * User1 reports that the date fields are not saving during formula entry with saved variables functionality in the RSAT tool.

- * The purchasing department is seeing duplicate vendor records during data conversion.

- * Audit notes from the prior year indicate improvement is needed in roles and responsibilities related to financial management and security roles.
- * User2 reports that parts ordered on P0123 were never received and the vendor has said they never received the PO.
- * User3 provides feedback that important steps during journal entry are being forgotten and new users need hands-on guidance.
- * Service technicians report that they do not always have the appropriate tools or parts with them requiring multiple service calls.

NEW QUESTION # 298

A company uses Dynamics 365 Supply Chain Management.

A user reports an error on a transaction in the production environment that occurred 30 days ago.

You need to move the current data from the production environment to the sandbox environment to troubleshoot the transaction error. You must back up the sandbox environment before you copy data to the production environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Back up the current sandbox environment data.	<div>Export database</div> <div>Import database</div> <div>Point-in-time restore</div> <div>Refresh database</div>
Move data from the production environment to the sandbox environment.	<div>Point-in-time restore</div> <div>Refresh database</div> <div>Rollback</div>

Answer:

Explanation:

Requirement	Action
Back up the current sandbox environment data.	<div>Export database</div> <div>Import database</div> <div>Point-in-time restore</div> <div>Refresh database</div>
Move data from the production environment to the sandbox environment.	<div>Point-in-time restore</div> <div>Refresh database</div> <div>Rollback</div>
