Please feel free to contact us if you have any questions about our dumps files.

Microsoft Power Platform Developer Sample Questions (Q200-Q205):

NEW QUESTION # 200

You are modifying a model-driven app for a bicycle company. The app modifications must meet the following requirements:

- * The order form must include a column that calculates payments based on how many years the customer wants to finance a bicycle.
- * A pop-up box must remind the employee to validate the information entered before saving.

You must use out-of-the-box features before customizing the application.

What should you do?

To answer, drag the appropriate actions to the correct requirements. Each action may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct answer is worth one point.

Actions	Requirement	Action
Customize the app.	Calculate payments.	
Configure an out-of-the-box feature.	A pop-up box must appear.	
Edit XML.		

Answer:

Explanation:

Actions	Requirement	Action
Customize the app.	Calculate payments.	Configure an out-of-the-box feature.
Configure an out-of-the-box feature.	A pop-up box must appear.	Edit XML.
Edit XML.		

Explanation

Actions	Requirement	Action
Customize the app.	Calculate payments.	Configure an out-of-the-box feature.
Configure an out-of-the-box feature.	A pop-up box must appear.	Edit XML.
Edit XML.		

NEW QUESTION # 201

A company is creating a new system based on the Common Data Service (CDS).

You need to select the CDS features that meet the company's requirements.

Which features should you select? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Requirement	Feature
Cascade User Owned	When a primary record is deleted, the associated referential records must also be deleted.	
Referential Restrict Delete	When a record is assigned to a user, all referential active records must also be assigned to that user.	
Referential	When a primary record is deleted, the associated record must not be deleted.	
Parental		

Answer:

Explanation:

Features	Requirement	Feature
Cascade User Owned	When a primary record is deleted, the associated referential records must also be deleted.	Parental
Referential Restrict Delete	When a record is assigned to a user, all referential active records must also be assigned to that user.	Cascade User Owned
Referential	When a primary record is deleted, the associated record must not be deleted.	Referential
Parental		

Explanation:

1. Parental : Any action taken on a record of the parent table is also taken on the related child table records.
2. Cascade user owned: Perform the action on all referencing entity records owned by the same user as the referenced entity.
3. Referential: Any related records can be navigated to, and actions taken on one will not affect the other.

NEW QUESTION # 202

You need to develop a set of Web API's for a company.

What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Operation
Implement operations that do not have side effects and may support further composition	<div>▼</div> <div>Functions</div> <div>Actions</div> <div>Entities</div>
Implement operations that allow side effects, such as data modification	<div>▼</div> <div>Functions</div> <div>Actions</div> <div>Entities</div>
Implement keyless named structure types that consist of a set of properties	<div>▼</div> <div>Complex types</div> <div>Entity types</div> <div>Enumeration types</div>

Answer:

Explanation:

Requirement	Operation
Implement operations that do not have side effects and may support further composition	<div>▼</div> <div>Functions</div> <div>Actions</div> <div>Entities</div>
Implement operations that allow side effects, such as data modification	<div>▼</div> <div>Functions</div> <div>Actions</div> <div>Entities</div>
Implement keyless named structure types that consist of a set of properties	<div>▼</div> <div>Complex types</div> <div>Entity types</div> <div>Enumeration types</div>

NEW QUESTION # 203

You create a suite of Power Platform-based order management canvas apps for a bakery that has five retail stores. Each store uses a tablet device to manage inventory and process orders.

You need to make the following changes to the original order tracking app:

- * When an online order for delivery is received, send the order to the bakery that is located closest to the order destination.
- * When an online order for pickup is received, require store staff to enter an estimated time in an app.

Staff must prepare the order and then use the app to notify the customer when the order is ready.

- * Allow the store manager to personalize the company's corporate weekly newsletter and add store-specific specials.

You must minimize the amount of custom code and configuration required to implement the solution.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Implementation option

Determine which store is closest to the order destination.

Microsoft

Estimate the time required to prepare an order and notify the customer.

Send the newsletter by email to customers.

	▼
Power Automate flow	
Plug-in	
Logic app	

	▼
New screen in an existing order canvas app	
New canvas app	
New logic app	

	▼
Power Automate flow triggered from an email button	
Power Automate flow triggered manually	
Power Automate UI flow triggered from an email button	

Answer:

Box 1: Custom self-service portal for both employers and job candidates If you select an environment that contains customer

engagement, you can create the following portals:

Customer self-service portal: A customer self-service portal enables customers to access self-service knowledge, support resources, view the progress of their cases, and provide feedback.

Partner portal: A partner portal allows every organization with resellers, distributors, suppliers, or partners to have real-time access to every stage of shared activities.

Employee self-service portal: An employee self-service portal creates an efficient and well-informed workforce by streamlining common tasks and empowering every employee with a definitive source of knowledge.

Box 2: Model-driven app with push notifications

Compared to canvas apps, model-driven apps in PowerApps are based on underlying data - specifically, the data stored in Common Data Service (CDS).

Box 3: Webform with target set to the job custom entity

Box 4: Configure a value for the Execute Workflow on Redeeming Contact option only.

Execute Workflow on Redeeming Contact: A workflow process to be executed when the invite is redeemed.

The workflow will be passed the redeeming contact as the primary entity.

Box 5: Configure the value for the Assigned to Account option only.

Assign to Account: An account record to be associated as the redeeming contact's parent customer when the invite is redeemed.

NEW QUESTION # 204

You are creating a canvas app for a company. A security role has been created for sales representatives and a second security role has been created for sales managers.

The canvas app has the following requirements:

Sales managers must be able to view the records of the salespeople in their business unit.

Sales managers must be the only people who can view sales probability data in opportunity records.

Sales representatives and new hires assigned to the same territory share access to sales records.

You need to assign permissions for the app.

Which security options should you use? To answer, drag the appropriate security options to the correct scenarios. Each security option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Security options	Scenario	Security option
Role-based security	Sales managers must be able to view the records of the salespeople in their business unit.	Security option
Field-level security	Sales managers must be the only people who can view sales probability data in opportunity records.	Security option
Record-level security	Sales representatives and new hires assigned to the same territory share access to sales records.	Security option

Answer:

Explanation:

Security options	Scenario	Security option
Role-based security	Sales managers must be able to view the records of the salespeople in their business unit.	Role-based security
Field-level security	Sales managers must be the only people who can view sales probability data in opportunity records.	Field-level security
Record-level security	Sales representatives and new hires assigned to the same territory share access to sales records.	Record-level security
