Microsoft Power Automate RPA Developer Sample Questions (Q144-Q149):

NEW QUESTION # 144
You need to choose the two optical character recognition (OCR) engines that are able to extract text from the members' secondary identification.
Which two OCR technologies achieve this goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Azure Cognitive Services
- B. Google Tesseract engine
- C. IBM Cognitive Services
- D. Windows engine

Answer: A,B

NEW QUESTION # 145
A company plans to use Microsoft Power Platform
The company requires multiple test environments for users. The company wants to ensure that the Microsoft Power Platform environments are appropriate for the following cases:
* UserA wants to test Microsoft Power Platform features for a limited time.
* UserB wants to test solutions.
You need to select the environment type for each use case.
Which environment types should you select? To answer, drag the appropriate environment type to the correct scenarios. Each environment type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 146

You are designing an automation that processes information from documents attached to emails.

You need to extract data from the attachments and insert the data into a custom Microsoft Dataverse table.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer

Actions
Create a collection and add documents to the collection.
Create an object detection model.
Use the model in a desktop flow.
Create a custom form processing model.
Train and publish a model.
Add extracted data to the Microsoft Dataverse table.
Use the model in a cloud flow.

Answer:

Explanation:

Explanation:

Create a custom form processing model.

Create a collection and add documents to the collection.

Train and publish a model.

Use the model in a cloud flow.

Add extracted data to the Microsoft Dataverse table.

NEW QUESTION # 147

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse. Neither of these actions are dependent on each other.

You must minimize the amount of processing time require to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create two sequential Update Row actions.

Does the solution meet the goal?

- A. No
- B. Yes

**Answer: A**

NEW QUESTION # 148

You manage automation solutions for a company.

You need to select the appropriate patch type for each scenario.

Which patch types should you use? To answer, drag the appropriate patch types to the correct requirements.
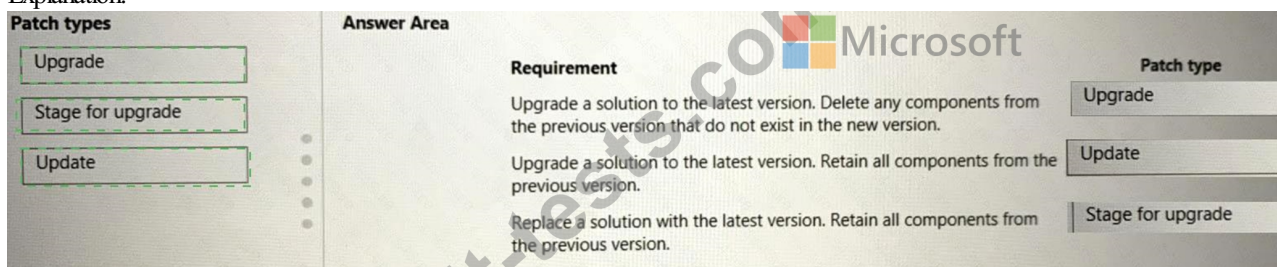

Each patch type may be used once, more than once, or not at all. You may need to drag the bar between panes or scroll to view content.
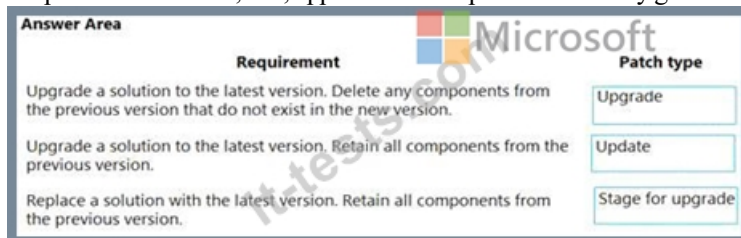

NOTE: Each correct selection is worth one point.

Patch types	Answer Area	
Upgrade	**Requirement**	**Patch type**
Stage for upgrade	Upgrade a solution to the latest version. Delete any components from the previous version that do not exist in the new version.	Patch type
Update	Upgrade a solution to the latest version. Retain all components from the previous version.	Patch type
	Replace a solution with the latest version. Retain all components from the previous version.	Patch type

Answer:

Explanation:

Patch types	Answer Area	
Upgrade	**Requirement**	**Patch type**
Stage for upgrade	Upgrade a solution to the latest version. Delete any components from the previous version that do not exist in the new version.	Upgrade
Update	Upgrade a solution to the latest version. Retain all components from the previous version.	Update
	Replace a solution with the latest version. Retain all components from the previous version.	Stage for upgrade

Explanation

Graphical user interface, text, application Description automatically generated

Answer Area	
Requirement	**Patch type**
Upgrade a solution to the latest version. Delete any components from the previous version that do not exist in the new version.	Upgrade
Upgrade a solution to the latest version. Retain all components from the previous version.	Update
Replace a solution with the latest version. Retain all components from the previous version.	Stage for upgrade
