NEW QUESTION # 22
A company has a custom web-based solution that is hosted on Azure. You design a Power Platform solution to provide the company additional capabilities.
You need to integrate the Power Platform solution with the web-based solution.
What should you recommend?

- A. Data gateway
- B. Connection reference
- C. Custom connector
- D. Desktop flow

Answer: C

Explanation:
A custom connector in Power Platform is a wrapper around a REST API that allows Power Automate or Power Apps to communicate with that REST API. Connectors created in Power Automate are available in Power Apps. Likewise, connectors created in Power Apps are available in Power Automate.

pass score in the real test.

Microsoft Power Platform Solution Architect Sample Questions (Q136-Q141):

NEW QUESTION # 136

Hotspot Question

You are designing a Power Platform solution for a company that provides in-home appliance maintenance. When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.

The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment.

You need to recommend the data type for the captured information.

Which data type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Data type
Capture information about the technician assigned to each service appointment.	Choice Choices Customer Lookup
Select the tools that the technician must bring to an appointment.	Choices Customer Lookup Text

Answer:

Explanation:

Answer Area

Text	

Explanation:

Box 1: LookUp

Box 2: Choices

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION # 138

You are designing forms for a Microsoft Power Platform solution. Each person must see only the columns required for their department.

Department	Requirements
Inside sales	- Use only a browser-based app. - Include fields for contact name, phone number, product, order date, and total amount owed.
Fulfillment	- Use either a mobile or browser-based app. - Include fields for contact name, product, and order date.
Field sales	- Use only a mobile app. - Include fields for contact name, address, phone number, and product.

You need to ensure that the forms open correctly, display only the fields needed, and that data can be entered quickly. How should you design the form?

- A. Create one form for each department. Add all columns needed for all departments. Use business rules to hide columns.
- B. Create one form for each department. Add only columns needed on the form for each department. Assign the appropriate security role to each form.
- C. Create a shared form for all departments. Add all the columns. Add column-level security to columns not needed for each department.
- D. Add new columns to an existing form. Grant all departments security roles for that form.

Answer: B

NEW QUESTION # 139

A company offers continuing education courses for medical professionals. Each time a course is offered, the company tracks that the session has taken place in an Excel workbook.

The company maintains a list of required qualifications for an educator to teach a course. Educator qualifications range from languages spoken to advanced degrees.

The company needs the following custom table relationships defined:

Associate educators with a list of their professional qualifications.

Assign a primary educator to each course that is held.
 Collect information about every course that is held.
 You need to determine the type of relationship that best fits the requirement.
 Which type of table relationship should you use? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

 **Requirement**
Microsoft
 Educators must be associated with their qualifications.

When a course is held there must be a primary educator assigned.

When a course is held, the company needs to collect information on that session.

Relationship

▼
Many-to-many relationship that uses a system generated table
Many-to-many relationship that uses a custom table
One-to-many relationship

▼
Many-to-many relationship that uses a system generated table
Many-to-many relationship that uses a custom table
One-to-many relationship

▼
Many-to-many relationship that uses a system generated table
Many-to-many relationship that uses a custom table
One-to-many relationship

Answer:

Explanation:

Requirement

Relationship

Educators must be associated with their qualifications.

▼
Many-to-many relationship that uses a system generated table
Many-to-many relationship that uses a custom table
One-to-many relationship

When a course is held there must be a primary educator assigned.

▼
Many-to-many relationship that uses a system generated table
Many-to-many relationship that uses a custom table
One-to-many relationship

When a course is held, the company needs to collect information on that session.

▼
Many-to-many relationship that uses a system generated table
Many-to-many relationship that uses a custom table
One-to-many relationship

Explanation

Requirement

Relationship

Educators must be associated with their qualifications.

▼
Many-to-many relationship that uses a system generated table
Many-to-many relationship that uses a custom table
One-to-many relationship

When a course is held there must be a primary educator assigned.

▼
Many-to-many relationship that uses a system generated table
Many-to-many relationship that uses a custom table
One-to-many relationship

When a course is held, the company needs to collect information on that session.

▼
Many-to-many relationship that uses a system generated table
Many-to-many relationship that uses a custom table
One-to-many relationship

Reference:

Box 1: One-to-many relationship

Each educator can have 0, 1, or many qualifications

Box 2: One-to-many relationship

Each educator can be the primary educator for 0, 1 or many courses.

Box 3: Many-to-many relationship that uses a custom table.

Note: N:N (Many-to-Many): A table relationship that depends on a special Relationship table, sometimes called an Intersect table, so that many rows of one table can be related to many rows of another table.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships>

NEW QUESTION # 140

A client plans to implement Microsoft Power Platform solutions.

The client identifies the following requirements for handling opportunities:

- * Users must follow the same set of steps each time they process opportunities
- * For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.
- * An error message must display if a follow-up date is not within seven days of the opportunity creation date.

You need to recommend tools to meet the client requirements.

What should you recommend? To answer, drag the appropriate tools to the correct requirement. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Business Rule	Users must follow the same set of steps each time they process opportunities.	
Business process flow	For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.	
Workflows	An error message must display if a follow-up date is not within seven days of the opportunity creation date.
