Pass Guaranteed 2025 Unparalleled Microsoft PL-600: Microsoft Power Platform Solution Architect Valid Test Question

Our company employs experts in many fields to write PL-600 study guide, so you can rest assured of the quality of our learning materials. What's more, preparing for the exam under the guidance of our PL-600 exam questions, you will give you more opportunities to be promoted and raise your salary in the near future. So when you are ready to take the exam, you can rely on our PL-600 Learning Materials. If you want to be the next beneficiary, what are you waiting for? Come and buy our PL-600 learning materials.

Microsoft Power Platform Solution Architect Sample Questions (Q47-Q52):

NEW QUESTION # 47

You are evaluating a solution design.

You need to test the following scenarios:

- * Mimic a user using an app.
- * Obtain formal approval that an app meets customer-provided criteria.
- * Confirmation that an app can manage expected peak loads.

Which test types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Scenario
Mimic a user using an app.

Obtain formal approval that an app meets customer-provided criteria.

Confirmation that an app can manage expected peak loads.

Test type

- Acceptance testing
- UI testing
- Acceptance testing
- Performance testing
- Load testing

- Acceptance testing
- Migration testing
- Acceptance testing
- Performance testing
- UI testing

- Performance testing
- Unit testing
- Acceptance testing
- Performance testing
- Integration testing

Answer:

Explanation:

Answer Area

Scenario

- Unit testing
- Acceptance testing
- Performance testing
- Integration testing

NEW QUESTION # 48

You are designing the security model for a Power Platform solution.

The security model must meet the following requirements:

Restrict sharing of data between Power Automate connectors.

Ensure that environment administrators only see users who require access in the enabled user list.

You need to recommend security features for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Feature
Restrict sharing of data between Power Automate connectors	☐ Security group ☐ Data loss prevention policy
Ensure that environment administrators only see users who require access in the enabled user list	☐ Security group ☐ Data loss prevention policy

Answer:

Explanation:

Requirement	Feature
Restrict sharing of data between Power Automate connectors	▼ Security group Data loss prevention policy
Ensure that environment administrators only see users who require access in the enabled user list.	▼ Security group Data loss prevention policy

Explanation

Requirement	Feature
Restrict sharing of data between Power Automate connectors	▼ Security group Data loss prevention policy
Ensure that environment administrators only see users who require access in the enabled user list.	▼ Security group Data loss prevention policy

Box 1: Data loss prevention policy

Data loss prevention (DLP) policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.

Box 2: Security group

If your company has multiple Microsoft Dataverse environments, you can use security groups to control which licensed users can be a member of a particular environment.

<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>

<https://docs.microsoft.com/en-us/power-platform/admin/control-user-access>

NEW QUESTION # 49

A company is creating a Microsoft Power Platform app to enable employees to log daily time entries. Employee user accounts are in multiple Azure AD tenants and are not located in the tenant that is running the app.

Employees must be added as Azure AD guest accounts within the tenant that will be running the app. Employees must access the model-driven app by being a member of a security team. The security team has been assigned the Employee Security role.

Employees must create personal views of records to view within the system.

You need to implement a security solution.

Which privilege should you use?

- A. Team
- B. Azure AD security group
- C. Shared app access
- D. Direct basic level

Answer: A

Explanation:

In Dynamics 365 and the Power Platform, teams can be used to assign security roles and control access to various entities and records. In this case, employees need to be members of a security team to access the model-driven app. The security team has already been assigned the Employee Security role.

By creating a team and adding employees as members, you can ensure that they have the necessary privileges and access to use the app effectively. The Employee Security role assigned to the team will define the permissions and access levels granted to the employees.

NEW QUESTION # 50

A company plans to deploy multiple Microsoft Dataverse environments. You are supporting the go-live process. The company reports the following access issues:

- * Users can access account records but cannot read a column in the table.
- * A licensed user receives an insufficient permission error when opening leads.
- * A licensed user does not appear in the list of users available for security assignment.

You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Issue	Action
Users can access account records but cannot read a column in the table.	Security role Security group Field security profile
A licensed user receives an insufficient permission error when opening leads.	Security role Security group Field security profile
A licensed user does not appear in the list of users available for security assignment.	Security role Security group Field security profile

Answer:

Explanation:

Issue	Action
Users can access account records but cannot read a column in the table.	Security role Security group Field security profile
A licensed user receives an insufficient permission error when opening leads.	Security role Security group Field security profile
A licensed user does not appear in the list of users available for security assignment.	Security role Security group Field security profile

Explanation:

Issue	Action
Users can access account records but cannot read a column in the table.	▼ Security role Security group Field security profile
A licensed user receives an insufficient permission error when opening leads.	▼ Security role Security group Field security profile
A licensed user does not appear in the list of users available for security assignment.	▼ Security role Security group Field security profile
