Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q209-Q214):

NEW QUESTION # 209

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

You must extend the class SalesLineType and add a new method that returns the day of week for the system's current date as an integer value. You need to create a class that extends SalesLineType and adds the new method.

Solution: You create the following code:

```
[ExtensionOf(typeof(SalesLineType))]
public class mySalesLineType_Extension
{
    public static int ExtensionMethodDayOfWeek()
    {
        return dayOfWeek(SystemDateGet());
    }
}
```

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 210

You need to map the target data fields in the Data management workspace for the custom data entity.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions
Refresh the entity list from the Data management workspace.
Validate data management from the Data management workspace.
Publish the entity.
Generate the correct target field mapping.
In the Data entities list, select Modify target mapping for the custom data entity.
In the Data entities list, select Target fields for the custom data entity.

Answer area

Answer:

Explanation:

Actions	Answer area
Refresh the entity list from the Data management workspace.	In the Data entities list, select Target fields for the custom data entity.
Validate data management from the Data management workspace.	Publish the entity.
Publish the entity.	Generate the correct target field mapping.
Generate the correct target field mapping.	
In the Data entities list, select Modify target mapping for the custom data entity.	
In the Data entities list, select Target fields for the custom data entity.	

NEW QUESTION # 211

A business needs a free-text field on the All customers form to enter notes about shipment requests. The field must allow users to enter a large number of characters.

You need to create a new extended data type (EDT) for the form.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

- Create a new EDT type of AnyType.
- Create a new EDT type of string.
- Change the length property on the new EDT to Note.
- Extend the All customers form and add the new EDT field.
- Add the new field to the CustTable.

Answer area

-
-
-
-

Answer:

Explanation:

Actions

- Create a new EDT type of AnyType.
- Create a new EDT type of string.
- Change the length property on the new EDT to Note.
- Extend the All customers form and add the new EDT field.
- Add the new field to the CustTable.

Answer area

- Create a new EDT type of string.
- Change the length property on the new EDT to Note.
- Extend the All customers form and add the new EDT field.
- Add the new field to the CustTable.

Explanation:

Actions

- Create a new EDT type of AnyType.

Answer area

- Create a new EDT type of string.
- Change the length property on the new EDT to Note.
- Extend the All customers form and add the new EDT field.
- Add the new field to the CustTable.

NEW QUESTION # 212

A company uses Dynamics 365 Finance. You are customizing elements for the extended data types (EDTs) shown in the following table.

EDT name	Comment
CalendarID	root EDT
CalendarName	root EDT
BasicCalendarID	derives from CalendarID

You have a Table named WorkCalendar. The table has a column named BasicCalendarID that uses the BasicCalendarID EDT. You need to increase the length of the column by using an extension. Solution: Create a derived EDT for CalendarName. Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 213
