Valid Test SC-401 Testking & SC-401 Free Practice Exams

The scoring system of our SC-401 exam torrent absolutely has no problem because it is intelligent and powerful. First of all, our researchers have made lots of efforts to develop the scoring system. So the scoring system of the SC-401 test answers can stand the test of practicability. Once you have submitted your practice. The scoring system will begin to count your marks of the SC-401 exam guides quickly and correctly. You just need to wait a few seconds before knowing your scores. The scores are calculated by every question of the SC-401 Exam guides you have done. So the final results will display how many questions you have answered correctly and mistakenly. You even can directly know the score of every question, which is convenient for you to know the current learning condition.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 2	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

Topic 3	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 4	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q47-Q52):

NEW QUESTION # 47

You have a Microsoft 365 E5 subscription.

You have a file named Customer.csv that contains a list of 1,000 customer names.

You plan to use Customer.csv to classify documents stored in a Microsoft SharePoint Online library.

What should you create in the Microsoft Purview portal, and which type of element should you select? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows the 'Create' dropdown menu in the Microsoft Purview portal. The 'Create' dropdown is open, showing three options: 'A sensitive info type', 'A trainable classifier', and 'An adaptive scope'. The 'Element' dropdown is also open, showing three options: 'Functions', 'Keyword dictionary', and 'Regular expression'.

Answer:

Explanation:

Answer Area

Create:

- A sensitive info type
- A trainable classifier
- An adaptive scope

Element:

- Functions
- Keyword dictionary
- Regular expression

NEW QUESTION # 48

HOTSPOT

You have a Microsoft 365 E5 subscription that uses Microsoft Purview.

You need ensure that an incident will be generated when a user visits a phishing website.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Type of policy to create:

- a Communication compliance
- a Data loss prevention (DLP)
- an Insider risk management

Prerequisite to complete:

- Create a sensitive service domain group.
- Deploy the Microsoft Defender Browser Protection extension.
- Deploy the Microsoft Purview extension.
- From Data Loss Prevention, configure the Service domains settings.

Answer:

Explanation:

Answer Area

Type of policy to create:

- a Communication compliance
- a Data loss prevention (DLP)
- an Insider risk management

Prerequisite to complete:

- Create a sensitive service domain group.
- Deploy the Microsoft Defender Browser Protection extension.
- Deploy the Microsoft Purview extension.
- From Data Loss Prevention, configure the Service domains settings.

Explanation:

Answer Area

Type of policy to create:

- a Communication compliance
- a Data loss prevention (DLP)
- an Insider risk management

Prerequisite to complete:

- Create a sensitive service domain group.
- Deploy the Microsoft Defender Browser Protection extension.
- Deploy the Microsoft Purview extension.
- From Data Loss Prevention, configure the Service domains settings.

Box 1: Insider Risk Management policies in Microsoft Purview can be configured to detect risky behavior, such as accessing phishing websites. These policies monitor user activity, generate alerts, and help organizations investigate potential security threats.

Box 2: Microsoft Defender Browser Protection extension helps in detecting unsafe or phishing websites and integrating this detection with Insider Risk Management policies. This extension works with Microsoft Edge and Google Chrome to identify risky browsing activity and trigger alerts.

NEW QUESTION # 49

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1 and the data loss prevention (DLP) policies shown in the following table.

Name	Priority	Rule
DLP1	0	Rule1
DLP2	1	Rule2
DLP3	2	Rule3
DLP4	3	Rule4

The DLP rules are configured as shown in the following table.

Rule	User notifications	Policy tip	If there's a match for this rule, stop processing additional DLP policies and rules
Rule1	On	Tip 1	Enabled
Rule2	On	Tip 2	Disabled
Rule3	On	Tip 3	Enabled
Rule4	On	Tip 4	Disabled

All the policies are assigned to Site1.

You need to ensure that if a user uploads a document to Site1 that matches all the rules, the user will be shown the Tip 2 policy tip. What should you do?

- A. Prevent additional processing of the policies if there is a match for Rule2
- B. Enable additional processing of the policies if there is a match for Rule1.
- C. Change the priority of DLP2 to 0.
- D. Change the priority of DLP2 to 3.

Answer: A

NEW QUESTION # 50

You have a Microsoft 365 E5 tenant.

You create a data loss prevention (DLP) policy.

You need to ensure that the policy protects documents in Microsoft Teams chat sessions.

Which location should you enable in the policy?

- A. SharePoint sites
- B. Teams chat and channel messages
- C. OneDrive accounts
- D. Exchange email

Answer: C

NEW QUESTION # 51

You have a Microsoft 365 E5 subscription that uses Microsoft Purview.

You are creating an exact data match (EDM) classifier named EDM1.

For EDM1, you upload a schema file that contains the fields shown in the following table.

Column name	Match mode
PP	EU Passport Number
Name	All Full Names
DateOfBirth	Single-token
AccountNumber	Multi-token

What is the maximum number of primary elements that EDM1 can have?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

In Microsoft Purview Exact Data Match (EDM) classifiers, a primary element is a unique, identifying field used for data matching. EDM allows up to two primary elements per schema.

From the provided table, the Match mode indicates how data is analyzed:

PP (EU Passport Number) # Likely a primary element because it's unique.

Name (All Full Names) # Typically not a primary element as names are common.

DateOfBirth (Single-token) # Usually a secondary element, not unique.

AccountNumber (Multi-token) # Can be a primary element, as it's a unique identifier.

Since EDM supports a maximum of two primary elements, the correct answer is 2.

NEW QUESTION # 52

.....

Many applicants do not fulfill their dream of becoming professionals because of using outdated exam preparation material. Failure in the Administering Information Security in Microsoft 365 exam leads them to anxiety. If this situation sounds familiar, do not waste time and get your hands on Microsoft SC-401 for exam preparation.
