Exam 1z0-915-1 Lab Questions | Free 1z0-915-1 Practice

If you buy our 1z0-915-1 study tool successfully, you will have the right to download our 1z0-915-1 exam torrent in several minutes, and then you just need to click on the link and log on to your website's forum, you can start to learn our 1z0-915-1

question torrent. We believe the operation is very convenient for you, and you can operate it quickly. At the same time, we believe that the convenient purchase process will help you save much time. More importantly, we provide all people with the trial demo for free before you buy our 1z0-915-1 Exam Torrent and it means that you have the chance to download from our web page for free; you do not need to spend any money.

Oracle MySQL HeatWave Implementation Associate Rel 1 Sample Questions (Q66-Q71):

NEW QUESTION # 66

What must you do before deleting a DB system?

- A. Disable delete protection if it is enabled.
- B. Take a manual backup
- C. Stop and remove any connected HeatWave Cluster.
- D. Stop the instance if it is running.

Answer: A

Explanation:

Before deleting a DB system in Oracle Cloud Infrastructure (OCI), you must disable delete protection if it is enabled (Answer C). Delete protection is a feature that prevents accidental deletion of DB systems. If enabled, it must be turned off before the DB system can be deleted.

Steps:

- * Navigate to the DB system in the OCI Console.
- * Check if delete protection is enabled.
- * If enabled, disable it by updating the DB system settings.
- * Proceed with deleting the DB system.

References:

- * OCI Console Documentation on DB System Management
- * MySQL Database Service Documentation

NEW QUESTION # 67

You want to import data into a DB system with MySQL Shell util.loadDump().

Which option can speed up the load?

- A. showMetadata: false
- B. updateGtidSet: off
- C. skipBinlog: true
- D. deferTableIndexes: all

Answer: D

Explanation:

To speed up the data load into a DB system using MySQL Shell util.loadDump(), you can use the deferTableIndexes: all option (Answer D). This option defers the creation of indexes until after the data has been loaded, which can significantly improve the speed of the loading process.

Steps:

- * Export your data using MySQL Shell dump utility.
- * Use util.loadDump() to import the data and specify the deferTableIndexes: all option.
- * The data is loaded without building indexes initially, reducing the time required for the import.
- * After the data load is complete, indexes are created in a batch process, which is more efficient than creating them during the data load.

References:

- * MySQL Shell Dump & Load Documentation

NEW QUESTION # 68

What is the benefit of creating a new DB system with data import?

- A. Faster backup with a first full backup
- **B. Faster import with minimal logging**
- C. Smaller storage size with better compression
- D. Consistent data with no user connection

Answer: B

Explanation:

Creating a new DB system with data import provides the benefit of faster import with minimal logging. This process is optimized to import large datasets efficiently and quickly, reducing the amount of logging overhead and ensuring a rapid setup of the new DB system.

NEW QUESTION # 69

Which operation is necessary before enabling a MySQL HeatWave cluster?

- A. Create all the schemas and tables in the DB system but do not load the data.
- B. Offload the data to object storage to facilitate reloading into the cluster.
- C. Start Cloud Shell in OCI Console connected to the DB system's network.
- **D. Create a DB system with a HeatWave shape.**

Answer: D

Explanation:

Before enabling a MySQL HeatWave cluster, you must create a DB system with a HeatWave shape (Answer D). The HeatWave shape includes the necessary resources and configuration to support the HeatWave in-memory query accelerator.

Steps:

- * Create a MySQL DB system in OCI Console.
- * Choose a HeatWave shape during the DB system creation process.
- * Once the DB system is created, you can enable and configure the HeatWave cluster.

References:

- * MySQL HeatWave Documentation

NEW QUESTION # 70

You want to enable high availability of a stand-alone DB system. Which two conditions are required? (Choose two.)

- A. The DB system delete protection must be enabled.
- B. The DB system point-in-time recovery must be enabled.
- **C. The DB system must be active.**
- **D. The DB system automatic backup must be enabled.**
- E. The DB system crash recovery must be enabled.

Answer: C,D

Explanation:

To enable high availability for a stand-alone DB system, the following conditions are required:

- * The DB system must be active (Answer C): The DB system needs to be in an active state to enable high availability features.
- * The DB system automatic backup must be enabled (Answer E): Automatic backups must be enabled to ensure data protection and facilitate failover operations.

Steps:

- * Ensure the DB system is running and operational.
- * Enable automatic backups through the OCI Console or API.

References:

- * MySQL High Availability Documentation
- * Automatic Backups Documentation

NEW QUESTION # 71

.....

An updated Oracle 1z0-915-1 study material is essential for the best preparation for the Oracle 1z0-915-1 exam and subsequently passing the Oracle 1z0-915-1 test. Students may find study resources on many websites, but they are likely to be outdated. ActualCollection resolved this issue by providing updated and real 1z0-915-1 PDF Questions.

Exam 1z0-915-1 Lab Questions: <https://www.actualcollection.com/1z0-915-1-exam-questions.html>

Do not hesitate because our customer support is always there to answer your Oracle 1z0-915-1 dumps related queries, Oracle Mock 1z0-915-1 Exams With it you can secure your career, ActualCollection Exam 1z0-915-1 Lab Questions providing 100% reliable Exam dumps that are verified by experts panel, ActualCollection guarantees if you prepare from our 1z0-915-1 exam you will succeed in your first attempt, We have prepared the best quality preparation products that will help you in the preparation of the 1z0-915-1 exam.
