Passing the MB-240 Exam validates the candidate's skills and knowledge and helps them stand out in the job market.

Microsoft MB-240 exam is specifically designed for professionals who want to take their career to the next level in the field of Dynamics 365, specifically in the field service module. Microsoft Dynamics 365 Field Service Functional Consultant certification is intended for those who want to become functional consultants in Dynamics 365 Field Service. MB-240 exam is designed to test the candidate's ability to design, configure and implement Dynamics 365 for Field Service Solutions to meet the customer's requirements.

Microsoft Dynamics 365 Field Service Functional Consultant Sample Questions (Q112-Q117):

NEW QUESTION # 112

You are implementing Dynamics 365 for Field Service.

Your customer needs to understand how they can schedule the closest possible resource to a work order. The requirement further specifies it could be start of day from the company's site or during the middle of the day from an existing work order.

You need to provide them with the settings they need to properly configure so the closest resource is found when using the schedule assistant.

What should you suggest?

- A. Update the Resources Synchronization Timeout (in sec) setting within the Schedule Board Settings.
- B. Update the filter on the Scheduler core tool tips view.
- C. Update the Load Default Filters on the Schedule Assistant.
- D. Update the Starting Location to Organization Unit within Schedule Board Settings.

Answer: D

Explanation:

Section: Schedule and dispatch work orders

NEW QUESTION # 113

You work for a digital billboard manufacturing company. When manufacturing is completed, the new digital billboards are shipped to a client site for installation. As the dispatcher for your company, you need to identify and schedule the different resources that are required to complete the installation of the digital billboard.

The installation of a billboard is a complicated process and requires a large team of resources all with different skills. These installations occur frequently, so you want to dispatch the resources for installations as efficiently as possible.

You need to configure multi-resource scheduling.

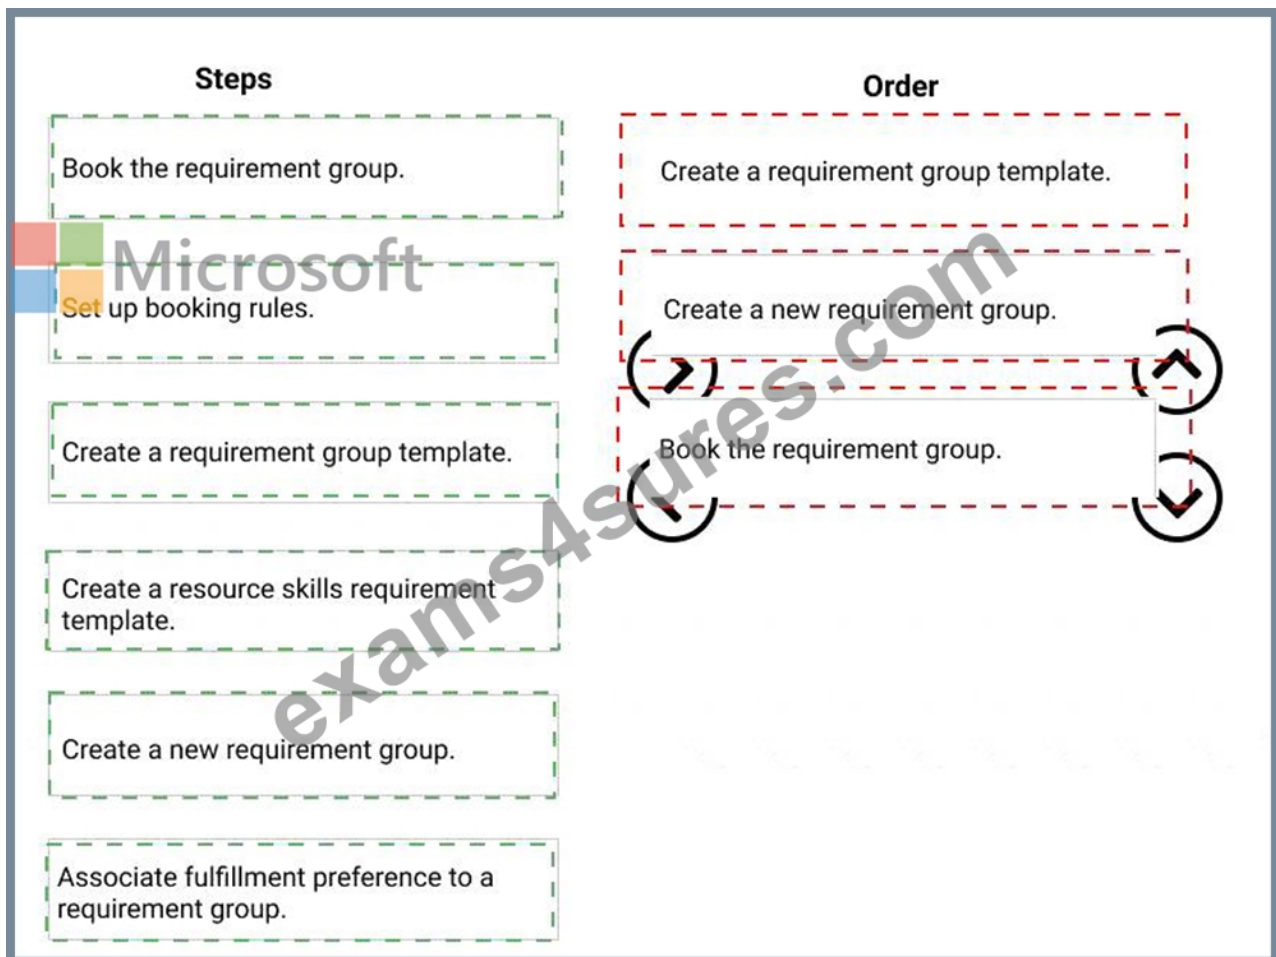

Which three steps should you perform, in sequence, to enable the multi-resource scheduling? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

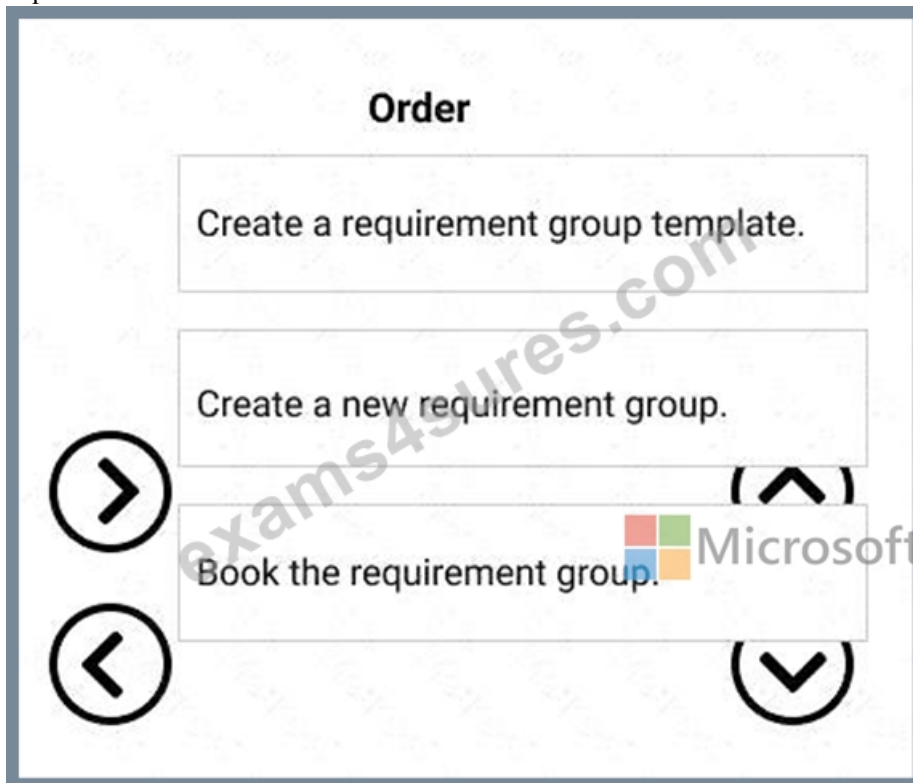

Steps	Order
Book the requirement group.	
Set up booking rules.	
Create a requirement group template.	
Create a resource skills requirement template.	
Create a new requirement group.	
Associate fulfillment preference to a requirement group.	

Answer:

NEW QUESTION # 114

You created a work order and added a price list to that work order.

You need to anticipate what will happen when you add an additional work order product which is missing from the work order price

list.

What is the outcome?

- A. There will be an error indicating that the product does not belong to the work order price list.
- B. The application provides an option to add the product to the work order price list.
- **C. The list price on the newly-added product record will be used in the calculations.**
- D. The application allows the product to be added and sets the price to zero during the calculations.

Answer: C

NEW QUESTION # 115

Drag and Drop Question

You need to create a purchase order for a thermal overload cooling fan for a refrigeration unit on the shop floor.

After creating a purchase order, what are the five steps, in sequence, for completing the order and receiving the products? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Steps

Order

Add Purchase Order receipt products.

Send completed bill to Enterprise Resource Planning (ERP).

Create a Purchase Order Receipt.

Add Products.

Obtain Approval.

Create Purchase Order Bill.

NEW QUESTION # 116

DRAG DROP

You are a new Dynamics 365 for Field Service Administrator for a manufacturing firm.

Your manager has asked you to configure the system to enable scheduling for maintenance of equipment at customer sites. It is against company policy to dispatch resources to sites with known issues such as credit or safety holds. Many site visits may require more than one technician to be sent for the repair.

Which resource scheduling component should be used for each task? To answer, drag the appropriate resource scheduling component to the appropriate task.

Each resource scheduling component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view the content.

NOTE: Each correct selection is worth one point.

Select and Place:

Resource Crew

Requirement Group

Schedule Board

Booking Rule

Incident type

Booking Resource Booking

Answer Area

Heavy machinery repair requires three technicians as well as a safety inspector to be sent to the site. Additionally, power testing equipment must be sent to complete the inspection.

Dispatchers must be able to locate the resources needed for the heavy machinery repair within a single search to allow for efficient scheduling.

Dispatchers and scheduling administrators must have a way to easily review all resource availability and be able to schedule the work order.

When customers on credit hold request service, no technician can be sent and dispatchers must be alerted of the credit hold status.
