P.S. Free & New H19-301_V4.0 dumps are available on Google Drive shared by BrindumpsIT: <https://drive.google.com/open?id=1hWNg2JlI5O6eqtv6SRQS1nVfqQjPZzw2>

Our H19-301_V4.0 quiz torrent boost 3 versions and they include PDF version, PC version, App online version. Different version boosts different functions and using method. For example, the PDF version is convenient for the download and printing our H19-301_V4.0 exam torrent and is easy and suitable for browsing learning. And the PC version of H19-301_V4.0 Quiz torrent can stimulate the real exam's scenarios, is stalled on the Windows operating system. You can use it any time to test your own Exam stimulation tests scores and whether you have mastered our H19-301_V4.0 exam torrent.

We always try to find ways to accelerate our customers' professional ability and offer the best quality of H19-301_V4.0 dumps pdf among dumps vendors. So we decided to create the H19-301_V4.0 real dumps based on the requirement of the certification center and cover the most knowledge points of H19-301_V4.0 Practice Test. Our study guide will be your first choice as your exam preparation materials.

H19-301_V4.0 Exam Experience | H19-301_V4.0 Latest Exam Format

With the rapid development of the world economy and frequent contacts between different countries, the talent competition is

increasing day by day, and the employment pressure is also increasing day by day. If you want to get a better job and relieve your employment pressure, it is essential for you to get the H19-301_V4.0 Certification. However, due to the severe employment situation, more and more people have been crazy for passing the H19-301_V4.0 exam by taking examinations, the exam has also been more and more difficult to pass.

Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q93-Q98):

NEW QUESTION # 93

Which of the following factors is not related to the AI computing network?

- A. Cluster availability
- B. Cluster scale
- C. Single-card computing power
- D. Cluster efficiency

Answer: C

Explanation:

An AI computing network focuses on interconnecting large numbers of servers and AI accelerators to:

Scale the cluster size efficiently (A)

Ensure cluster-wide efficiency in data exchange and training convergence (B) Maintain high availability of the overall AI computing system (C) D: Single-card computing power refers to individual GPU/AI chip capabilities, which is a hardware-level concern, not a network-level performance factor.

NEW QUESTION # 94

Huawei's high-quality 10 Gbps campus network is experience-centric, providing high-quality network services for various industries based on three types of experience upgrade.

- A. True
- B. False

Answer: A

Explanation:

Huawei's 10 Gbps campus network solution is described as "experience-centric," aiming to:

Improve wireless performance with Wi-Fi 7 and interference mitigation (Wireless experience).

Enable AI-driven operations and centralized visualization (O&M experience).

Ensure deterministic application delivery via traffic identification and smart QoS (Application experience).

This triad forms the core of Huawei's experience-based networking model for education, healthcare, finance, and enterprise sectors.

#####

NEW QUESTION # 95

Which of the following statements is false about the WAC + Fit AP networking solution?

- A. The WAC is responsible for WLAN access control, traffic forwarding and statistics collection, AP configuration monitoring, and roaming management.
- B. The AC and Fit APs communicate through SNMP.
- C. The WAC controls and manages Fit APs.
- D. A Fit AP encrypts and decrypts 802.11 packets, provides 802.11 physical layer functions, and collects air interface statistics.

Answer: B

Explanation:

In a WAC (Wireless Access Controller) + Fit AP architecture:

A, B, and C are accurate descriptions.

D is false: The AC (WAC) and Fit APs do not use SNMP for communication. Instead, they communicate using CAPWAP (Control And Provisioning of Wireless Access Points) protocol, which supports control, management, and data encapsulation between ACs and APs.

SNMP is used for network management and monitoring but is not the protocol for AC-to-AP communication in WLAN scenarios.

NEW QUESTION # 96

Huawei NetEngine AR651EW is Huawei's first Wi-Fi 6-capable router.

- A. True
- B. False

Answer: A

Explanation:

The Huawei NetEngine AR651EW is a compact, all-in-one enterprise branch router that integrates:

LTE uplink

Wi-Fi 6 capability (802.11ax)

SD-WAN access

Security functions such as IPS and firewall

It is indeed Huawei's first edge router with built-in Wi-Fi 6 functionality, targeting small and medium-sized enterprise branches that require wireless access and SD-WAN features in a single device.

#####

NEW QUESTION # 97

Which of the following are the highlights of Huawei's NetEngine 8000 X series routers? (Select all that Apply)

- A. All-in-one multi-service platform, supporting all-service capabilities (SR/BNG/CGN/IPsec/SA 5-in-1 design)
- B. Larger capacity and higher performance, 19.2T per slot
- C. High-density 100GE
- D. Multi-platform convergence (e.g., P/PE, private line, IGW, and DC-GW scenarios)
- E. Large-scale Layer 2 and Layer 3 services

Answer: A,C,D,E

Explanation:

Huawei's NetEngine 8000 X series routers offer these major highlights:

A: Support for large-scale L2/L3 services: Ideal for both enterprise and carrier networks B: High-density 100GE ports: Suitable for

high-bandwidth core and metro scenarios C: Multi-service 5-in-1 design: SR, BNG, CGN, IPsec, and Security Architecture (SA)

E: Multi-platform convergence: Deployed in roles such as Provider Edge, Internet Gateway (IGW), and DC-Gateway (DC-GW)

D: 19.2T per slot is a specification for core DC switches, not typically associated with the NetEngine 8000 X series, which has lower per-slot capacity.
