

Most Probable Real SAVE International Exam Questions in VMA PDF Format

2025 Latest PrepAwayETE VMA PDF Dumps and VMA Exam Engine Free Share: <https://drive.google.com/open?id=1iOk9mUmuahEp5TGa0zhoxcqH4T8tFzOh>

The company is preparing for the test candidates to prepare the VMA Study Materials professional brand, designed to be the most effective and easiest way to help users through their want to get the test VMA certification and obtain the relevant certification. In comparison with similar educational products, our training materials are of superior quality and reasonable price, so our company has become the top enterprise in the international market.

Questions in desktop-based mock exams are identical to the real ones. Our practice exams give you options to change their durations and questions' numbers to polish your skills. You can easily assess your readiness with the assistance of results produced by the practice exam. This Value Methodology Associate software records all your previous takes so you can identify your mistakes and overcome them before the final attempt. The Value Methodology Associate (VMA) desktop practice exam software works only on Windows operating system.

VMA - Newest Valid Value Methodology Associate Test Pattern

We are quite confident that all these SAVE International VMA exam dumps feature you will not find anywhere. Just download the SAVE International VMA and start this journey right now. For the well and SAVE International VMA Exam Dumps preparation, you can get help from SAVE International VMA which will provide you with everything that you need to learn, prepare and pass the Value Methodology Associate (VMA) certification exam.

SAVE International Value Methodology Associate Sample Questions (Q54-Q59):

NEW QUESTION # 54

Which of the following techniques involves capturing input from multiple customers and stakeholders at the same time?

- A. Interviews
- B. Surveys
- C. Focus panels
- D. Questionnaires

Answer: C

Explanation:

In Value Methodology (VM), gathering input from customers and stakeholders is a key activity, particularly during the Information Phase of the VM Job Plan, as taught in the VMF 1 course (Core Competency #3:

Value Methodology Job Plan). According to SAVE International's Value Methodology Standard, various techniques are used to collect stakeholder input, including interviews, questionnaires, surveys, and focus panels. The standard defines these as follows:

- * Interviews: One-on-one discussions with individual stakeholders to gather detailed insights.
- * Questionnaires: Written sets of questions distributed to stakeholders, typically completed individually.
- * Surveys: Similar to questionnaires, often distributed to a larger group, with responses collected individually.
- * Focus panels: Group discussions involving multiple customers and stakeholders simultaneously, designed to capture collective input and foster dialogue.

The question specifies a technique that involves capturing input "at the same time" from multiple customers and stakeholders, which aligns with the definition of focus panels. Focus panels (or focus groups) bring together diverse stakeholders in a single session to discuss needs, preferences, and concerns, allowing for real-time interaction and consensus-building, which is particularly useful in VM studies to understand project objectives and constraints.

- * Option A (Interviews) is incorrect because interviews are typically conducted one-on-one, not with multiple stakeholders simultaneously.
- * Option B (Questionnaires) is incorrect because questionnaires are completed individually, not in a group setting at the same time.
- * Option C (Surveys) is incorrect because surveys are also completed individually, often asynchronously, not at the same time.
- * Option D (Focus panels) is correct, as it involves capturing input from multiple stakeholders simultaneously in a group setting.

:

SAVE International, "Value Methodology Standard and Body of Knowledge," available at <https://www.value-eng.org>, detailing stakeholder engagement techniques in the Information Phase.

SAVE International, VMF 1 Core Competency #3 (Value Methodology Job Plan), emphasizing methods like focus panels for gathering collective stakeholder input.

NEW QUESTION # 55

Which function is located to the left of the left vertical line in a FAST diagram?

- A. Lower Order Function
- B. Secondary Function
- C. Basic Function
- D. Higher Order Function

Answer: D

Explanation:

The Function Analysis System Technique (FAST) diagram is a key tool in Value Methodology's Function Analysis phase, as taught in the VMF 1 course (Core Competency #2). FAST diagrams map the relationships between functions, with the horizontal axis showing the "how-why" logic (critical path) and vertical lines called scope lines defining the study's boundaries. According to SAVE International's Value Methodology Standard, "the left vertical line in a FAST diagram is a scope line, and the function immediately to its right is typically the higher-order function, which represents the overarching goal or need for the system." The function to the left of the left scope line is outside the study's scope and often represents an even broader objective or external assumption that drives the higher-order function. However, in standard FAST diagramming, the higher-order function is the closest function to the left scope line within the scope, and functions to the left of the scope line (e.g., P in the diagram from Question 30) are external.

In the context of the VMA exam and VMF 1, the question likely tests the understanding of the higher-order function's position relative to the scope line. As established in Question 18, Function E (just inside the left scope line B) is the higher-order function. Functions to the left of the left scope line (e.g., P) are typically external assumptions or broader objectives, but the options provided (A, B, C, D) refer to standard function classifications within the FAST framework. The higher-order function (C) is the most relevant choice, as it is the function closest to the left scope line within the study's scope, and the question may be interpreted as asking for the function type associated with that position.

- * Option A (Basic Function) is incorrect because the basic function is typically more central on the critical path, not at the far left.
- * Option B (Secondary Function) is incorrect because secondary functions are vertical (supporting the critical path), not on the main path near the left scope line.

* Option C (Higher Order Function) is correct, as the higher-order function is located just to the right of the left scope line (e.g., Function E), and the question may be interpreted in this context based on standard FAST conventions.

* Option D (Lower Order Function) is incorrect because lower-order functions are to the right of the basic function, representing more specific outcomes, not near the left scope line.

:

SAVE International, VMF 1 Core Competency #2 (Function Analysis), defining the position of the higher-order function in FAST diagrams.

SAVE International, "Value Methodology Standard," section on Function Analysis, describing FAST diagramming conventions, including the role of scope lines and higher-order functions.

NEW QUESTION # 56

The Pareto Principle as applied in the Value Methodology means:

- A. 20% of risks impact 80% of elements
- B. 80% of the whole includes 20% of the resources
- C. 80% of functions represent 20% of components
- **D. 20% of elements represent 80% of the cost**

Answer: D

Explanation:

The Pareto Principle, often referred to as the 80/20 rule, is a concept used in Value Methodology to focus efforts on the most impactful areas during cost analysis. In the context of VM, as taught in the VMF 1 course (Core Competency #4: Cost Analysis), the Pareto Principle is applied to identify high-cost areas that offer the greatest potential for value improvement. According to SAVE International's Value Methodology Standard,

"the Pareto Principle in VM states that approximately 20% of the elements (components, functions, or items) typically account for 80% of the total cost." This allows the VM team to prioritize their efforts on the small number of elements that drive the majority of the cost, thereby maximizing value improvement (function /cost). For example, in a project, a few components (like a specialized motor in a machine) might represent the bulk of the cost, and optimizing those components can yield significant savings.

* Option A (20% of risks impact 80% of elements) is incorrect because the Pareto Principle in VM focuses on cost distribution, not risk impact.

* Option B (20% of elements represent 80% of the cost) is correct, as it directly aligns with the application of the Pareto Principle in VM cost analysis.

* Option C (80% of functions represent 20% of components) is incorrect because it reverses the principle and does not reflect the cost-focused application in VM.

* Option D (80% of the whole includes 20% of the resources) is incorrect because it misapplies the principle and is too vague for VM's specific use of Pareto in cost analysis.

:

SAVE International, "Value Methodology Standard and Body of Knowledge," available at <https://www.value-eng.org>, section on cost analysis, referencing the Pareto Principle for identifying high-cost elements.

SAVE International, VMF 1 Core Competency #4 (Cost Analysis), emphasizing the use of the Pareto Principle to focus on high-cost areas.

NEW QUESTION # 57

Which of the following best describes a VM study?

- A. Must be led by a Certified Value Specialist
- **B. It is a structured effort using the VM process to improve value**
- C. Is undertaken after the design is completed
- D. Is considered a business improvement best practice

Answer: B

Explanation:

A Value Methodology (VM) study is a structured effort that applies the VM process to improve the value of a project, product, or process by optimizing the function-to-cost ratio. According to SAVE International's Value Methodology Standard, a VM study is defined as "a systematic application of recognized techniques by a multi-disciplined team to identify the functions of a project or process, establish a worth for each function, and develop alternatives to achieve those functions at the lowest overall cost while

maintaining performance." The VMF 1 course emphasizes that a VM study follows the six-phase VM Job Plan (Information, Function Analysis, Creative, Evaluation, Development, and Presentation) to systematically improve value, making it a structured effort.

* Option A (structured effort using the VM process) directly aligns with SAVE International's definition of a VM study, focusing on the systematic application of the VM process to enhance value.

* Option B (must be led by a Certified Value Specialist) is incorrect because, while a Certified Value Specialist (CVS) often leads VM studies, the VMF 1 course and VMA certification allow non-CVS team members to participate in and contribute to VM studies under guidance, meaning it's not a requirement.

* Option C (undertaken after the design is completed) is incorrect because VM studies can be conducted at various stages of a project lifecycle-concept, design, or implementation-not only after the design is completed. The VMF 1 course highlights that early application of VM yields the greatest benefits.

* Option D (business improvement best practice) is a broader statement and not specific to the definition of a VM study, though VM can contribute to business improvements. It does not best describe a VM study compared to Option A.

:

SAVE International, "Value Methodology Standard and Body of Knowledge," available at <https://www.value-eng.org>, defining a VM study as a structured process to improve value.

SAVE International, "Value Methodology Associate (VMA) Certification," <https://www.value-eng.org/page/VMA>, referencing VMF 1 Core Competency #1 (Value Methodology Overview).

NEW QUESTION # 58

When transforming subject scope information, it is most important that the VM study team have a clear understanding of:

- A. the interests and influence of customers, users, and stakeholders.
- B. the Pareto chart, risk data, and quality expectations.
- **C. the subject's purpose and the objectives of the VM study.**
- D. value improvement ideas and performance attributes.

Answer: C

Explanation:

Transforming subject scope information occurs during the Information Phase of the Value Methodology (VM) Job Plan, as taught in the VMF 1 course (Core Competency #3: Value Methodology Job Plan).

According to SAVE International's Value Methodology Standard, "when transforming subject scope information, the VM study team must have a clear understanding of the subject's purpose (what it does and why it exists) and the objectives of the VM study (e.g., reduce costs by 15%, improve performance)." This understanding ensures that the team aligns the study with the project's goals and the VM process's aims, setting the foundation for effective function analysis and value improvement. This aligns with the primary objective of the Information Phase-to understand the subject-and the focus of the kickoff meeting on outlining goals and objectives. While stakeholder interests and other data are important, the most critical understanding is of the subject's purpose and study objectives.

* Option A (value improvement ideas and performance attributes) is incorrect because value improvement ideas are developed later (Creativity Phase, Question 49), and performance attributes are a subset of the broader purpose.

* Option B (the subject's purpose and the objectives of the VM study) is correct, as it captures the most important understanding needed during the Information Phase.

* Option C (the Pareto chart, risk data, and quality expectations) is incorrect because these are specific tools or data points, not the most critical understanding; Pareto charts apply later.

* Option D (the interests and influence of customers, users, and stakeholders) is incorrect because, while important, this is a subset of understanding the subject's purpose and study objectives, which are more fundamental.

:

SAVE International, "Value Methodology Standard and Body of Knowledge," available at <https://www.value-eng.org>, emphasizing the need to understand the subject's purpose and study objectives in the Information Phase.

SAVE International, VMF 1 Core Competency #3 (Value Methodology Job Plan), highlighting the focus on purpose and objectives (consistent with Questions 39 and 50).

NEW QUESTION # 59

.....

The SAVE International VMA Exam registration fee varies between 100 usd and 1000 usd, and a candidate cannot risk wasting his time and money, thus we ensure your success if you study from the updated SAVE International VMA practice material. We offer

the demo version of the actual SAVE International VMA questions so that you may confirm the validity of the product before actually buying it, preventing any sort of regret.

VMA Answers Real Questions: <https://www.prepawayete.com/SAVE-International/VMA-practice-exam-dumps.html>

yes the dumps like the SAVE International VMA practice exam really helps a candidate for the exams, SAVE International Valid VMA Test Pattern Our products can help more and more candidates obtain certifications as soon as possible and realize the ideal, The content of VMA quiz torrent materials also 100 percent based on real exam, accumulated from previous exam points and the newest information to practice, Therefore, our VMA study materials are attributive to high-efficient learning.

Using the Drawing Toolbar, Connect to Wi-Fi Networks, yes the dumps like the SAVE International VMA Practice Exam really helps a candidate for the exams, Our products can help more VMA and more candidates obtain certifications as soon as possible and realize the ideal.

100% Pass 2025 SAVE International Professional VMA: Valid Value Methodology Associate Test Pattern

The content of VMA quiz torrent materials also 100 percent based on real exam, accumulated from previous exam points and the newest information to practice.

Therefore, our VMA study materials are attributive to high-efficient learning, The PrepAwayETE recognizes that students may have different learning styles and preferences.
