New CAD Exam Questions | CAD Reliable Dumps Files

If you want to improve your career prospects, obtaining Certified Application Developer-ServiceNow, CAD exam certificate is a great way for you. Certified Application Developer-ServiceNow certificate will help you land a job in the industry. After passing the Certified Application Developer-ServiceNow you can increase your earning potential. This is because employers are ready to pay more for candidates who have passed the ServiceNow CAD Certification test. Success in the CAD exam can impact your promotion. If you are already an employee you can promote yourself to the highest level after passing the ServiceNow CAD test.

ServiceNow CAD Exam is a valuable certification for developers who want to demonstrate their expertise in building and maintaining applications on the ServiceNow platform. Certified Application Developer-ServiceNow certification can help professionals stand out in a crowded job market and increase their earning potential. Additionally, the certification provides developers with access to a network of other certified professionals and resources, including ongoing education and training opportunities.

ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q222-Q227):

NEW QUESTION # 222

When working in the Form Designer, configuring the label of a field in a child table changes the label on which table(s)?

- A. child table
- B. base table
- C. all tables
- D. parent table

Answer: A

Explanation:

Configuring the label of a field in a child table changes the label only on that table, not on the base table or the parent table. The base table is the table that contains the common fields for all the extended tables, and the parent table is the table that is directly extended by the child table. The label of a field on the base table or the parent table can be different from the label on the child table.

References: [ServiceNow Docs - Table extension], [ServiceNow Community - How to change field label in child table]

NEW QUESTION # 223

One of the uses of the ServiceNow REST API Explorer is:

- A. Convert SOAP Message functions to REST methods
- B. Create sample code for sending REST requests to ServiceNow
- C. Practice using REST to interact with public data providers
- D. Find resources on the web for learning about REST

Answer: B

Explanation:

Explanation/Reference: <https://developer.servicenow.com/dev.do#!/learn/courses/newyork/>

NEW QUESTION # 224

When writing a Client Script to provide feedback targeted at a specific field, which method should be used?

- A. `g_form.showFieldMsg()`
- B. `g_form.addFieldMsg()`
- C. `g_form.addInfoMessage()`
- D. `g_form.showInfoMessage()`

Answer: A

Explanation:

https://docs.servicenow.com/bundle/tokyo-application-development/page/script/useful-scripts/reference/r_DisplayFieldMessages.html

NEW QUESTION # 225

What is the REST API Explorer used to do?

- A. Convert SOAP Message functions to REST methods
- **B. Create sample code for sending REST requests to ServiceNow**
- C. Practice using REST to interact with public data providers
- D. Find resources on the web for learning about REST

Answer: B

Explanation:

One of the uses of the ServiceNow REST API Explorer is to create sample code for sending REST requests to ServiceNow. The REST API Explorer is a tool that allows you to discover and test the ServiceNow REST APIs. You can select an API endpoint, set the HTTP method, parameters, headers, and body, and then execute the request. The REST API Explorer will show you the response status, headers, and body, as well as generate sample code for various languages and frameworks, such as cURL, Java, JavaScript, Node.js, Python, Ruby, and more. NEW QUESTION # 226

When creating an application through the Guided Application Creator, which of the following is NOT an option for creating a table?

- A. Extend a table
- B. Create table from scratch
- C. Upload spreadsheet
- **D. Create table from template**

Answer: D

Explanation:

Create table from template is not an option for creating a table through the Guided Application Creator. The other options are available for creating a table in the app. Upload spreadsheet allows you to import data from an Excel file and create a table based on the spreadsheet columns and rows. Extend a table allows you to create a child table that inherits fields and behaviors from a parent table. Create table from scratch allows you to define your own fields and data types for a new table.
