Microsoft MS-721 Exam Dumps - Pass Exam in One Go

Dear everyone, you can download the MS-721 free demo for a little try. If you are satisfied with the MS-721 exam torrent, you can make the order and get the latest MS-721 study material right now. Our MS-721 training material comes with 100% money back guarantee to ensure the reliable and convenient shopping experience. The accurate, reliable and updated Microsoft MS-721 study torrent are compiled, checked and verified by our senior experts, which can ensure you 100% pass.

Microsoft MS-721 certification exam is a beta exam, which means that it is still in the development phase, and the questions are under review. The beta exam provides an opportunity for the candidates to take the exam at a reduced cost and provide feedback on the exam questions. The feedback received from the candidates will be used to improve the exam questions and ensure that the exam accurately measures the candidate's skills and knowledge. Passing the Microsoft MS-721 certification exam will validate the candidate's expertise in designing and deploying communication and collaboration solutions using Microsoft technologies and help them advance their career in this field.

Earning a Microsoft MS-721 Certification can help IT professionals advance in their careers by demonstrating their expertise in collaboration and communication systems. Collaboration Communications Systems Engineer certification can also help organizations identify and hire qualified professionals who can design and manage effective communication and collaboration systems.

Microsoft Collaboration Communications Systems Engineer Sample Questions (Q190-Q195):

NEW QUESTION # 190

You need to connect the analog intercoms to Teams Phone.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a trusted application endpoint for Teams.
- **B. Register the ATAs with a Teams-certified SBC.**
- C. Create a resource account for each intercom.
- **D. Enable Direct Routing to a Teams-certified SBC.**
- E. Create a configuration profile for IP phones.

Answer: B,D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/direct-routing-analog-devices> This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

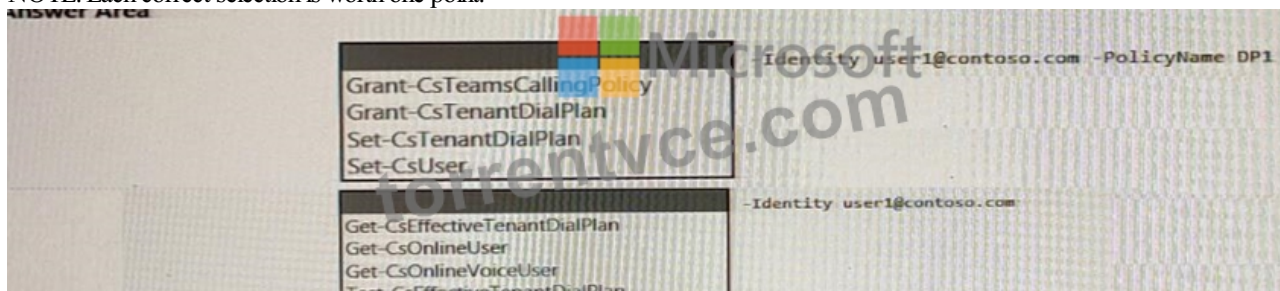

NEW QUESTION # 191

You have a dial plan named DPI.

You need to assign DPI to a new Microsoft Teams user named User1. You must verify that the appropriate dial plan and the associated normalization rules are assigned to User1.

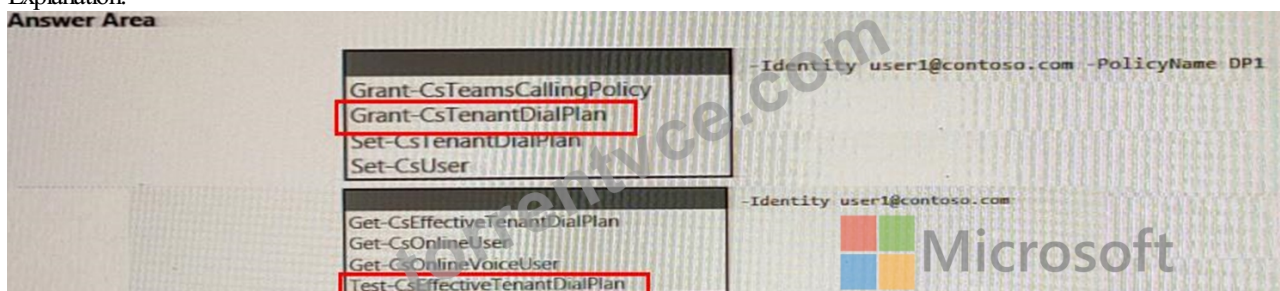

How should you complete the PowerShell script? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 192

You need to provide Microsoft Teams users with the ability to perform PSIN calling through a Session Border Controller (SBC). Which licenses can you assign to achieve the goal?

- A. Office 365 E3 or Office 365 E5
- B. Microsoft 365 E3 or Microsoft 365 E5
- C. Microsoft 365 E5 or Office 365 E5
- **D. Office 365 E3 or Microsoft 365 E3**

Answer: D

NEW QUESTION # 193

Case Study 1 - Litware, Inc

Overview

Litware, Inc. is an online retailer.

Litware is replacing its telephony platform with Microsoft Teams Phone.

Currently, all users are assigned Microsoft 365 E3 licenses.

Existing Environment

Telephony Environment

The existing telecommunications system has several third-party IP-PBXes at the corporate and warehouse sites. Currently, the PBXes are linked through the corporate WAN and an inter-office dial plan is in place.

A unique PSTN direct inward dial (DID) is assigned to each user. The last five digits of each DID are used as an extension.

Litware piloted Microsoft Skype for Business Server Enterprise Voice, but has since decided to migrate directly to Teams Phone.

During the pilot, a response group was created, and the response group is still in use. Agents in the response group use Skype for Business Server- certified handsets.

Locations

Litware has global retail stores and datacenters.

The telephony topology contains the following four types of sites:

Corporate sites

The corporate sites contain information workers who collaborate by using the Teams desktop client and SharePoint Online.

The reception desk at each corporate site has an analog intercom with an integrated door control.

Each intercom connects to an existing PBX by using an FXS Analog Telephony Adapter (ATA).

SIP trunks are delivered directly to the site by using a resilient WAN that connects directly to the on-site PBX solution.

Warehouse sites

The warehouse sites are critical to the business. Users at these sites use either the Teams desktop client or the Teams mobile client.

Each warehouse has a public announcement (PA) system that connects to the PBX by using a SIP ATA, along with the sites' existing ISDN trunks.

Currently, users at the company's warehouse in Georgia can call the PA system by dialing 123456.

All calls to emergency services from the warehouses are played over the warehouses' PA system automatically.

WAN connectivity at the warehouses can be unreliable, so local PSTN connectivity is preferred as compared to centrally hosted connectivity.

Retail sites

Each retail site has only one or two desk phones and a specialized point of sale (POS) computer that cannot run the desktop or web versions of the Teams client.

Users at the retail sites have the Teams app and an associated data plan installed on their mobile device.

Currently, each retail uses a managed SD-WAN appliance to connect to both the internet and the corporate WAN.

The users report that in the event of an internet outage at the retail sites, they can use their mobile devices, which have strong reception.

Requirements

Planned Changes

Litware plans to implement the following changes:

Maintain the existing emergency call PA integration.

Replace the existing IP-PBX solutions by using Teams Phone.

Consolidate all its PSTN trunks by using region-specific datacenters, whenever possible. During the planned deployment of Teams Phone, Litware will open a new retail site in the United Kingdom that will have five users. Litware does not have any existing telephony in the United Kingdom. Management at the new retail site wants to use Microsoft Teams Calling Plans for the users.

You are opening a new warehouse site in Melbourne. The new warehouse will connect to a phone carrier by using a Session Border Controller (SBC). Dialing rules are an area code of two digits beginning with a zero followed by a subscriber number of eight digits. For example, an

E.164 number of +61370105550 will be translated to 03 7010 5550 and +61255505550 will be translated to 02 5550 5550.

Technical Requirements

Litware identifies the following technical requirements:

Minimize the amount of voice traffic over the WAN.

Whenever possible, use natively supported Teams solutions.

Avoid replacing existing analog device adapters and SIP phones.

Assign a Microsoft 365 Phone System license to all the users listed in a CSV file.

Ensure that the retail sites can place and receive calls in the event of a WAN failure.

Assign a phone number of +61370105550 to a user named User1. User1 is located at a corporate site. Ensure that the warehouse sites maintain calling in the event of an internet outage or Teams service failure. Provide users at the United Kingdom retail site with phone numbers. The users must only be allowed to make in-country calls. Replace the response group from the Skype for Business Server Voice Enterprise pilot with a call queue. The agents must be able to use their existing handset.

Hotspot Question

You need to assign a phone number to User1 to meet the technical requirements.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft

	▼	-Identity User1@Litwareinc.com
Set-CsUser		
Set-CsOnlineVoiceUser		
Update-MgTeamMember		
Update-MgUserProfilePhone		

	▼
-LineURI	
-OnPremLineURI	
-TelephoneNumber	

"tel:+61370105550" -EnterpriseVoiceEnabled
\$true -ErrorAction Stop

Answer:

Explanation:

Answer Area

	▼	-Identity User1@Litwareinc.com
Set-CsUser		
Set-CsOnlineVoiceUser		
Update-MgTeamMember		
Update-MgUserProfilePhone		

	▼
-LineURI	
-OnPremLineURI	
-TelephoneNumber	

"tel:+61370105550" -EnterpriseVoiceEnabled
\$true -ErrorAction Stop

Explanation:

Here it says Litware will use a direct routing solution, therefore is -OnPremLineURI.

Those babbling about deprecation and stuff should also search with what is going to be substituted with (hint: is NOT LineURI, but a dedicated cmd-let).

It's for sure Set-CsUser -OnPremLineURI.

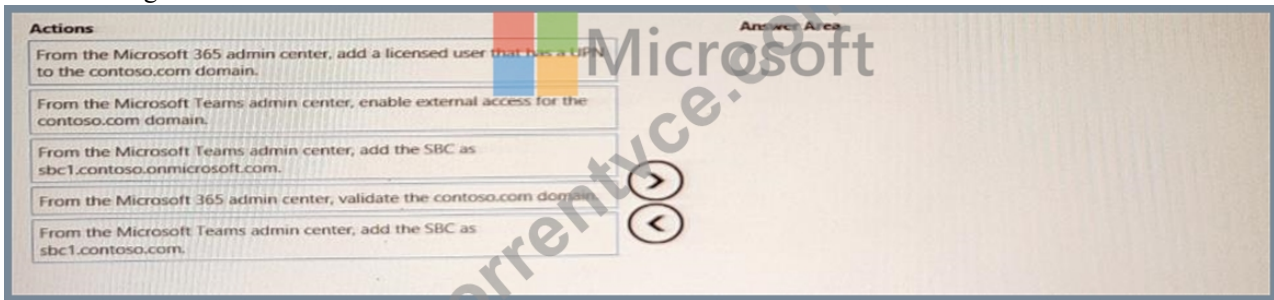

NEW QUESTION # 194

You have a Microsoft Teams Phone deployment.

When you attempt to deploy a Session Border Controller (SBC) named sbc1.xontoso.com, you receive the following error message: "We can't use the "SBC1-Contoso.com" domain as it hasn't been set up in the organization. Try again. If you continue to

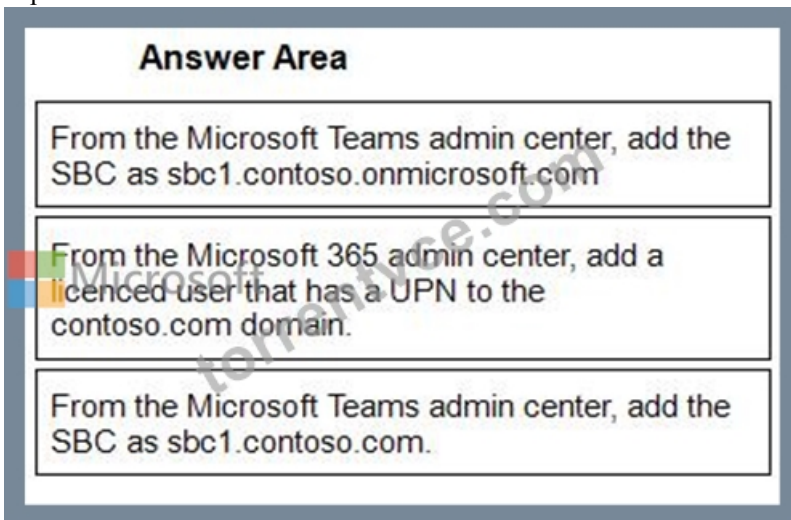

have problems, contact Microsoft customer support." You need to add the SBC to the tenant.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

- 1 - From the Microsoft Teams admin center, add the SBC as sbc1.contoso.onmicrosoft.com
- 2 - From the Microsoft 365 admin center, add a licensed user that has a UPN to the contoso.com domain.
- 3 - From the Microsoft Teams admin center, add the SBC as sbc1.contoso.com

NEW QUESTION # 195

.....

Moreover, there are a series of benefits for you. So the importance of Microsoft MS-721 actual test is needless to say. If you place your order right now, we will send you the free renewals lasting for one year. All those supplements are also valuable for your Microsoft MS-721 Practice Exam.
