MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q92-Q97):

NEW QUESTION # 92

Which of the following is NOT considered a concern when evaluating weight limits?

- A. Stock
- B. Product
- C. Fuel
- D. Materials

Answer: A

Explanation:

In transportation and storage planning, evaluating weight limits involves considering the weight of the product, packaging materials, pallets, and even fuel to avoid exceeding vehicle or racking limits. "Stock" is a general term for inventory quantity, not a weight-related concern. CLT 4.0 stresses that exceeding legal load or rack weight limits can lead to safety violations, equipment failure, or structural damage. Therefore, logistics personnel must calculate total load weight-including cargo, fuel, and vehicle weight-to comply with DOT and OSHA safety regulations. Ignoring these limits risks fines, product damage, or workplace injury.

NEW QUESTION # 93

Which of the following terminology refers to protecting domestic industries by restricting the amount of goods that can be imported during a specific time period?

- A. duties and tariffs
- B. quotas
- C. exports
- D. imports

Answer: B

Explanation:

CLT touches on trade policy: quotas limit the quantity of specific goods that may enter a country during a set time period to protect domestic producers. Duties and tariffs impose taxes on imports/exports; imports are incoming goods; exports are outgoing. Quotas are the direct quantitative restriction mechanism.

NEW QUESTION # 94

A substance or material that is capable of posing an unreasonable risk to health, safety, and property when transported in commerce is

- A. HAZCOM
- B. PHMSA
- C. HAZMAT
- D. dangerous goods

Answer: C

Explanation:

CLT uses the U.S. term "hazardous material (HAZMAT)" for substances posing unreasonable risks in transportation; internationally the term "dangerous goods" is common. PHMSA is the regulating agency within USDOT, and HAZCOM refers to OSHA's Hazard Communication standard, not the material itself. Thus, the definition aligns with HAZMAT.

NEW QUESTION # 95

Which inventory control method supports the production or manufacturing principle that calls for producing the necessary units in the necessary quantities at the necessary time?

- A. FIFO inventory control
- **B. Just-In-Time inventory control**
- C. LIFO inventory control
- D. ABC inventory control

Answer: B

Explanation:

Just-In-Time (JIT) is a lean manufacturing and inventory control principle emphasizing that materials should arrive or be produced exactly when needed, in the required quantities, without maintaining excessive inventory. The CLT "Inventory Control" module identifies JIT as a critical concept for efficiency and waste reduction in both manufacturing and logistics. JIT minimizes storage costs, reduces obsolescence, and ensures cash flow efficiency. It requires highly reliable suppliers, accurate demand forecasting, and synchronized production and delivery schedules. Unlike FIFO or LIFO, which determine material flow order, JIT focuses on timing and responsiveness. CLT stresses that logistics professionals must ensure tight coordination between production planning, suppliers, and transportation systems to maintain smooth flow while minimizing inventory levels. Proper JIT implementation enhances quality, reduces lead times, and supports continuous improvement within the supply chain.

NEW QUESTION # 96

Who is responsible for documentation for materials leaving the U.S.?

- A. Customs broker
- B. EPA
- C. State Department
- **D. Freight forwarder**

Answer: D

Explanation:

In international logistics, the freight forwarder is the party responsible for preparing and managing export documentation for goods leaving the United States. According to CLT 4.0, freight forwarders coordinate with exporters, carriers, and customs authorities to ensure compliance with export control laws, documentation accuracy, and transportation efficiency. Their tasks include completing commercial invoices, export declarations, bills of lading, and certificates of origin. Freight forwarders also select carriers, arrange cargo insurance, and book transport space, acting as intermediaries between exporters and international consignees. While customs brokers manage imports, freight forwarders specialize in exports-ensuring shipments meet the requirements of both the exporting and receiving countries. Accurate documentation from freight forwarders prevents customs delays, fines, and export violations, which are critical for maintaining legal and efficient trade flows.
