

MTCNA VCE Dumps - Latest MTCNA Exam Question

DOWNLOAD the newest PassLeader MTCNA PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1bLyE10pNhpgWTqIJn76WlgaOAjfb5X>

There are free demos giving you basic framework of MTCNA Training Materials. All are orderly arranged in our MTCNA practice materials. After all high-quality demos rest with high quality MTCNA preparation materials, you can feel relieved with help from then. Though the free demos are a small part of the exam braindumps, they contain the represent questions for you to know its accuracy and good quality.

The MTCNA Exam is made up of multiple choice questions and is administered online through the MikroTik website. MTCNA exam covers a wide range of topics, including network architecture, wireless networking, routing, firewalling, and more. Successful candidates will be able to demonstrate a deep understanding of MikroTik networking concepts and be able to configure and troubleshoot MikroTik routers and wireless access points.

Latest MTCNA Exam Question, MTCNA Practice Online

Our products boost 3 versions and varied functions. The 3 versions include the PDF version, PC version, APP online version. You can use the version you like and which suits you most to learn our MTCNA study materials. The 3 versions support different equipment and using method and boost their own merits and functions. For example, the PC version supports the computers with Window system and can stimulate the real exam. Our products also boost multiple functions which including the self-learning, self-evaluation, statistics report, timing and stimulation functions. Each function provides their own benefits to help the clients learn the MTCNA Study Materials efficiently. For instance, the self-learning and self-evaluation functions can help the clients check their results of learning the MikroTik Certified Network Associate Exam study materials.

MikroTik Certified Network Associate Exam Sample Questions (Q89-Q94):

NEW QUESTION # 89

If a packet comes to a router and starts a new, previously unseen connection, which connection state would be applied to it?

- A. no connection state would be applied to such packet
- B. established
- C. unknown
- **D. new**
- E. invalid

Answer: D

NEW QUESTION # 90

Which protocol does Ping use?

- **A. ICMP**
- B. BootP
- C. TCP
- D. ARP

Answer: A

Explanation:

Ping is a diagnostic utility used to test reachability between devices. It sends ICMP Echo Request packets and waits for ICMP Echo Replies. ICMP (Internet Control Message Protocol) is used for these types of control messages and is encapsulated within IP.

MTNNA Course Material - Diagnostic Tools:

"Ping uses ICMP Echo Requests to verify if a destination is reachable. It does not use TCP or UDP." Rene Meneses MTNNA Study Guide - Ping and ICMP:

"Ping uses ICMP, not TCP or ARP. ICMP packets are used to check basic connectivity." MikroTik Wiki - Ping Tool Description:

"Ping works by sending ICMP packets. It cannot use TCP."

Other options:

- * TCP: Used by protocols like HTTP, FTP
- * ARP: Resolves IP to MAC, not used for ping
- * BootP: DHCP-related protocol, not diagnostic

NEW QUESTION # 91

Which wireless mode allows you to connect to any standard AP (not only MikroTik) and to be able to bridge this wireless interface to an Ethernet?

- **A. station-pseudobridge**
- B. station
- C. bridge
- D. station-wds

Answer: A

Explanation:

The only wireless mode that allows bridging (Layer 2) over a connection to a non-MikroTik (standard 802.11) access point is station-pseudobridge. It fakes (spoofs) a bridge by using the wireless interface's MAC address for Ethernet clients behind it.

* A.#station-pseudobridge - Works with any AP and can bridge Ethernet # WiFi for one client.

* B.#station - Only works at Layer 3 (routing or NAT).

* C.#station-wds - Requires WDS support, which only MikroTik devices support.

* D.#bridge - Not a wireless mode; it's an interface type used in Layer 2.

Extract from Official MTNNA Course Material - Wireless Bridging:

"station-pseudobridge allows bridging to non-MikroTik APs. Suitable for simple Layer 2 extension with one client." Extract from Rene Meneses MTNNA Study Guide - Wireless Modes:

"For compatibility with standard APs, use station-pseudobridge mode. Other bridge modes require MikroTik AP." Extract from MikroTik Wiki - Wireless Bridging:

"station-pseudobridge is used when connecting to a standard access point while still wanting to bridge to local Ethernet."

NEW QUESTION # 92

A PC with IP 192.168.1.2 can access internet, and static ARP has been set for that IP address on gateway.

When the PC Ethernet card failed, the user change it with a new card and set the same IP for it. What else should be done? [multiple answers]

- A. Another IP has to be added for Internet access
- **B. MAC-address of the new card has to be changed to MAC address of old card**
- **C. Old static ARP entry on gateway has to be updated for the new card**
- D. Nothing - it will work as before

Answer: B,C

NEW QUESTION # 93

You have a DHCP server on your MikroTik router. The IP addresses 10.1.2.2-10.2.2.20 are distributed in the DHCP network. Additionally, 3 static IP address are defined for your servers: 10.1.2.31-10.1.2.33.

After a while 20 more IP addresses need to be distributed in the network. It is possible to distribute the extra IP address without adding another DHCP Server:

- A. True
- B. False

Answer: B

NEW QUESTION # 94

.....

Desktop MikroTik MTCNA Practice Exam Software is a one-of-a-kind and very effective software developed to assist applicants in preparing for the MTCNA certification test. The Desktop MTCNA Practice Exam Software that we provide includes a self-assessment feature that enables you to test your knowledge by taking simulated tests and evaluating the results. You can acquire a sense of the MTCNA software by downloading a free trial version before deciding whether to buy it.
