Our content and design of the NCA-6.10 exam questions have laid a good reputation for us. Our users are willing to volunteer for us. You can imagine this is a great set of NCA-6.10 learning guide! Next, I will introduce you to the most representative advantages of NCA-6.10 Real Exam. You can think about whether these advantages are what you need! First, we have high pass rate as 98% to 100% which is unique in the market. Secondly, the price of the NCA-6.10 study materials is favourable.

Do you feel Nutanix NCA-6.10 exam preparation is tough? Dumpexams desktop and web-based online Nutanix NCA-6.10 practice test software will give you a clear idea about the final NCA-6.10 Test Pattern. Practicing with the Nutanix NCA-6.10 practice test, you can evaluate your Nutanix NCA-6.10 exam preparation.

Nutanix NCA-6.10 Study Materials, Reliable NCA-6.10 Exam Pattern

Nowadays the test NCA-6.10 certificate is more and more important because if you pass it you will improve your abilities and your stocks of knowledge in some certain area and find a good job with high pay. If you buy our NCA-6.10 exam materials you can pass the exam easily and successfully. Our NCA-6.10 Exam Materials boost high passing rate and if you are unfortunate to fail in exam we can refund you in full at one time immediately. The learning costs you little time and energy and you can commit yourself mainly to your jobs or other important things.

Nutanix Certified Associate v6.10 Sample Questions (Q28-Q33):

NEW QUESTION # 28

When using the LCM Dark Site procedure in Prism Element or Prism Central, which Nutanix software component should be checked and upgraded first?

- A. LCM Framework
- B. NCC
- C. MSP
- D. Foundation

Answer: A

NEW QUESTION # 29

Which feature should be enabled to prevent password access to the CVM for both the nutanix and admin user accounts?

- A. Cluster lockdown
- B. STIG
- C. RBAC Policy on PC
- D. Data-at-Rest Encryption

Answer: A

NEW QUESTION # 30

When multiple Alert policies are applied to an entity, which will take precedence?

- A. Policy are applied to all entities of an entity type.
- B. Policy are applied to an entity type in a cluster.
- C. Policy are applied to a specific entity type.
- D. Policy are applied to an entity type in a category.

Answer: C

Explanation:

When multiple alert policies are applied to an entity, Nutanix uses a hierarchical approach. Policies applied to an entity type within a category take precedence. For example:

* If a category (e.g., "Production") has policies applied to entities like VMs, and the entity matches that category, the category-specific policy will override general policies.

* This prioritization allows administrators to fine-tune alert policies for specific workloads or environments.

Nutanix Alerts Management Guide - Policy Precedence Overview.

Nutanix University Certification Training Material.

NEW QUESTION # 31

Which hypervisor supports integrated IP address management (IPAM)?

- A. XenServer
- B. Hyper-V
- C. AHV
- D. ESXi

Answer: C

NEW QUESTION # 32

An administrator wants to create a storage container for an application that has built-in redundancy. What should the administrator do?

- A. RF1 is enabled by default in a storage container.
- **B. Create an RF1 storage container.**
- C. Enable RF1 and create an RF1 storage container.
- D. Create an RF1 storage container and enable RF1.

Answer: B

Explanation:

The correct answer is B. Create an RF1 storage container.

In Nutanix architecture, Replication Factor (RF) is set at the storage container level to optimize redundancy and performance for specific workloads. When an application has its own internal redundancy, such as database clustering or distributed file systems, the administrator may choose to reduce Nutanix's redundancy to RF1, which stores only one copy of data in the cluster. This reduces overhead and maximizes usable capacity, but is not fault-tolerant at the Nutanix level.

Key clarifications:

- * RF1 is not enabled by default. Nutanix clusters default to RF2 or RF3 depending on the configuration and number of nodes.
- * RF1 must be explicitly set when creating a storage container.
- * There is no separate "enable RF1" setting outside of selecting RF1 at container creation; once selected, it applies directly.

Prism UI Navigation Path:

Storage > Storage Containers > Create Storage Container > Data Redundancy Level # Select "RF1" Official Reference:

- * Nutanix Bible - Storage Layer and RF Explanation
- * Nutanix Storage Administration Guide - "Creating Containers with Specific Replication Factor"
- * Excerpt: "RF1 is typically used for workloads with native redundancy. It must be selected explicitly during container creation."

Conclusion: Only option B accurately reflects this process.

NEW QUESTION # 33

.....

Our NCA-6.10 guide torrent specially proposed different versions to allow you to learn not only on paper, but also to use mobile phones to learn. This greatly improves the students' availability of fragmented time. You can choose the version of NCA-6.10 learning materials according to your interests and habits. And if you buy the value pack, you have all of the three versions, the price is quite preferential and you can enjoy all of the study experiences. This means you can study NCA-6.10 Exam Engine anytime and anywhere for the convenience to help you pass the NCA-6.10 exam.
