

NCP-DB Complete Exam Dumps & Exam NCP-DB Simulator

P.S. Free 2025 Nutanix NCP-DB dumps are available on Google Drive shared by ActualCollection: <https://drive.google.com/open?id=1o8IO1BWIOxnOGCDBmPaz5jQwQu7G50pU>

As long as you get to know our NCP-DB exam questions, you will figure out that we have set an easier operation system for our candidates. Once you have a try, you can feel that the natural and seamless user interfaces of our NCP-DB study materials have grown to be more fluent and we have revised and updated NCP-DB learning guide according to the latest development situation. In the guidance of teaching syllabus as well as theory and practice, our NCP-DB training engine has achieved high-quality exam materials according to the tendency in the industry.

Before you buy our NCP-DB study questions you can have a free download and tryout and you can have an understanding of our product by visiting our pages of our product on the website. The pages of our NCP-DB guide torrent provide the demo and you can understand part of our titles and the form of our software. On the pages of our NCP-DB exam torrent you can see the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the product, the price of the product and the discounts. The pages also list the details and the guarantee of our NCP-DB Exam Torrent, the methods to contact us, the evaluations of the past client on our product, the related exams and other information about our NCP-DB guide torrent. So before your purchase you can have an understanding of our product and then decide whether to buy our NCP-DB study questions or not.

NCP-DB Prep Torrent - NCP-DB Latest Questions & NCP-DB Vce Guide

You may previously think preparing for the NCP-DB practice exam will be full of agony; actually, you can abandon the time-consuming thought from now on. Our NCP-DB exam question can be obtained within 5 minutes after your purchase and full of high quality points for your references, and also remedy your previous faults and wrong thinking of knowledge needed in this exam. As a result, many customers get manifest improvement and lighten their load by using our NCP-DB Latest Dumps. You won't regret your decision of choosing us. In contrast, they will inspire your potential. Besides, when conceive and design our NCP-DB exam questions at the first beginning, we target the aim customers like you, a group of exam candidates preparing for the exam.

Nutanix NCP-DB Exam Syllabus Topics:

Topic	Details
Topic 1	Protect NDB-managed Databases Using Time Machine: SLA retention policies, source databases, clones, protection of databases, and Data Access Management (DAM) policies are discussed in this topic.
Topic 2	Deploy and Configure an NDB Solution: This topic discusses how to deploy, configure, and NDB Instance.
Topic 3	Operate and Maintain an NDB Environment: Application of procedural concepts to register database server, provision databases, and test and publish database patches. Additionally, the topic explains the right method to apply Linux OS patches. Lastly, it delves into databases and troubleshooting of NDB operations.
Topic 4	Monitor Alerts and Storage Usage Within an NDB Implementation: It is all about monitoring alerts and management of storage usage.
Topic 5	Administer an NDB Environment: While focusing on the administration of an NDB environment, this topic focuses on managing NDB profiles, applying procedural concepts, and managing networks in NDB. Lastly, the topic explains sub-topics of managing access controls in NDB and identifying how to use NDB APIs and CLI.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 Sample Questions (Q164-Q169):

NEW QUESTION # 164

An administrator is adding a stretched VLAN in NDB.
Which VLAN type(s) will satisfy this task?

- A. Only dynamic VLANs
- B. Only VLANs that are not managed in NDB
- C. Both static and dynamic VLANs
- D. Only static VLANs that are managed in NDB

Answer: C

Explanation:

The administrator can add a stretched VLAN in NDB using either static or dynamic VLANs. A stretched VLAN is a VLAN that spans across multiple Nutanix clusters, and allows the NDB-managed databases to communicate and migrate between different clusters. A static VLAN is a VLAN that is manually configured and assigned to the database server VMs and the databases by the administrator. A dynamic VLAN is a VLAN that is automatically configured and assigned to the database server VMs and the databases by the NDB instance, using the Nutanix Calm orchestration service. Both static and dynamic VLANs can be used to create a stretched VLAN in NDB, as long as they have the same VLAN ID and network configuration across the clusters. The administrator cannot add a stretched VLAN in NDB using only VLANs that are not managed in NDB. A VLAN that is not managed in NDB is a VLAN that is configured and assigned to the database server VMs and the databases outside of the NDB instance, using the Nutanix Prism web console or other tools. A VLAN that is not managed in NDB cannot be used to create a stretched VLAN in NDB, as it is not recognized or controlled by the NDB instance.

NEW QUESTION # 165

In NDB, which two Time Machine options are available when creating a database clone? {Choose two.)

- A. Backup
- B. Point in time
- C. Snapshot
- D. Restore point

Answer: B,C

Explanation:

The correct answer is A and D because these are the two Time Machine options that are available when creating a database clone in NDB. Point in time allows the user to specify a date and time to create a clone from a specific point in the database history. Snapshot allows the user to select a previously taken snapshot to create a clone from a consistent state of the database. Option B is incorrect because Restore point is not a Time Machine option, but a feature that allows the user to restore a source database to a previous point in time. Option C is incorrect because Backup is not a Time Machine option, but a feature that allows the user to backup a database to a remote location.

References: The following sources provide more information about the Time Machine options and cloning features in NDB:

* Nutanix Database Management & Automation (NDMA) course, Module 4: Protecting Databases Using Time Machine, Lesson 4.2: Cloning Databases

NEW QUESTION # 166

An administrator needs to patch an Oracle Database Server VM and must ensure Grid home is allocated sufficient storage space. At a minimum, how much space must be available for Grid home prior to completing this task?

- A. 15GB
- B. 5 GB
- C. 10GB
- D. 20 GB

Answer: C

Explanation:

When patching an Oracle Database Server VM, it's important to ensure that there is sufficient storage space allocated for the Grid home. A minimum of 10GB space is required for this purpose to accommodate the patching process without storage constraints. References: Nutanix Database Automation documentation, particularly in the sections discussing Oracle database server VM management and patching requirements.

NEW QUESTION # 167

Which two options can NDB leverage to refresh a database clone? (Choose two.)

- A. Templates
- B. Transaction logs
- C. Snapshots
- D. Cerebro logs

Answer: B,C

Explanation:

NDB can leverage snapshots and transaction logs to refresh a database clone to the latest state of the source database. Snapshots are point-in-time copies of the database that are stored on the Nutanix cluster.

Transaction logs are records of the changes made to the database after the snapshot was taken. NDB can use either snapshots or transaction logs, or a combination of both, to refresh a database clone. Cerebro logs and templates are not used for refreshing database clones. Cerebro logs are used for log catch-up operations, which are different from refresh operations. Templates are used for provisioning new databases, not for refreshing existing ones. References:

NEW QUESTION # 168

An administrator originally configured the storage for an Oracle database running on Nutanix NDB using ASMLib. The administrator would like to scale the size of the database.

What should the administrator do to most efficiently increase the size of the database?

- **A. Leverage the scaling ability built into NDB to resize existing vDisks.**
- B. Mount an iSCSI LUN and extend the database onto the new LUN.
- C. Create a new, larger database and migrate.
- D. Extend the size by adding new vDisks.

Answer: A

Explanation:

When an administrator needs to scale the size of an Oracle database running on Nutanix NDB and originally configured using ASMLib (Automatic Storage Management Library), the most efficient approach is to use NDB's built-in scaling ability to resize existing vDisks. NDB supports dynamic resizing of virtual disks (vDisks) associated with database VMs, allowing the administrator to increase storage capacity without disrupting the database or requiring complex migrations. This method leverages Nutanix's storage integration, resizing the underlying vDisks and updating the ASMLib configuration to reflect the new size, ensuring seamless operation.

* Option A (Leverage the scaling ability built into NDB to resize existing vDisks) is correct as it is the most efficient, native NDB feature for scaling storage.

* Option B (Extend the size by adding new vDisks) is incorrect because adding new vDisks requires additional configuration (e.g., ASM disk group adjustments), making it less efficient than resizing.

* Option C (Create a new, larger database and migrate) is incorrect because migration is time-consuming and unnecessary when resizing is supported.

* Option D (Mount an iSCSI LUN and extend the database onto the new LUN) is incorrect because iSCSI LUNs are not the preferred method in NDB, and resizing vDisks is more integrated.

This approach minimizes downtime and complexity.

NEW QUESTION # 169

.....

The pass rate is 98.75% for NCP-DB exam materials, and we can ensure you that you can pass the exam just one time if you choose us. NCP-DB exam materials contain most of knowledge points for the exam, and you can master major knowledge points for the exam as well as improve your ability in the process of learning. Besides, NCP-DB Exam Materials have free demo for you to have a try, so that you can know what the complete version is like. We have online and offline service, and if you have any questions for NCP-DB training materials, you can consult us, and we will give you reply as soon as we can.
