

NCP-MCI-6.10 Valid Exam Tips - NCP-MCI-6.10 Braindump Free

P.S. Free & New NCP-MCI-6.10 dumps are available on Google Drive shared by TorrentExam: <https://drive.google.com/open?id=1hww0QUmKkIOkkJgnKr8GH2APSS7BK4L7>

People from all walks of life all work hard for the future. You must work hard to upgrade your IT skills. Then, do you have obtained Nutanix NCP-MCI-6.10 certificate which is very popular? How much do you know about NCP-MCI-6.10 test? If you want to pass NCP-MCI-6.10 exam without enough exam related knowledge, how should you do? But don't you worry: TorrentExam will give assistance to you.

In all respects, you will find our NCP-MCI-6.10 practice braindumps compatible to your actual preparatory needs. As you can find on our website, we have three different versions of our NCP-MCI-6.10 exam questions: the PDF, Software and APP online. With all these versions, you can practice the NCP-MCI-6.10 Learning Materials at any time and condition as you like. The language of our NCP-MCI-6.10 simulating exam is simple and the content is engaging and easy. What are you waiting for? Just rush to buy it!

>> NCP-MCI-6.10 Valid Exam Tips <<

NCP-MCI-6.10 Braindump Free - Reliable NCP-MCI-6.10 Test Pass4sure

It has similar specifications to the Nutanix NCP-MCI-6.10 desktop-based practice exam software, but it requires an internet connection. Our Nutanix NCP-MCI-6.10 practice exam highlights mistakes at the end of each attempt, allowing you to overcome them before it's too late. This kind of approach is great for complete and flawless Nutanix NCP-MCI-6.10 Test Preparation.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q70-Q75):

NEW QUESTION # 70

An administrator configured a remote site for Protection Domain replication, but network performance and stability are impacted. How can the remote site configuration be adjusted to fix the issue?

- A. Configure the Protection Domain with many-to-many replication.
- B. Configure the remote Cluster VIP as a proxy.
- C. Configure Network Address Translation (NAT) between the two Nutanix clusters.
- **D. Configure a Bandwidth Throttling Policy.**

Answer: D

Explanation:

Network performance issues during replication can be mitigated using Bandwidth Throttling to control traffic spikes.

* Option C (Configure a Bandwidth Throttling Policy) is correct:

* Bandwidth Throttling ensures that replication does not saturate the network, especially during peak usage hours.

* This is particularly useful for low-bandwidth connections between remote sites.

- * Option A (Configure NAT) is incorrect:
- * NAT is not required for remote site replication between Nutanix clusters.
- * Option B (Many-to-Many Replication) is incorrect:
- * This does not directly address network performance and may increase traffic load.
- * Option D (Remote Cluster VIP as Proxy) is incorrect:
- * VIP configurations help with load balancing but do not resolve bandwidth issues.

References:

- * Nutanix Protection Policies Guide #Bandwidth Throttling for Remote Site Replication
- * Nutanix KB #Optimizing Network Performance for Disaster Recovery

NEW QUESTION # 71

An administrator needs to compare the performance of two VMs that are running on separate Nutanix clusters.

When creating an Analysis chart in Prism Central Intelligent Operations, the administrator discovers that it is not possible to add VM metrics for IOPS and CPU utilization to the same chart.

How should the administrator resolve this issue?

- A. Ensure that both VMs have the same number of vCPUs provisioned.
- B. Create an Entity chart instead of a Metric chart.
- **C. Create separate charts for metrics with different units of measurement**
- D. Migrate one of the VMs so that both VMs are running on the same cluster.

Answer: C

NEW QUESTION # 72

When expanding a cluster, what is required to automatically discover new nodes?

- **A. IPv4 multicast must be allowed on physical switches.**
- B. IPv6 multicast must be allowed on physical switches.
- C. New nodes must have the same AOS version.
- D. New nodes must have the same hypervisor version.

Answer: A

Explanation:

Nutanix uses IPv4 multicast for automatic node discovery and cluster expansion.

- * Option D (IPv4 multicast must be allowed) is correct:
- * When adding new nodes, the Nutanix Cluster automatically detects them using IPv4 multicast traffic.
- * If multicast is blocked at the switch level, the new nodes will not be discovered automatically.
- * Option A (Hypervisor version must match) is incorrect:
- * While the hypervisor version should be compatible, it does not impact node discovery.
- * Option B (IPv6 multicast) is incorrect:
- * Nutanix does not use IPv6 multicast for cluster discovery.
- * Option C (AOS version must match) is incorrect:
- * Nodes can have slightly different AOS versions, but discovery still works as long as they are compatible.

References:

- * Nutanix Best Practices #Cluster Expansion & Auto-Discovery
- * Nutanix KB #Why Nutanix Requires IPv4 Multicast for Node Discovery

NEW QUESTION # 73

After adding new workloads, the Overall Runway is now below 365 days, but the scenario still shows the cluster is in good shape. Why?

- A. Because Storage Runway is still good.
- **B. Because new workloads are sustainable.**
- C. Because the Target is 1 month.
- D. Because there are recommended resources.

Answer: B

Explanation:

A cluster runway below 365 days does not necessarily indicate an issue if Intelligent Operations determines that workloads are sustainable.

* Option B (Because new workloads are sustainable) is correct:

* Nutanix analyzes resource trends and marks clusters as healthy if new workloads are within projected capacity.

* Option A (Storage Runway is still good) is incorrect:

* Storage is one component, but CPU and memory also affect runway calculations.

* Option C (Recommended resources) is incorrect:

* Recommendations help optimize capacity, but do not define cluster health.

* Option D (Target is 1 month) is incorrect:

* The scenario's target window does not impact the actual runway calculation.

* Nutanix Prism Central Guide #Capacity Planning & Runway Analysis

* Nutanix KB #Understanding Capacity Runway and Workload Sustainability

NEW QUESTION # 74

Refer to Exhibit:

In an scale-out Prism Central deployment, what additional functionality does configuring an FQDN instead of a Virtual IP provide?

- A. Segmentation
- **B. Load balancing**
- C. SSL Certificate
- D. Resiliency

Answer: B

Explanation:

When using FQDN instead of a Virtual IP in a scale-out Prism Central deployment, Nutanix enables load balancing across multiple Prism Central instances.

* Option A (Load balancing) is correct because it ensures that requests are distributed among multiple Prism Central nodes, improving performance and redundancy.

* Option B (Resiliency) is incorrect because resiliency is achieved through HA and replication, not through FQDN configuration.

* Option C (Segmentation) is incorrect because network segmentation is handled at the VLAN or security policy level.

* Option D (SSL Certificate) is incorrect because SSL certificates can be applied regardless of whether FQDN or Virtual IP is used.

NEW QUESTION # 75

.....

Free demos offered by TorrentExam gives users a chance to try the product before buying. Users can get an idea of the Nutanix NCP-MCI-6.10 exam dumps, helping them determine if it's a good fit for their needs. The demo provides access to a limited portion of the NCP-MCI-6.10 dumps material to give users a better understanding of the content. Overall, NCP-MCI-6.10 free demo is a valuable opportunity for users to assess the value of the TorrentExam study material before making a purchase. The Nutanix provides 1 year of free updates of real questions. This offer allows students to stay up-to-date with changes in the exam's content.

NCP-MCI-6.10 Braindump Free: <https://www.torrentexam.com/NCP-MCI-6.10-exam-latest-torrent.html>

If you are still preparing for other IT certification exams except NCP-MCI-6.10 exam, you can also find the related exam dumps you want in our huge dumps and study materials, Nutanix NCP-MCI-6.10 Valid Exam Tips We have benefited a lot from those changes, Using our exam dump, you can easily become IT elite with NCP-MCI-6.10 exam certification, We trust you willpower, and we provide the high quality and high-effective NCP-MCI-6.10 exam torrent here.

It might affect the course or amount of the rally, but not the decision to buy or sell, Being qualified with the NCP-MCI-6.10 certification exam can not only validate your skills but also prove your expertise.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) actual test pdf, NCP-MCI-6.10 actual test latest version

If you are still preparing for other IT certification exams except NCP-MCI-6.10 Exam, you can also find the related exam dumps you want in our huge dumps and study materials.

We have benefited a lot from those changes, Using our exam dump, you can easily become IT elite with NCP-MCI-6.10 exam certification, We trust you willpower, and we provide the high quality and high-effective NCP-MCI-6.10 exam torrent here.

It provides free PDF demo.
