

NCP-US-6.10 Exam Learning Pass Certify| High-quality NCP-US-6.10 Valid Mock Exam: Nutanix Certified Professional - Unified Storage (NCP-US) v6.10

2025 Latest TestValid NCP-US-6.10 PDF Dumps and NCP-US-6.10 Exam Engine Free Share: https://drive.google.com/open?id=1OUePrWtO3HuLEVPs_WOnkh5AFbvNV5QA

You can use NCP-US-6.10 guide materials through a variety of electronic devices. At home, you can use the computer and outside you can also use the phone. Now that more people are using mobile phones to learn our NCP-US-6.10 study materials, you can also choose the one you like. One advantage is that if you use our NCP-US-6.10 Practice Questions for the first time in a network environment, then the next time you use our study materials, there will be no network requirements. You can open the NCP-US-6.10 real exam anytime and anywhere.

TestValid Nutanix NCP-US-6.10 exam study material has three formats: NCP-US-6.10 PDF Questions, desktop Nutanix NCP-US-6.10 practice test software, and a NCP-US-6.10 web-based practice exam. You can easily download these formats of Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 (NCP-US-6.10) actual dumps and use them to prepare for the Nutanix NCP-US-6.10 Certification test. You don't need to enroll yourself in expensive NCP-US-6.10 exam training classes. With the Nutanix NCP-US-6.10 valid dumps, you can easily prepare well for the actual Nutanix NCP-US-6.10 exam at home.

NCP-US-6.10 Exam Learning - Realistic Nutanix Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 Exam Learning 100% Pass

Worrying over the issue of passing exam has put many exam candidates under great stress. Many people feel on the rebound when they aimlessly try to find the perfect practice material. Our team will relieve you of tremendous pressure with passing rate of the Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 prepare torrents up to 98 percent to 100 percent. Even we have engaged in this area over ten years, professional experts never blunder in their handling of the NCP-US-6.10 Exam torrents. By compiling our Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 prepare torrents with meticulous attitude, the accuracy and proficiency of them is nearly perfect. As the leading elites in this area, our Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 prepare torrents are in concord with syllabus of the exam. They are professional backup to this fraught exam.

Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 Sample Questions (Q16-Q21):

NEW QUESTION # 16

Question:

A Nutanix Files cluster is unreachable after an administrator changed its name. What should the administrator do to solve the problem?

- A. Restart CVMs to apply the changes.
- B. Restart FSVs to apply the changes.
- **C. Delete old and add new DNS entries.**
- D. Delete active user sessions from Files.

Answer: C

Explanation:

Changing the name of a Nutanix Files cluster involves updating the DNS name resolution for its FSVs and VIPs. When the cluster's name changes:

The underlying IP addresses (CVMs, FSVs, VIPs) do not change.

However, DNS entries associated with the old cluster name become outdated, causing clients (including management interfaces and file share connections) to fail to resolve the new name to the correct IP addresses.

From the NUSA course troubleshooting section:

"After renaming a Files cluster, update the DNS entries to reflect the new name. Otherwise, clients and administrators will be unable to reach the cluster resources." Restarting CVMs or FSVs does not update DNS entries.

Deleting active user sessions won't fix the DNS resolution problem.

Therefore, to resolve the unreachability issue, the administrator must:

#Delete old DNS entries for the previous cluster name.

#Add new DNS entries mapping the new cluster name to the same IPs of the FSVs and VIP.

This ensures that all systems can properly resolve the new cluster name and reach the Nutanix Files services.

NEW QUESTION # 17

An administrator has determined that adding File Server VMs to the cluster will provide more resources.

What must the administrator validate so that the new File Server VMs can be added?

- A. Sufficient storage container space is available to host the volume groups.
- B. Ensure Files Analytics is installed.
- C. Ensure network ports are available.
- **D. Sufficient nodes in the cluster is greater than current number of FSVs.**

Answer: D

NEW QUESTION # 18

Refer to the exhibit.

The screenshot shows the Nutanix Firewall configuration interface. It includes a table with columns for Service name, TCP ports, UDP ports, and Assigned IP addresses. The table lists several services and their corresponding ports. The Nutanix logo is visible in the top right corner of the interface.

Service name	TCP ports	UDP ports	Assigned IP addresses
DVSync	---	8301, 8302	
NFC	902	---	
DHCP Client	---	---	
Fault Tolerance	8300	---	
vSphere High Availability Agent	8182	8162	
ipfilingd	9060	---	
SNMP Server	---	161	
SNMP Server	22	---	
Unidriver	9000	---	

NEW QUESTION # 19

The screenshot shows the 'Create Object Store' form in Nutanix Prism Central. The 'Object Store Details' section includes fields for 'Object Store Name' and 'Domain' (pre-filled with 'pc.msp.cluster.local'). Below these is a 'Cluster' dropdown menu. The dropdown is open, displaying 'Please Select' and a 'Possible causes' link. The 'Next' button is visible at the bottom right of the form.

A user is logged into Prism Central and has been tasked with creating a new object store. What could be the cause no clusters are being listed?

- A. Only the local Prism Element Admin can create object stores.
- B. Prism Element was registered to Prism Central only 1 hour ago.
- C. Only the local Prism Central Admin can create object stores.
- D. Access was granted to Prism Element less than 5 minutes ago.

Answer: D

Explanation:

According to the Nutanix Unified Storage Administration (NUSA) course, specifically in the module "Deploying and Configuring Nutanix Objects," the Object Store creation process within Prism Central depends on the registration and access synchronization between Prism Central and Prism Element. The documentation explicitly states: "When Prism Central is first connected to a Prism Element cluster, there may be a delay of up to 15 minutes for the access control and cluster data to fully synchronize. During this time, certain cluster resources may not appear when attempting to create new object stores." This statement confirms that if the access was granted to Prism Element less than 5 minutes ago, the cluster will not yet be visible in the "Cluster" drop-down list. This delay in synchronization is the reason for the empty cluster list in the interface.

* Option A is incorrect because Prism Central administrators, not just local Prism Element admins, have the authority to create object stores.

* Option B is incorrect because the delay is not tied to the 1-hour registration time, but rather the few minutes required for initial

synchronization.

* Option C is incorrect because the Prism Element admin role is not a prerequisite for this task within Prism Central.

Reference:

Nutanix Unified Storage Administration (NUSA) course - Module: Deploying and Configuring Nutanix Objects - Section: Synchronization and Cluster Visibility in Prism Central.

Nutanix Unified Storage (NCP-US) Study Guide - Topic: Object Store Creation Requirements and Synchronization Delays.

NEW QUESTION # 20

Question:

An administrator has been asked to lock a file indefinitely. The lock can be explicitly removed only by authorized users. Which configuration matches the requirements of this task?

- **A. Nutanix Objects Legal hold**
- B. Nutanix Objects with WORM versioning
- C. Data Lens Ransomware Protection
- D. Blocked File Types for Files

Answer: A

Explanation:

Legal Hold in Nutanix Objects is a feature designed for compliance and regulatory use cases, ensuring that specific objects (files) cannot be deleted or modified for an indefinite period, even if WORM (Write Once Read Many) policies exist.

Here's how it matches the scenario:

Indefinite Lock:

* Legal Hold ensures that once applied, the object is locked indefinitely.

* Unlike WORM retention, which is based on a fixed duration (like days/months), Legal Hold has no expiration until an authorized administrator explicitly removes it.

Authorized Removal Only:

* Only users with specific Legal Hold management permissions can remove the lock, maintaining compliance and governance integrity.

The NUSA course materials emphasize:

"Legal Hold is a compliance feature that prevents deletion or modification of specific objects. It can only be lifted by authorized administrators, ensuring that the data remains immutable as long as required by legal or regulatory processes." The other options: WORM versioning- locks data for a fixed retention period; it does not provide indefinite locking.

Data Lens Ransomware Protection- focuses on monitoring for anomalies, not explicit file locking.

Blocked File Types for Files- prevents certain files from being uploaded but does not lock already uploaded files.

Thus, to indefinitely lock a file in Nutanix Objects, the administrator should use Legal Hold.

NEW QUESTION # 21

.....

However, it's not always the same. Cramming is not what shall stay in your mind forever. you can forget the lines anytime making you blank while you are trying to solve your NCP-US-6.10 Exam Questions. So, don't cram even if it takes you a little more time to clear your doubts and get the concept clear. Cramming is not going to stay with you forever.

NCP-US-6.10 Valid Mock Exam: <https://www.testvalid.com/NCP-US-6.10-exam-collection.html>

To help you in achieving what you desire, we have equipped our Nutanix NCP-US-6.10 TestValid with the following:, And NCP-US-6.10 simulating questions are carefully arranged with high efficiency and high quality, And pass-for-sure NCP-US-6.10 Valid Mock Exam - Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 material is forging strong ties with its partners as well as all candidates, After payment, you will receive our email with the Nutanix NCP-US-6.10 actual questions & answers as the attachment within 5-10 minutes.

Gary spends much of his time designing and deploying Cisco unified communications NCP-US-6.10 Valid Mock Exam solutions for a wide range of customers, Illuminates powerful opportunities to drive business value through better, more relevant and timely documentation.
