

NCP-US-6.5 Test Engine & NCP-US-6.5 Exam Torrent & NCP-US-6.5 Premium VCE File

P.S. Free & New NCP-US-6.5 dumps are available on Google Drive shared by PDFVCE: https://drive.google.com/open?id=1eVMar_nE5rY_xVw_oADqVxEkcXpM4oyU

Clients always wish that they can get immediate use after they buy our NCP-US-6.5 Test Questions because their time to get prepared for the exam is limited. Our NCP-US-6.5 test torrent won't let the client wait for too much time and the client will receive the mails in 5-10 minutes sent by our system. Then the client can log in and use our software to learn immediately. It saves the client's time.

Nutanix NCP-US-6.5 Exam Syllabus Topics:

Topic	Details
Topic 1	• Given a scenario, configure shares, buckets, and • or Volume Groups • Troubleshoot a failed upgrade for Files • Objects
Topic 2	• Utilize File Analytics for data security • Troubleshoot Nutanix Unified Storage • Configure Nutanix Volumes
Topic 3	• Deploy and Upgrade Nutanix Unified Storage • Perform upgrades • maintenance for Files • Objects implementations
Topic 4	• Analyze and Monitor Nutanix Unified Storage • Describe the use of Data Lens for data security
Topic 5	• Identify the steps to deploy Nutanix Files • Given a scenario, determine product and sizing parameters
Topic 6	• Troubleshoot issues related to Nutanix Objects • Troubleshoot issues related to Nutanix Volumes
Topic 7	• Configure and Utilize Nutanix Unified Storage • Identify the steps to deploy Nutanix Objects

Topic 8	• Configure Nutanix Objects • Describe how to monitor performance and usage
Topic 9	• Troubleshoot issues related to Nutanix Files • Explain Data Management processes for Files and Objects

Exam Dumps NCP-US-6.5 Pdf & Latest NCP-US-6.5 Test Simulator

Are you still satisfied with your present job? Do you still have the ability to deal with your job well? Do you think whether you have the competitive advantage when you are compared with people working in the same field? If your answer is no, you are a right place now. Because our NCP-US-6.5 Exam Torrent will be your good partner and you will have the chance to change your work which you are not satisfied with, and can enhance your ability by our NCP-US-6.5 guide questions, you will pass the exam and achieve your target.

Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Sample Questions (Q59-Q64):

NEW QUESTION # 59

An administrator has created a volume and needs to attach it to a windows host a via iSCSI. The data Services IP has been configured in the MS iSCSI Initiator, but no target are visible.
What is most likely the cause this issue?

- A. The CHAP Authentication has not been configured on the client.
- B. The CHAP password configured on the client is incorrect.
- C. The host' s IP address is not authorized to access the volume.
- **D. The host's IQN is not authorized to access to the volume.**

Answer: D

Explanation:

Nutanix Volumes uses IQN-based authorization to control access to volumes. The administrator must specify the IQN of the host that needs to access the volume when creating or editing the volume. If the host's IQN is not authorized, it will not be able to see the target in the MS iSCSI Initiator3. References: Nutanix Volumes Administration Guide3

NEW QUESTION # 60

An administrator has created a volume and needs to attach it to a windows host a via iSCSI. The data Services IP has been configured in the MS iSCSI Initiator, but no target are visible.
What is most likely the cause this issue?

- A. The CHAP Authentication has not been configured on the client.
- B. The CHAP password configured on the client is incorrect.
- C. The host' s IP address is not authorized to access the volume.
- **D. The host's IQN is not authorized to access to the volume.**

Answer: D

Explanation:

Nutanix Volumes uses IQN-based authorization to control access to volumes. The administrator must specify the IQN of the host that needs to access the volume when creating or editing the volume. If the host's IQN is not authorized, it will not be able to see the target in the MS iSCSI Initiator3. Reference: Nutanix Volumes Administration Guide3

NEW QUESTION # 61

Which confirmation is required for an Objects deployment?

- A. Configure a dedicated storage container on Prism Element or Prism Cent
- B. Configure Domain Controllers on both Prism Element and Prism Central.
- C. Configure VPC on both Prism Element and Prism Central.
- **D. Configure NTP servers on both Prism Element and Prism Central.**

Answer: D

Explanation:

The configuration that is required for an Objects deployment is to configure NTP servers on both Prism Element and Prism Central. NTP (Network Time Protocol) is a protocol that synchronizes the clocks of devices on a network with a reliable time source. NTP servers are devices that provide accurate time information to other devices on a network. Configuring NTP servers on both Prism Element and Prism Central is required for an Objects deployment, because it ensures that the time settings are consistent and accurate across the Nutanix cluster and the Objects cluster, which can prevent any synchronization issues or errors. Reference: Nutanix Objects User Guide, page 9; Nutanix Objects Deployment Guide

NEW QUESTION # 62

An administrator is trying to create a Distributed Share, but the Use Distributed Share/Export type instead of Standard option is not present when creating the share.

What is most likely the cause for this?

- **A. The file server resides on a single node cluster.**
- B. The file server does not have the correct license
- C. The cluster is configured with hybrid storage
- D. The cluster only has three nodes.

Answer: A

Explanation:

The most likely cause for this issue is that the file server resides on a single node cluster. A distributed share is a type of SMB share or NFS export that distributes the hosting of top-level directories across multiple FSVMs, which improves load balancing and performance. A distributed share cannot be created on a single node cluster, because there is only one FSVM available. A distributed share requires at least two nodes in the cluster to distribute the directories. Therefore, the option to use distributed share/export type instead of standard is not present when creating a share on a single node cluster. Reference: Nutanix Files Administration Guide, page 33; Nutanix Files Solution Guide, page 8

NEW QUESTION # 63

An administrator needs to protect a Files cluster unique policies for different shares. How should the administrator meet this requirement?

- A. Create a protection domain in the Data Protection view in Prism Element.
- **B. Configure data protection policies in the Files view in Prism Central.**
- C. Configure data protection policies in File Server view in Prism Element
- D. Create a protection domain in the Data Protection view in Prism Central.

Answer: B

Explanation:

The administrator can meet this requirement by configuring data protection policies in the Files view in Prism Central. Data protection policies are policies that define how file data is protected by taking snapshots, replicating them to another site, or tiering them to cloud storage. Data protection policies can be configured for each share or export in a file server in the Files view in Prism Central. The administrator can create different data protection policies for different shares or exports based on their protection needs and requirements.
