

NCS-Core Latest Dumps & Valid NCS-Core Test Objectives

What's more, part of that ITEXamDownload NCS-Core dumps now are free: https://drive.google.com/open?id=1ctjI1DUFhK8j0ABsfSAv_pBhpZqYG_ep

As we all know, certificates are an essential part of one's resume, which can make your resume more prominent than others, making it easier for you to get the job you want. For example, the social acceptance of NCS-Core certification now is higher and higher. If you also want to get this certificate to increase your job opportunities, please take a few minutes to see our NCS-Core Study Materials. Carefully written and constantly updated content can make you keep up with the changing direction of the exam, without aimlessly learning and wasting energy.

The NCS-Core Certification is a valuable credential for IT professionals who work with Nutanix technology. It demonstrates to employers and clients that the certified professional has a deep understanding of Nutanix technology and is capable of managing Nutanix clusters with ease. Nutanix Certified Services Core Infrastructure Professional certification is also a way for IT professionals to enhance their career prospects and increase their earning potential.

Updated NCS-Core Latest Dumps offer you accurate Valid Test Objectives | Nutanix Nutanix Certified Services Core Infrastructure Professional

All questions on our NCS-Core exam questions are strictly in accordance with the knowledge points on newest test syllabus. Also, our experts are capable of predicating the difficult knowledge parts of the NCS-Core exam according to the test syllabus. We have tried our best to simply the difficult questions of our NCS-Core Practice Engine to be understood by the customers all over the world. No matter the students, office staffs, even someone who know nothing about this subject can totally study it without difficulty.

The core infrastructure services provided by Nutanix are critical to the successful deployment and management of enterprise cloud solutions. The NCS-Core exam is designed to test candidates on their understanding of these services and their ability to implement them effectively. Key areas covered in the exam include cluster deployment, storage configuration, network configuration, and virtualization management.

Nutanix NCS-Core Exam disadvantage:

If you do not know about Nutanix technology well enough, you may suffer from unfair competition in this field because other competitors may use stolen information to make your business fail. **Nutanix NCS-Core Dumps** in the market would be very helpful, and you will get enough information and ability to pass this exam and become a certified professional in this field. Therefore, it is necessary for you to pass the exam to prove that all of your information is valid and reliable. Special helping products such as books, videos, or other materials can be found to help you pass the exam.

Nutanix Certified Services Core Infrastructure Professional Sample Questions (Q277-Q282):

NEW QUESTION # 277

To ensure VM availability when a service outage has occurred, a customer has requested that automatic VM failovers must occur as part of the DR strategy for their environment.

Which failover operation is within an Unplanned Failover option?

- A. AHV Metro - with Witness Operation
- B. Test Failover
- C. Protection Domain Migrate
- D. Cross-Cluster Live Migration

Answer: A

Explanation:

For scenarios requiring VM availability during unplanned outages, AHV Metro with Witness Operation is designed to handle such situations. AHV Metro Availability enables synchronous replication between two sites with a witness that arbitrates site availability in case of a split-brain scenario. This setup is intended for automatic failover during service disruptions, ensuring continuous availability of VMs without manual intervention.

References:

* Nutanix Bible (<https://www.nutanixbible.com>), particularly the sections on disaster recovery and AHV Metro Availability.

* Nutanix University: NCS-Core 6.8 Training (<https://university.nutanix.com>), covering disaster recovery strategies and configurations.

NEW QUESTION # 278

An administrator has an existing Nutanix seven-node cluster running at RF2 that must be changed to have the following capabilities:

* RF3 set for the cluster

* Performance tier deduplication

What is the minimum memory needed on the CVMs to allow for these capabilities?

- A. 32GB
- B. 24GB
- C. 20GB
- D. 28GB

Answer: D

Explanation:

Ref: [https://next.nutanix.com/how-it-works-22/rf2-rf3-requirements-37206#:~:text=Controller%20VMs%20must%20be%20configured,for%20the%20feature\)%20of%20memory.](https://next.nutanix.com/how-it-works-22/rf2-rf3-requirements-37206#:~:text=Controller%20VMs%20must%20be%20configured,for%20the%20feature)%20of%20memory.)

NEW QUESTION # 279

To prepare for a new Nutanix installation, a consultant downloads the Foundation VM, imports the VM to their Desktop Virtualization Solution, and powers on the VM. The IPv4 static address on the host workstation and the Foundation VM have been configured, but pings between them fail.

Which two troubleshooting steps should the consultant perform? (Choose two.)

- A. Remove and re-import the Foundation VM to ensure the virtual NIC is set to Host-Only.
- B. Verify the virtual NIC in the Foundation VM is bound to the correct physical Host adapter.
- C. Confirm the IP addresses and subnet masks are correct.
- D. Verify the virtual NIC in the Foundation VM is bound to the correct wireless network adapter.

Answer: A,C

Explanation:

When facing connectivity issues between the host workstation and the Foundation VM, ensuring proper network configuration is crucial. Removing and re-importing the Foundation VM can help reset any configuration issues, particularly ensuring that the virtual NIC is set to the correct mode, such as Host-Only, to facilitate direct communication with the host. Confirming the IP addresses and

subnet masks ensures that both the host and the VM are on the same network segment, which is essential for successful communication. This step verifies that there are no IP configuration errors causing the connectivity issue.

- * Nutanix University: Foundation VM Networking Configuration

NEW QUESTION # 280

An administrator is monitoring the Nutanix v5.15-based AOS cluster performance logs and notices that a SQL server VM is greatly exceeding its intended maximum IOPS. The administrator has confirmed that a QoS policy was previously created for the group of VMs this server is a member of.

What are two reasons that this VM would exceed its maximum configured IOPS from the QoS Policy?

(Choose two.)

- **A. The SQL Server VM has volume groups attached.**
- B. The VM is missing the required snapshot needed to implement the QoS Policy.
- **C. The VM was not created as an AFS virtual machine.**
- D. It was cloned from another SQL Server VM that was a member of the QoS Policy.

Answer: A,C

Explanation:

NEW QUESTION # 281

A consultant needs to image nodes that cannot be discovered with the Foundation VM. The nodes are connected to a flat switch and are already part of a Nutanix cluster.

What course of action would result in Foundation success?

- A. Buy a new flat switch.
- **B. Bare metal image the nodes.**
- C. Use the customer's top of rack switch.
- D. Change the physical connections.

Answer: B

Explanation:

If nodes cannot be discovered using the Foundation VM and they are already part of a Nutanix cluster, the best course of action is to bare metal image the nodes. This process involves re-imaging the nodes from scratch, which can resolve discovery and communication issues that may be caused by existing configurations or errors within the cluster's networking setup.
