

NetSec-Generalist Latest Test Answers & NetSec-Generalist Certification Training

NetSec-Generalist Exam Details	
Vendor	Palo Alto
Exam Code	NetSec-Generalist
Full Exam Name	Network Security Generalist
Number of Questions	75
Sample Questions	Palo Alto NetSec-Generalist Sample Questions
Practice Exams	Palo Alto Networks Certified Network Security Generalist Practice Test
Passing Score	860/900 to 1000
Time Limit	90 minutes
Languages	English

100% Guaranteed Success with NWExam.com

To make your success a certainty, DumpsKing offers free updates on our Palo Alto Networks NetSec-Generalist real dumps for up to three months. It means all users get the latest and updated Palo Alto Networks NetSec-Generalist practice material to clear the Palo Alto Networks Network Security Generalist NetSec-Generalist certification test on the first try. We are a genuine brand working to smoothen up your NetSec-Generalist exam preparation. DumpsKing allows all visitors to try a free demo of NetSec-Generalist pdf questions and practice tests to assess the quality of our NetSec-Generalist Study Material. Your money is 100% secure as we will ensure that you crack the Palo Alto Networks NetSec-Generalist test on the first attempt. You will also enjoy 24/7 efficient support from our customer support team before and after the purchase of Palo Alto Networks NetSec-Generalist exam dumps. If you face any issues while using our NetSec-Generalist PDF dumps or NetSec-Generalist practice exam software (desktop and web-based), contact DumpsKing customer service for guidance.

Palo Alto Networks NetSec-Generalist Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• NGFW and SASE Solution Functionality: This section targets Cybersecurity Specialists to understand the functionality of Cloud NGFWs, PA-Series, CN-Series, and VM-Series firewalls. It includes perimeter security, zone segmentation, high availability configurations, security policy implementation, and monitoring• logging practices. A critical skill assessed is implementing zone security policies effectively.
Topic 2	<ul style="list-style-type: none">• NGFW and SASE Solution Maintenance and Configuration: This section focuses on System Administrators in maintaining• configuring Palo Alto Networks hardware firewalls (VM-Series• CN-Series) along with Cloud NGFWs. It emphasizes updating profiles• security policies to ensure system integrity. A significant skill assessed is maintaining firewall updates effectively.
Topic 3	<ul style="list-style-type: none">• Infrastructure Management and CDSS: This section measures the skills of Infrastructure Managers in managing CDSS infrastructure by configuring profiles• policies for IoT devices or enterprise DLP• SaaS security solutions while ensuring data encryption• access control practices are implemented correctly across these platforms. A key skill measured is securing IoT devices through proper configuration.
Topic 4	<ul style="list-style-type: none">• Connectivity and Security: This section targets Network Managers in maintaining• configuring network security across on-premises• cloud• hybrid networks by focusing on network segmentation strategies along with implementing secure policies• certificates to protect connectivity points within these environments effectively. A critical skill assessed is segmenting networks securely to prevent unauthorized access risks.

NetSec-Generalist Certification Training - Valid NetSec-Generalist Test Preparation

Our NetSec-Generalist study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit NetSec-Generalist exam questions. It points to the exam heart to solve your difficulty. With a minimum number of questions and answers of NetSec-Generalist Test Guide to the most important message, to make every user can easily efficient learning, not to increase their extra burden, finally to let the NetSec-Generalist exam questions help users quickly to pass the exam.

Palo Alto Networks Network Security Generalist Sample Questions (Q50-Q55):

NEW QUESTION # 50

Which Security profile should be queried when investigating logs for upload attempts that were recently blocked due to sensitive information leaks?

- A. Data Filtering
- B. Antivirus
- C. URL Filtering
- D. Anti-spyware

Answer: A

Explanation:

When investigating logs for upload attempts that were recently blocked due to sensitive information leaks, the appropriate Security Profile to query is Data Filtering.

Why Data Filtering?

Data Filtering is a content inspection security profile within Palo Alto Networks Next-Generation Firewalls (NGFWs) that detects and prevents the unauthorized transmission of sensitive or confidential data. This security profile is designed to inspect files, text, and patterns in network traffic and block uploads that match predefined data patterns such as:

Personally Identifiable Information (PII) - e.g., Social Security Numbers, Credit Card Numbers, Passport Numbers Financial Data - e.g., Bank Account Numbers, SWIFT Codes Health Information (HIPAA Compliance) - e.g., Patient Medical Records Custom Data Patterns - Organizations can define proprietary data patterns for detection How Data Filtering Works in Firewall Logs?

Firewall Policy Application - The Data Filtering profile is attached to Security Policies that inspect file transfers (HTTP, FTP, SMB, SMTP, etc.).

Traffic Inspection - The firewall scans the payload for sensitive data patterns before allowing or blocking the transfer.

Alert and Block Actions - If sensitive data is detected in an upload, the firewall can alert, block, or quarantine the file transfer.

Log Investigation - Security Administrators can analyze Threat Logs (Monitor > Logs > Data Filtering Logs) to review:

File Name

Destination IP

Source User

Matched Data Pattern

Action Taken (Allowed/Blocked)

Reference to Firewall Deployment and Security Features:

Firewall Deployment - Data Filtering is enforced at the firewall level to prevent sensitive data exfiltration.

Security Policies - Configured to enforce Data Filtering rules based on business-critical data classifications.

VPN Configurations - Ensures encrypted VPN traffic is also subject to data inspection to prevent insider data leaks.

Threat Prevention - Helps mitigate the risk of data theft, insider threats, and accidental exposure of sensitive information.

WildFire Integration - Data Filtering can work alongside WildFire to inspect files for advanced threats and malware.

Panorama - Provides centralized visibility and management of Data Filtering logs across multiple firewalls.

Zero Trust Architectures - Aligns with Zero Trust principles by enforcing strict content inspection and access control policies to prevent unauthorized data transfers.

Thus, the correct answer is B. Data Filtering, as it directly pertains to preventing and investigating data leaks in upload attempts blocked by the firewall.

NEW QUESTION # 51

A company uses Prisma Access to provide secure connectivity for mobile users to access its corporate-sanctioned Google Workspace and wants to block access to all unsanctioned Google Workspace environments. What would an administrator configure in the snippet to achieve this goal?

- A. URL category
- B. Dynamic User Groups
- C. Dynamic Address Groups
- **D. Tenant restrictions**

Answer: D

Explanation:

A company using Prisma Access to secure Google Workspace access while blocking unsanctioned Google tenants must implement Tenant Restrictions.

Why are Tenant Restrictions the Right Choice?

Restricts Google Workspace Access to Approved Tenants

Tenant restrictions allow only authorized Google Workspace tenants (e.g., the company's official domain) and block access to personal or unauthorized instances.

Prevents Data Exfiltration & Shadow IT Risks

Without tenant restrictions, users could log into personal Google accounts and transfer corporate data to external environments.

Works with Prisma Access Security Policies

Prisma Access enforces tenant restrictions at the cloud level, ensuring compliance without requiring local device policies.

Other Answer Choices Analysis

(A) Dynamic Address Groups

Used to group IPs dynamically based on tags but does not control SaaS tenant access.

(C) Dynamic User Groups

Used for role-based access control (RBAC), not for restricting Google Workspace tenants.

(D) URL Category

Can filter web categories, but cannot differentiate between different Google Workspace tenants.

Reference and Justification:

Firewall Deployment & Security Policies - Tenant restrictions enforce Google Workspace access policies.

Threat Prevention & WildFire - Prevents data exfiltration via unauthorized Google accounts.

Zero Trust Architectures - Ensures only authorized cloud tenants are accessible.

Thus, Tenant Restrictions (B) is the correct answer, as it effectively blocks access to unsanctioned Google Workspace environments while allowing corporate-approved tenants.

NEW QUESTION # 52

A company currently uses Prisma Access for its mobile users. A use case is discovered in which mobile users will need to access an internal site, but there is no existing network communication between the mobile users and the internal site.

Which Prisma Access functionality needs to be deployed to enable routing between the mobile users and the internal site?

- **A. Service connection**
- B. Security processing node
- C. Autonomous Digital Experience Manager (ADEM)
- D. Interconnect license

Answer: A

NEW QUESTION # 53

Which network design for internet of things (IoT) Security allows traffic mirroring from the switch to a TAP interface on the firewall to monitor traffic not otherwise seen?

- **A. Firewall outside DHCP path**
- B. DHCP server on firewall
- C. Firewall in DHCP path
- D. Firewall as DHCP relay

Answer: A

NEW QUESTION # 54

Which Security profile should be queried when investigating logs for upload attempts that were recently blocked due to sensitive information leaks?

- A. Data Filtering
- B. Antivirus
- C. URL Filtering
- D. Anti-spyware

Answer: A

NEW QUESTION # 55

.....

You final purpose is to get the NetSec-Generalist certificate. So it is important to choose good study materials. In fact, our aim is the same with you. Our NetSec-Generalist study materials have strong strengths to help you pass the exam. Maybe you still have doubts about our NetSec-Generalist exam materials. We have statistics to prove the truth. First of all, our sales volumes are the highest in the market. You can browse our official websites to check our sales volumes. At the same time, many people pass the exam for the first time under the guidance of our NetSec-Generalist Practice Exam.
